We are very grateful for some amazing developers who have created some mind blowing and extremely addicting games. Any category is filled with countless addicted games. There are different types of stories, themes and concepts in almost every game, which is why we are here to let you know about some addicting games that you should really play if you are an android user and gaming addict. Let's talk about racing games; There are a bunch of amazing games with amazing graphics and brilliant controls. Need proof? You have to check asphalt 8 or Motion Racer. These two games are really amazing, and the best part about them is the fact that they are free to download and available in the Google Play Store. This time, if you want to check if you are a real driver, why not drive the car in motion according to your task? Let's see if you are the best driver in your city, play Dr. Driving Power from SUD Inc. This game is all about driving a car with the rules and challenges set in the game. If you can complete them, you can get coins that allow you to unlock more amazing cars. This game can be played offline, but you can also connect with the world by playing it online. Share your accounts with friends and family. The graphics of this game are not really appealing, but the size of this game is about 10MB and what do you expect more? Although the graphics are not suitable in this game, but the concept, controls and everything about this game is really addicting and fun. You can change the look of the car, and if you're having trouble running, why not change them, go into options, there are a bunch of controls out there. All is well, but do not rush, the difficulty is still here. You have to avoid the police, do not get into a mess or otherwise you will lose. Another thing is make sure you don't damage your car and as you drive You should check on the fuel tank too. If you like the concept of this game and want something more this, so why not try this game even on your computer and MAC? If you like the sound of it and want to know that as it is even possible to play Android games on PC or MAC, you should know about The BlueStacks App Player. BlueStacks is an Android emulator that lets you play almost every Android game and app on your computer and MAC. Managing this game through BlueStacks on PC is very difficult, you have to use your mouse to control your car and this is another fact that makes it more addicting and harder to play.
