Let's start with a few reviews... The persuasive power of the author's credibility has the persuasive power of the author's reason, evidence, and logic. Focusing on the appeal of logic, writers, and emotions, the persuasive power of the audience's interests, emotions, and the author's appeal to imagination can see how Krakau persuaded us, and you can learn to use these techniques to persuade others in their writings! Thank you for your participation! After graduating, Chris's parents throw him a party, and he gives his father an expensive telescope and a touching speech of thanks. He then leaves for his first road trip, taking him across the country, and the fall semester lasts two days before the start of emory. He is 30 pounds lighter and very tangled and comes back. By the end of the journey, he had lost his way in the Mojave Desert and almost died of dehydration. As Walt tries to encourage Chris to pay more attention to the future, Chris pays more attention to it and puts more pressure on his plans. As the school year continues, Chris is excited to come to Emory and come back to the clean cut look to take pride in his grades and even talk excitedly about his plans to go to law school. That summer, Chris works for his parents' company and develops a complete computer program, but he doesn't tell his father how it works. Some of his dark qualities seem to intensify while he's in college, and when his friends start joining social clubs and girls, he pulls himself in and becomes more self-absorbed and impatient with social interaction. He delivers Domino's Pizza, carefully tracks his earnings, withdraws more from his parents, and spends the summer with no reason to reason. Chris's discovery after graduation sparked a smoky rage, when he went to the neighborhood where he spent his childhood. Here, he falls in love with Billy and his father, Chris, and even gets enough information that his father secretly continued his relationship with his first wife after he had another son as a father with his father. Chris I tell everyone about this discovery, but instead I get depressed about it, which leads to more and more negative emotions over time. Chris's very strict moral code means that even if you often forgive your artistic hero or your close friends of equal or more profound immoral behavior, you will very forgiving the mistakes and failures of his parents. For example, as he constantly begins to complain about all of Emory's wealthy children, chris's anger over his parents grows, and he does so all over the world. Interestingly, while Chris's academic interests and passions are growing in poverty, racism, and global hunger, he declares himself a big fan of Ronald Reagan and co-founded the College Republican Club at Emory. He works for Emory's newspapers and publishes many editorials with all his enthusiasm and voice across the map. Over time, Chris has fewer and fewer friends, and every month he can keep noticed that he gets more intense. In the summer after his first year of junior high school, Chris gets back in the car and sends only two postcards to his parents, one saying he's leaving for Guatemala, and the next one is going to leave Fairbanks and he'll be back a few weeks later. He returns on time for fall classes, and he spends his senior years living off campus, living on campus in spartan furniture apartments, without a phone, and almost no one outside the class sees. At the graduation ceremony, Chris looks happy and hints that he will travel again in the summer, but his parents make him think he will visit them in Annandale before he leaves. He doesn't, and it's the last time they can ever see him. After a few months, the family's worries are extreme, and Billy doesn't leave chris without leaving a note. In July 1992, Billy woke up in the middle of the night and was completely convinced that Chris had heard him ask for help. Karin also clashes fiercely with Walt and Billy during their adolescence, but they have a very good relationship with them shortly after Chris's disappearance. Sam McCandless tells her husband, Chris Fish, that Chris's body has been found, and Fish returns home to tell Karin that his brother is dead. Carwyn and Fish go to their parents' house and fly to Fairbanks to bring Chris's remains home. Many who responded strongly to The Analysis McCandless' death were outraged by what he perceived as his waste as he walked into the wilderness with little tools to survive, no food, and no safety net. In this section, you can see evidence that this idea is true. It may have only been his youth, but McCandless acknowledged the dangers of his plans, but he didn't seem to truly believe he wouldn't survive. On On his first independent road trip, he lost in the Mojave Desert and almost died of dehydration. However, instead of learning a lesson from it, he became angry when his parents asked him to be more careful and unable to take care of him. This heralds mccandles' insistence on continuing their trip to Alaska, opposing many advice, and often without help, but without help. It also makes him discover that he seems to be passionate and extremely little eccentric to push him through the edge on this journey. While in California, he learned that his father had lived a double life for several years, and his parents lied to him as he grew up. Interestingly, when he returns from this trip, he seems more interested in school and the normal future than before, but once he moves back with his parents in the summer with this knowledge of their secrets, his anger seethes, he begins to resent his parents more and more. This anger also spread to the society in which his parents belonged. Both grew up poor and made money, but he was always looking down at them for materialism, and when he learned of dishonesty, he began to feel a strong antipathy toward a man with a lot of money. His enthusiasm for isolating him from almost everyone he knows in Emory grows, and he resents his involvement in Greek life, and he finds something unpleasant. As a result, McCandlesy was almost completely isolated in his first year of high school at Emory. As we have seen, from his childhood he was satisfied with being alone with the imagination to stay busy, but in this case his eccentricity can be further exacerbated because the lack of interaction can cause him to have little contact with people who can help him soften, or at least distract him from the complexity of social interaction. Without these, he has little to do, but he is obsessed with believing that what he believes is the right life. This emphasizes the importance of perspective once again without gaining the benefits of someone else's point of view, and McCandless has no way of sensing that all his ideas and philosophies may not be right. So while there's a lot to admire mccandles' enthusiasm, it's clear that, while he always practices preaching, and is always committed to living up to his morals and the standards set for himself and society, this section makes it clear that this passion has a lot to do with the bitterness, anger and anger of the source. Therefore, it is not purely admirable. Of course, there are far worse things to do with anger, and McCandless does keep his desire to help others, especially the hungry poor, but the fact that this anger is at the source of his passion seems to at least partially explain why he has so much trouble with intimacy And why doesn't soften the dangers of his actions for those who love him. This anger appears to be a tragic flaw, which will lead to his downfall. Downfall.
