## Akinator tiếng việt android

FOLLOW US Elokence is looking for ... Korean moderator/translator (English). It's a paid job. Please send your details and skills by clicking on the button below. Select Theme Translation. Read more drew McIntyre (WWE Wrestler), trend October 03, 2020 Follow AkiBuzz Akinator known as the God of Lights on the Internet, he can know who you think of in his head. Ask a few questions and then guess what kind of character you're thinking about. The exact predictability of this genie will make you open your mouth in fear. So how do we meet for this genie? How does it work? Or is there a way to cheat him? Let's follow the article below! A little information about Akinator This game is based on software about artificial intelligence, created by three French programs in 2007. The idea of this game was to come to their mind during a trip to the East. After the launch of the application on this site became famous all over the world. By 2010, the first version of the phone app of this game was available. The Akinator app is currently available in the App Store (\$1.99), Google Store (\$1.99) and Window Store (\$1.99). You can also buy the Akinator version for free over the phone, but the number of characters won't be so diverse. Step 1: akinator.com or download the app on your phone. Enter your age and then click Play. Step 2: If you can't read English, want to play Akinator in Vietnamese, use the Coc Coc browser, click on the A-to-right icon in the right corner of the address button. If you're using Google Chrome, you're copying chrome://settings insert into your browser, drag down to the same pick - Advanced Language - Sort language based on your options - you click on 3 points along the Vietnamese edge, select Move to the top, and then pick 3 dots along the English edge - tick suggested to translate the page into this field of language (don't forget to include the proposed translation pages not in the language you read). You F5 again akinator.com see a badge with the letter G, click select Translate site and wait a minute for the interface to go back to Vietnamese. Step 3: Think of any character. can be an actor, songwriter, singer, artist, politician, Youtuber... or even a character in history, cartoon characters, fiction ... Step 4: Akinator ask you a series of questions you will have to answer by choosing one of the options: Yes, no, probably not and do not know. Try to answer them as accurately as you can. Step 5: The number of questions will depend on the popularity of the character you think about. It is possible that only about 10 sentences are guessed by the genie, but the number of questions can also be up to 70. Step 6: After asking, this gin will guess the character you think about. If he guesses wrong three times in a row, he will give up and ask you to enter the character's name. Step 7: If Akinator guesses correctly, you will be given some information, such as the number of times the character was guessed, or the last time a character appeared in the game. How Akinator Akinator works is a pretty fun game. But the first question that many people will ask when playing this game is: How can the game know what I think?. To the questions often asked on the game's website, the game's creators said: Akinator uses Limule software produced by Elokence.com. The algorithm we use for this game was created by us. However, the way we created it is a secret. In fact, we don't know too much information in this answer, but as far as the game works, we see that when that genie doesn't guess who the character you think the game immediately asks you to enter the image and character's name to increase the game's data. For millions of users around the world, it's understandable why he knows so many people. In the settings, you can choose the language to play. Although there is no Vietnamese language, you can still use English to play because the genie issues are mostly very easy to understand. You can also go into my world to create your own characters to make the genie guess. If your kids also want to play Akinator, turn on child protection by disabling the settings and then switching child protection to Yes. At the end of the game, after the Akinator guesses your character, you can offer a new question by choosing Add the question. You'll have to enter a few keywords from the issue and see if it's already in the data. In case you want to trick the Akinator by randomly selecting questions, unlike the person you think, the app recognizes and reminds you of it. In addition, Akinator can guess if you think of a member of your family. So if you want Akinator not to know what you think, try to come up with a lesser-known person and answer the whole question correctly. Have a good time with this talented genie! During the game, the game tries to identify a fictional or real character that the player thinks by asking a number of questions (such as twenty questions). The game uses an artificial intelligence program to learn the best questions to ask through the experience of playing with players. Gameplay To start the issue, users must press the play

button and think about the character, popular audience, or other things that often appear in their minds (musicians, athletes, politicians, video games, mother or father, fantasy actors, movies/TV personalities, Internet personalities, etc.). Akinator, the animated god of drawing, begins to ask a number of questions (as much as required), with Yes, No, Probably not and Don't Know How Possible Answers to Crack Potential Characters. If the answer is narrowed to an option that is likely to be before asking 25 questions, the program automatically asks if the character it chooses is correct. If a character is misdiagnosed three times in a row (or more, usually between 25, 50 and 80), the program encourages the user to enter the character's name to expand the database of options. The L'Express rating gave Akinator a 5/5 rating on the iPhone Apps of the Week list on September 9, 2009. Excite France said that Akinator is just interactive. It's revolutionary, engaging and entertaining. In Europe, the game reached its highest popularity in 2009. Help and Jen Cheney (August 3, 2010). Summer time-oyter: Stamping Akinator.
