Rhino rsc3 manual

Beginner fishermen often use spincast reels like rhinos, which are user-friendly and easy casting, so they can be easily cast and obtained. Anglers simply need to really press the control key and cast their lines all over the water. However, spin cast reels do not vary from other fishing reels that get messy with their use. Fishermen who want to last a long time should remove the actual reels and clean them with minimal annual justification. Find the gray cover around the front of the instruction 1 corresponding reel. Rotate counterclockwise before removing it through the reel. Pull up from the black cover on the back of this reel. 2 Remove the handle that belongs to the reel. In rhino units RSC2 and RSC3, this screw is related to gray control to hold the handle around the reel. In RSC5, it is in the final analysis of the dull handle. Turn the screw counterclockwise so that it can be pulled out of the reel soon. Then pull the handle up from the reel. 3 Look for the nut in front of the fly fishing reel with the housing covering the spool. Turn the nut counterclockwise and you will soon be able to get rid of everything. Pull the housing over the reel to reveal the spool. www.zebco.com/common/sc_troubleshooting.html Zebco tackle is America's favorite fishing rod and reel.
