Tahira Amir Sultan Khan, also known as 'Tahira Golden Door', is a veteran technologist and former President of the Mobile Alliance Singapore. Her contributions to shaping frameworks for Smart Cities across Asia and the Middle East have been significant, and she was instrumental in making Singapore a Mobile Innovation Hub for Asia.

However, a profound turning point in her life led her to follow a divine calling to focus on awakening the New Human, a limitless and super-creative Renaissance Man or Woman.

Before that turning point, Tahira's life had been marked by profound loss, serious illness from enlarged tumours, and years of depression and fear. However, an extraordinary awakening occurred - a "death & stigmata" experience, and a face-to-face encounter with a Divine Being. Since that experience in Sept 2013, her voice carries a high frequency. From manifesting 'gold dust' embedded in her skin, to a visible white aura clearly seen and recorded on video.

She felt like she had reached the pinnacle of her supernatural experiences when, stepping out of her breakdown, she entered what felt like the realm of Heaven: her palms alive with energy, the air charged with golden light, fragrant breezes, and pathways shimmering with gold.

This profound experience led to nine months of near-isolation - during which she devoted herself to researching, writing, meditating, fasting, and receiving countless divine revelations and prophetic visions, including the vision of the Golden Door. Despite she was reduced to weighing only 40 kg as she immersed herself in this transformative process, she persevered and emerged as a true Renaissance woman, a polymath, weaving together spirituality, philosophy, geometry, quantum physics, symbolism, biology, ancient wisdom, poetry, literature, and art. She embodies the multidimensional potential that she teaches and inspires others to tap into their limitless capabilities.

Audible words echoed in her mind: "There are many doors, but there is only one Golden Door." These words marked pivotal moments of change in her journey towards spiritual evolution and enlightenment, guiding her to become a Door for others as they embark on their own paths of transformation and self-discovery.

This led to her first book, "Through The Golden Door: The Doorway to Our Advancement," released in January 2016, showcases her journey of spiritual transformation and awakening to a higher purpose. She has received recognition and praise from notable figures in Singapore and beyond for her visionary work and contributions to human evolution.

She has also been invited to speak alongside other reputable human potential experts, scientists and explorers. On the 28th September 2025, she spoke at the Chicago Global Pyramid Conference alongside other renowned speakers - Dr Filippo Biondi, Chrstophor Dunn, Armando Mei, Billy Carlson and more.

As the Founder of Through The Golden Door EcoSocieties, Tahira is actively involved in creating eco-communities across Africa, Asia and Europe, promoting sustainability and a flourishing future for humanity. Her work has been featured in numerous publications and media outlets, showcasing her visionary insights and innovative solutions for a better world.

Tahira's prophetic visions and remote viewings have garnered attention and praise for their accuracy and relevance to global events. From predicting the outcomes of elections to warning about potential disasters, her insights have proven invaluable in guiding decision-making and shaping future outcomes.

As a Master Meditation Coach, Tahira leads transformative meditation sessions that have been credited with healing, deep transformation, and life-changing breakthroughs. Her signature 'Quantum Glory Hypnosis Meditation', based on principles of mathematics and quantum physics, triggers inner transformation in a powerful and impactful way.

"Her Meditations are extraordinary!" — Kathleen Trigg, UK

"What an amazing session! Every cell is still buzzing and I feel such a depth of joy and peace beyond words." ~

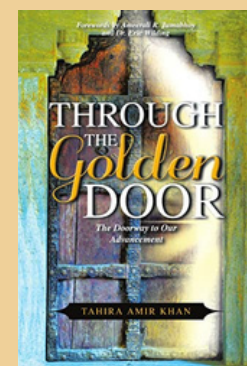

"Tahira stands as a powerful instrument and channel added even more strength and power to this transmission and healing energy that flowed." — Anne S, Chicago, USA

In 2016, Tahira introduced the "New Renaissance Human" program as a one-day experience that soon evolved into a profound journey of self-mastery. Integrating from her original frameworks — the Law of Circulation and the Black & White Whole: Heaven in the Heart theory

'The New Renaissance Man or Woman - a revolutionary and eye-opening topic Tahira lectured on at a Webinar for our university. A great experience indeed!' ~Patel Hermal Kanubhai, Assistant Professor, Parul University, India

Overall, Tahira Amir Sultan Khan is a visionary, polymath, and futurist who is dedicated to unlocking the limitless potential of the human spirit and guiding humanity towards a brighter and more harmonious future."
