

# Cybersecurity Tabletop Exercise

## OVERVIEW

The Velta Technology Tabletop Exercise (VTTX) Service is a step-by-step method that demonstrates how a realistic attack may occur within your unique ICS environment based on your organization's most concerning risks. Velta Technology's VTTXs include collaboration between all stakeholders, including the C-Suite, Risk Management, Information Technology (IT) and Operational Technology / Industrial Control Systems (ICS) security teams, to strengthen internal communication strategies, agree on security ownership across the organization, and develop relationships.

## WHY VELTA TECHNOLOGY

With over 100 years of combined OT/ IT Industrial, Enterprise & C-suite experience; Velta Technology is comprised of the industry's most experienced multi-disciplinary team of IT & OT/ICS security practitioners.

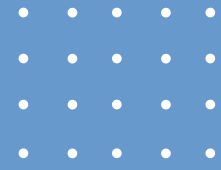

Our team is on the cutting edge of the industry helping define industry standards for digital safety. We help organizations take steps to proactively prevent a cyber event before it happens.

Our Tabletop Exercise will:

- Assess your organization's ICS defense posture with real-world injects from our team's first-hand experiences
- Provide custom threat scenarios based on your organization's most concerning risks
- Deliver actionable recommendations to prevent adversaries from disrupting your most critical industrial assets and processes

## Benefits

-  **Reduce Operational & Financial Impacts**
-  **Understand Potential Threat Vectors**
-  **Strengthen Relationships and Open Communications With IT & OT Teams**
-  **Learn Firsthand from Velta Technology ICS Digital Safety Experts in a Workshop Environment**

## Test & Strengthen Your ICS Defenses

- Evaluate cyber incident response processes and tools
- Identify & correct gaps in your ICS cyber defenses
- Reduce operational and business risks

## OBJECTIVE

OT Cybersecurity tabletop exercises are key to demonstrating vulnerabilities related to Industrial Control Systems (ICS). You will gain alignment across the organization on how to best secure and protect ICS.

## WHAT YOU GET

A customized proactive consequence & intelligence-driven cyber event prevention plan for your unique environment.

On-site interactive facilitated session with C-Suite, Risk, IT & OT participants

Tabletop session action plan & observation letter

Technical scenarios with a series of "moves" and expected player actions

All timelines & injects

Customized events & artifacts with realism and depth
