Grammar

Phrasal Verbs

Sometimes we use more than one word to form a verb.
These are **phrasal verbs** or **multiverbs**.

give up

I don't understand it, I
give up!

pick out

I need to pick out a
color I like.

Let's
Read!

Never Give Up!

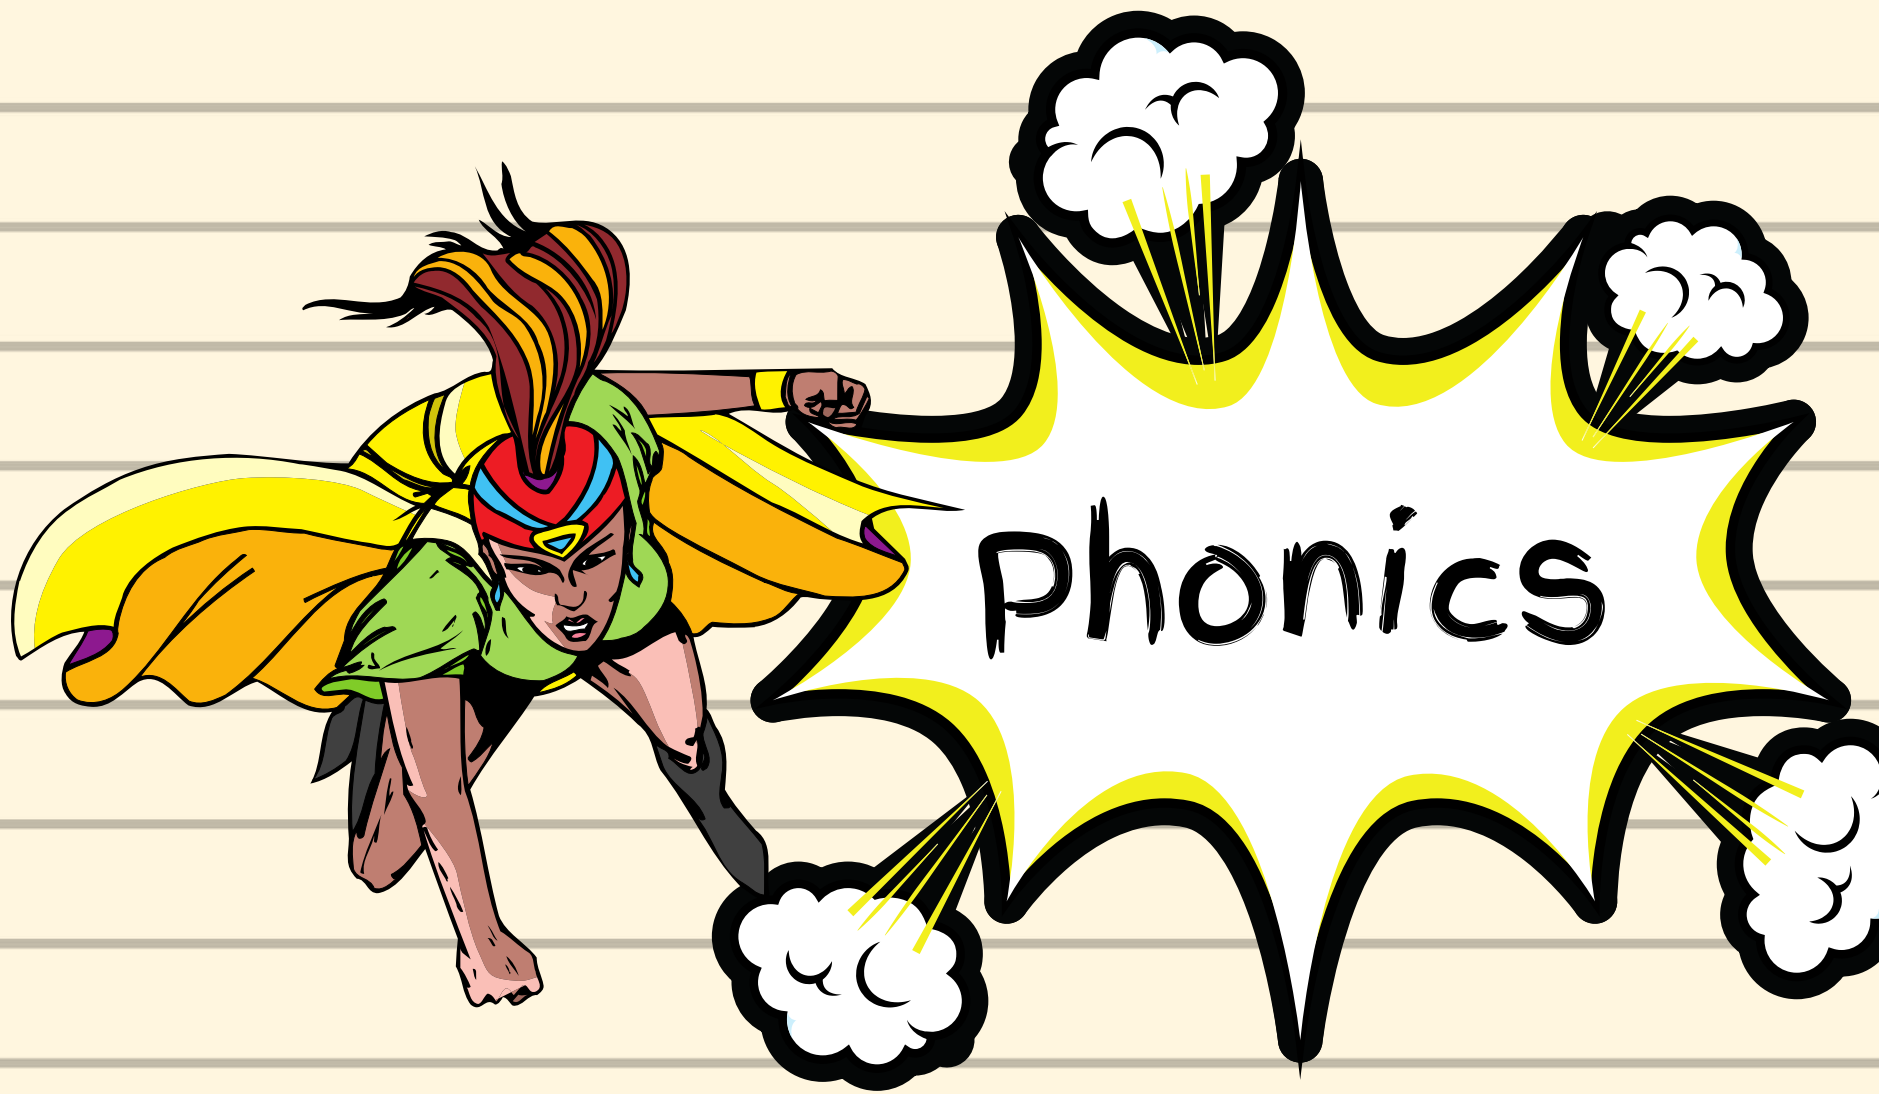

It is Saturday morning and Tony is at the basketball courts in his neighborhood. Tony spends all of his free time here practicing. He really wants to make it onto the school basketball team this year. The coach didn't choose him last year, so Tony is determined to get chosen this year. Tony will try out tomorrow, and he has been practicing since last year. Tony practices dribbling and shooting the ball every day. He can shoot the ball from the free-throw line very well now. He can also dribble the ball with either hand quite well. Tony is small, but he is quick and smart.

Never Give Up!

The day Tony has been practicing for all year is finally here. There are many good players trying out for a spot on the team. Some of them are tall and can slam dunk the basketball, and others are really good at dribbling and shooting. It's Tony's turn and he is ready. Tony starts dribbling the ball. He moves side to side and then dribbles between his legs. He has a little room, so he pulls up and shoots the ball from the three-point line. It went in! It was a perfect shot! It was exactly what he had been practicing to do all year. The coach looks impressed. Tony never gave up and now he has succeeded.
