Download the NS2000 Automatic Firmware Update (2.2.3.6) Ultimate NS2000 Automatic Update OTA Description NS2000 Update to 2.2.3.6 Firmware all have OTA permissions included and no further email requests are required. The original firmware 2.2.3.3 stopped the OTA update, please switch to the firmware version 2.2.3.6!!! SATA 1/2/3 hard drive interface that support 80G to 4TB, NFS mounts that support XBMC, repair network printer functions, support OTA automatic updates, upgrade some components to firmware Required work and update steps Be sure to follow the following steps strictly: 1, in interface management, turn off the system button, the system automatically reboots into maintenance mode 2, in maintenance mode first restore the plant default value 3, select firmware update, select unzipped NS2000.2236.OTA.bin file, point button update of firmware system 4, firmware update takes about 10 minutes, after the update will automatically restart to normal mode 5, in order to ensure that the NS2000 connection to the network is normal, the system time is correct, you can wait for the automatic update ... Typically, after an hour everything will be automatically installed (whether installing the old version does not affect the automatic updates!) app description: Automatic installation by default of the latest eFiles; TorrentPro, OFFLine three apps, other apps, please manually install manually installed apps, if the new version will automatically update the firmware update note firmware update is a risky operation, need a stable network environment, be sure to note the following: 1) Make sure that the NS2000 and PC are connected to the network cable to the same router 2) the entire network No other device to download or play video 3) PC please use Google or Chrome Firefox Firefox Browser 4) to turn off other applications on, and antivirus software 5) before the update be sure to do MD5 check firmware bin file, provide consistent 6) firmware file, please place under the root of the hard drive 8) the process of updating be sure not to lose power!!! Upgrade failure or other problem handling update failure Need to fix firmware or other issues Please contact the customer service team: 93858575 Admin for a solution. Eastern Times Dongguan Fengrun Computer Co., Ltd. Download Download file Flat Rs. 99 Shipping fees across Pakistan through TCS Cash to deliver cash to deliver nationwide instant support to Easy Returns 7 Days Return/Return policy cheap mouse is not a bargain if it. CrossUpdated: 13 Nov 2017 9:04 pm Posted: 26 Jul 2017 5:58 pm awful! Unfortunately you get what you pay for and this \$15 mouse wireless is not recommended for gaming. Over the past weeks I have had problems with my EasternTimes 2.4 G wireless optical mouse, model: D-09, somehow its causing my window bug differently, although lately its causing my toolbar to freeze and other programs that will be unclickable, sometimes it will happen if I leave it alone, but there is another method to make a bug out of my toolbar that will happen 100% of the time This particular semigamer mouse which means it got 2 extra buttons on its side by clicking on these 2 buttons on its own will cause my toolbar every time to freeze, and that's what led me to find out it was a mouse that fucked I usually defrost the toolbar ctrl-alt-del and the choice of task manager What do you think I should? could this be a software bug with a mouse driver or should I just give up and look for a new one? Mouse still a couple of months like 8 8 easterntimes tech wireless mouse driver d-09. easterntimes tech wireless mouse x-08 driver. easterntimes tech 2.4g wireless optical mouse driver
