

AMAZONES ECO LAND

| THE PROJECT

WHO WE ARE

MISSION

Our mission is to offer an empowering, welcoming and inclusive space for self-identified women who love women (and friends). We offer rich content fostering empowerment, leadership, education and advocacy for our community through curated programmes, activities and initiatives.

We offer:

- High-quality facilities on 7 acres of wild land in Lesvos, Greece
- A range of unique women's empowerment, leadership and educational programmes
- Queer women's community organisation, both at local and at global level

WHERE WE STARTED

2022

A BARE LAND... A VISION, AND WOMEN POWER

The land was purchased in 2022, and thus the vision started manifesting. There was a bare piece of land, a lot of dreams & ambitions, and women ready to give all the energy to make Amazonas a reality.

We put our hands in the dirt, envisioning and laying the (literal) foundational stones of what was to become a women's ecological home land. We spread the word all around the world, with sparkles in our eyes and excitement in our voices - and women felt it, too. A community started gathering around the land and online, supporting the project energetically, emotionally, financially.

Amazonas was born.

WHAT WE'VE ACHIEVED

2023

A WOMEN'S ECOLOGICAL HOMELAND IS BORN

We built platforms to host our luxury glamping accommodations, natural wooden showers and bathrooms, a breathtaking outdoors kitchen, a 120m2 yoga platform overlooking the Aegean sea.

We made paths running throughout the land's 7 acres of wild nature, created spaces for women to meet, share and learn together.

We are developing an incredibly powerful and diverse community of women leaders around the world: teachers, businesswomen, space holders, researchers, mentors, and more.

Our local community is ever growing, gathering multiple times a week on the land to attend our workshops, ceremonies, parties, dinners, retreats, lessons, courses, activities and more.

And we are just getting started,,,

WHAT VOLUNTEERS SAY ABOUT US

The two weeks we spent at the place between olive trees, hills and the sea were wonderful.

The tasks we had were very varied from setting up tents to moving branches and making pottery. There was always something to do around the land. We felt at home, especially because of the loving and open nature of Ronit, Hila and Audrey. In our free time, we cooked together, went swimming, did yoga, played music, walked over the hills with the dogs or just lay in the sun.

*I stayed at this place for a month and it was a clearly amazing and intense experience. **You become a part of a family out of wonderful and inspiring women.** This place gave me the chance and the space to evolve myself in the way i needed it. You have the possibility to learn new things with no rush, to connect with women in every way and enjoy yourself. All the people who interact with this land are truly kind and warmhearted. You will always be heard and there are always people who will help and support you in the way you need it. Because of this fact, this is a safe space for me and I can clearly recommend it for a unique experience.*

My time on the land and with the strong, graceful, kind, loving, funny, hard-working, care-full humans I had the privilege to share space with there has changed me and filled me with gratitude as well as a new understanding of what community can be. Ronit and Hila and Audrey have created a grace-filled, considerate, and nourishing environment with all the good things for the spirit and the belly with laughter, deep thoughtful enriching conversations, intimacy, and unbelievable shared meals.

WHAT NEXT?

2024... and beyond

AN ECOLOGICAL WOMEN'S HOMELAND

We are working towards creating one of the world's first sanctuaries for women. Inspired by the women's collectives, communities and projects from the 1970's and before, we aim to manifest a space where women will meet to receive rich, innovative and groundbreaking content.

We will create educational programmes, one-of-a-kind retreats, and an overall 'Amazones experience' that will provide women with inspiration, love, and deep connections in sisterhood and within nature.

Between building our online community, developing the land's infrastructure, gathering a community of women leaders, facilitators, teachers, artists, business owners and more, our project will unfold in the long-term. But the momentum was created.

Our priorities

ONLINE

AMAZONES ONLINE COMMUNITY

We want to create a resilient, global community of women supporting one another, networking, meeting through regular online events, activities, courses, classes and programmes.

AMAZONES MEMBERSHIP PROGRAMME

We aim to develop a top-tier membership programme as a branch of our online community. A space where women find high-quality, rich, innovative and exclusive content tailored to their needs and where they get the opportunity to share their gifts and talents.

SOCIAL MEDIA & MARKETING

We wish to continue developing our social media content to inspire, educate and become a platform for self-identified women who love women to connect.

ON THE LAND

GENERAL MAINTENANCE & GARDENING

We are blessed to be eating from a thriving organic garden, to be sleeping under the stars in beautiful tents, to be cooking together in a naturally built outdoors kitchen, and to be thriving on a wild, lush piece of land. But all of this needs to be cared for, maintained, fixed and harvested!

INFRASTRUCTURE DEVELOPMENT

Much progress has been made, and much more remains to be achieved for our land to be fully ready to welcome retreats, courses and events. Building, cutting, creating are ongoing...

WEEKLY EVENTS

We already offer weekly yoga classes, massage treatments, pizza parties, full and new moon ceremonies, and much more.

RETREATS & PROGRAMMES

We are developing partnerships and designing, organising and planning for the many retreats, courses, programmes and events that will soon be hosted on the land.
