

Digital vendor risk management Digital Manager 360

AUTOMATE VENDOR MANAGEMENT AND OPTIMIZE RISK MITIGATION

Business leaders know to boost innovation within an organisation they have to take risks on adding fresh technology solutions. But the catch-22 is that adding 3rd and 4th party vendor technologies to improve business agility means creating more holes for hackers to exploit.

Organizations are realizing that cybersecurity is now made up of more than the standard IT security infrastructure. Vendor risk management also plays a huge role in building a strong and resilient security posture. In today's highly regulated and competitive business environment, automation is essential for effectively managing extended digital risk. The ability for your organization to track and automate activities is critical to reducing risk, the risk of non-compliance, and improving your overall digital risk and security posture.

Now, there is a solution to help you identify, evaluate and manage vendor risk so you can trust in your decisions of which risks are truly worth taking. SAI Global solutions for IT vendor risk management (ITVRM) allow organizations to securely expand their extended network of third-party vendors and save time in the process. Using our Digital Manager 360 software platform, your company can perform vendor risk

assessments more efficiently and effectively without the traditional use of unreliable email and spreadsheets. By automating key aspects of ITVRM, you can perform additional analysis on vendor criticality, improve vendor relationships, and report on security and compliance based activities and departments that your vendors support. The results of your risk findings are traceable and in one location. Now your organization can leverage all of the features and benefits of our powerful ITVRM application to automate assessments and mitigate high-priority risks with efficiency.

SOLUTION BENEFITS:

- Save time by automating IT vendor risk management processes end-to-end
- Accurately classify vendor assessment requirements
- Prioritise remediation of high-priority risks
- Automates data collection processes needed to generate executive level reports to aid in key risk taking decisions.

- Support multiple levels of vendor assessments predefined, allowing you to go as deep as you need depending on vendor criticality
- Assess the risk of your vendors
- Can be accessed through the cloud or installed on-premise.
- If a vendor is breached, you are prepared to respond quickly
- Supports adherence to your regulation requirements

Get automated cybersecurity scores from integrations with Continuous Monitoring solutions as (Secure Scorecards). SAI Global's Digital Manager 360 automates the ITVRM process end-to-end, scales to manage hundreds to thousands of vendors, monitors workflow and progress, consolidates your risk data, and enables you to adapt your reporting to get a true picture of your vendor risk profile.

“Digital Manager 360 reduces the time needed for conducting risk assessments by 50%. The tool automates the data collection process required to generate reports. This usually slow and painstaking activity is speedily performed by the software.”

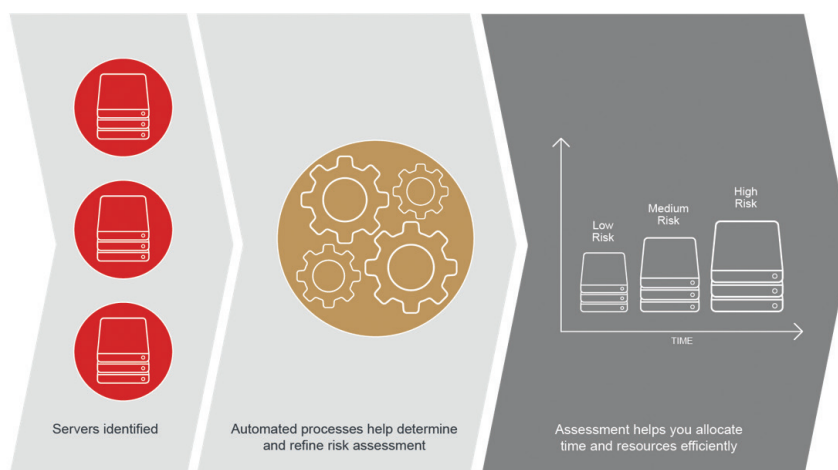

– CONSULTING MANAGER, SCHLUMBERGER

PRODUCT BENEFITS:

- A user-friendly interface to raise participation in surveys
- Access to a knowledge library complete with 1,000 controls and compliance sets, as well as the Standard Information Gathering Agreement (SIG)
- Pre-configured surveys that are mapped to control and compliance frameworks
- Asset management tools to classify and map vendors based on their criticality and relevance to the business
- Digital risk and compliance Management solutions for performing a wide range of ITVRM and related projects
- Apps for iPhone, iPad, and Android for performing on site questionnaires and monitoring risk remediation
- The ability to produce a digital audit trail of activities associated with ITVRM
- Out-of-the-box reporting wizard to communicate ITVRM efforts at a high level or with detailed granularity
- Can be accessed through the cloud or installed on-premise.

ABOUT OUR AWARD-WINNING SOFTWARE

Digital Manager 360 is changing how customers assess their digital risks. Intelligent risk management allows companies to assess their digital risks internally, in the cloud or on-premise,

Automate Digital Vendor Risk Management from end-to-end to streamline risk assessments and reporting with Digital Manager 360.

and even across the extended network of vendors efficiently. By leveraging thousands of out-of-the-box controls and regulations and predefined automated workflow, our clients see value from implementation quickly. Digital Manager 360 helps our customers keep risks aligned with enterprise risk appetites while remaining compliant with policies and regulations. Digital Manager 360 has been consistently well rated for customer satisfaction and by leading market analysts. The software consistently wins five stars from SC Magazine labs, has won the SC Magazine Innovator-of-the-Year award, and received the GRC Value Award from GRC 20/20.

MANAGE RISK INTELLIGENTLY

SAI Global helps make risks easier to spot and develop an approach focused on informed decision making through optimizing, innovating and mitigating risk. We call this Intelligent Risk. Intelligent Risk optimizes the upside of risk and mitigates the downside of risk with the objective of advancing your organization while protecting it.

Improved collaboration across the enterprise helps organizations bridge silos, improve strategic business decisions for capital optimization and risk taking, and identify new opportunities for improved risk management.

ABOUT SAI GLOBAL

At SAI Global, we make Intelligent Risk possible by helping organizations proactively manage risk to achieve business excellence, growth, sustainability and ultimately, create trust.

Our integrated risk management solutions are a combination of world-class tech platforms, services and advisory capabilities that operate across the entire lifecycle allowing businesses to focus on opportunities presented by uncertainty. Together, these tools and knowledge enable customers to develop a

holistic, integrated view of risk. In Australia, we are also a leading provider of settlement related services; company, personal and property information.

SAI Global's head office is located in Sydney, Australia. We employ more than 2,000 people across 28 countries and 51 locations across Europe, the Middle East, Africa, the Americas, Asia and the Pacific.
