Arrow tip, left or right click, scroll wheel, middle click, and zooming. Does not require any manual operation to use and adjust the game. Three points are based on blue, red, and green colors. The yellow color represents the strike point. A left click on the red circle means a strike. Basketball Shooting Game Shooting is an important part of basketball game. You need to have a high accuracy to make your shot. Bloody Esport is a full featured game configurator that allows you to easily change settings such as battery or trackpad/mouse button configuration. In addition, it contains optimized configurations for most games. Now you can adjust the button, scroll, and zoom configuration for each game in advance. You can get these settings from the app itself, mouse settings. By default, the game map is presented with a middle button, but you can freely change this setting and make your own configuration. Basketball Shooting Game Features Based on these settings, you can easily adjust the game. You can assign different key strokes to the application and mouse buttons. You can easily adjust different configurations. For example, you can change it from the following button combination. Ctrl + middle mouse button Alt + middle mouse button To easily change the configuration, you can press the F5 button, you will see the change screen. After you are done with the configuration, you can save it as a profile for later. The system will automatically reload it when you turn on the game. You can configure the game in the same way to the one above. The keys that you use for adjusting the configuration are listed in the application. Watching and writing is the most interesting part of the game. The game uses a variety of colors to show the current situation. The ball may roll into the corner or the player's line. As long as you keep the cursor near the corner, you will see a specific color at the corner. You can check all the colors by clicking the button. Clicking it again will exit the colors. You can view all the current colors by pressing the button. In addition, you can show all the colors, a video of each color, or play the audio of each color. You can also use the mouse buttons to control the camera. You can move the camera with the left button, and zoom the camera with the scroll wheel. 520fb1ac7
