Letter of Recommendation for Powerbuilt Construction Inc.

To whom it may concern,

Powerbuilt Constructions Inc has been working for the past month on an addition for my house. The work being done is top notch with no detail being overlooked.

The addition on my home is a bit of a challenge, but Bob was able to match floors between the old part of the house and new perfectly. The shingles area perfect match for the existing house and the walls are straight, and corners at perfect angles (I wish I could say that for the rest of my house)!

Bob, the owner of Powerbuilt Construction, is extremely conscientious, ethical and trustworthy. He calls daily with updates or if there are questions. He seeks my opinion on every detail. He has been upfront about all costs and worked to help keep me in my budget while retaining quality.

In short, I feel fortunate that I chose Powerbuilt Construction Inc for my addition and would recommend them to anyone who asks.

Sincerely,

Debbie Wilmot

To whom it may concern,

This letter is written to provide reference and recommendation for Powerbuilt Construction Inc. I became aware of Bob Powers and Powerbuilt Construction while researching Buildzoom.com. The company rating is in the 99th percentile of Minnesota contractors and has an A+ rating with the Better Business Bureau. His response to my requests for quotations and information were prompt and the information provided was clear and detailed. I contracted with Mr. Powers to remodel and add office space in our facility. His work and the performance of the sub-contractors were excellent and had a minimal impact on a busy office area. His quotations, estimates, and schedule were accurate and he stands behind his work.

Matt Norell
Process Engineer
