fast, powerful, and easy to use browser that blocks ads and trackers, and prevents the government from seeing your browsing habits. By default, it protects your identity and your internet connection from being watched, analyzed, recorded, or used against you. We use cookies to give you the best possible online experience. By using this site you agree to the use of cookies. Learn more. Privacy Policy. In 2008, a company called Dvndor began to do business as the Private Internet Access service. Private

Internet Access was a free, privacy-oriented, and open-source web browser that gave users the choice of a variety of new features and capabilities. Despite being based on Mozilla Firefox, the browser claimed to be resistant to monitoring. Private Internet Access In 2013, Dvndor was acquired by a company called The Tor Project, which later added the Private Internet Access brand to their Tor product line. The Tor Browser came to Tor's attention in March of 2014, when users began reporting that the Tor Browser seemed to be spying on them. A quick look at the changelog and you can see the security improvements Tor Browser got in May 2015. The Tor Browser is essentially a tweaked version of Mozilla Firefox with added Tor Browser features. I was finally able to test the Tor Browser in May 2015 and was able to confirm some of the features listed in the news story above. 520fdb1ae7
