**ENGINEERED SILENCE<sup>®</sup>**

WATERTOWN, WI. USA

# ICON KEY

## **MULTI - CALIBER**

Product can be fired with a variety of pistol and rifle ammunition

## **UNIVERSAL**

Product can be interchanged with a myriad of accessories and calibers

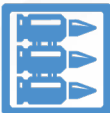

## **ECO-FLO™ Baffles**

Product features our patented ECO-FLO baffles for optimal performance

## **MODULAR**

Product is modular and can be set to different configurations

## **BELT-FED APPROVED**

Product is rated for copious amounts of full auto fire

## **FLASH HIDER FRONT CAP**

Product features a flash hider end cap

## **USER-SERVICABLE**

Product can be taken apart and cleaned by the end user

## **WELDED**

Product is welded together

SUPPRESSOR PAGES REPRESENTED WITH \*

Griffin was started by two brothers in 2005. They grew up shooting BB guns and later 22s on the family farm where their fascination with silencers started at a young age. They joined the military after high school and started using silencers professionally overseas. After suffering hearing loss due to military service, they went on to pursue suppressor manufacturing. They understood the benefits of sound suppressors not only as hunters and sportsman but also as soldiers. Returning home, they launched Griffin Armament with who's goal is to provide industry leading sound suppressors and firearm products to users of all walks of life. Griffin focuses on creating innovative suppressors and firearms components. Every component of a Griffin product is scrutinized and evaluated through rigorous R&D and field-testing before manufacturing and inclusion in the product line. We are passionate supporters of firearms ownership, individual liberties, and the American way of life.

# R&D

The name says it all; suppressors should be quiet, and our products are some of the quietest you can find. Don't believe us?

We'll prove it.

All our sound testing is performed using the industry gold standard Bruel & Kjaer LAN-XI which is a modular data acquisition system and analyzer that delivers unrivalled dynamic sound range.

This state-of-the-art testing system exceeds MIL-STD-1474D & E providing confidence to the end user that we strive to research, develop, and deliver the highest performing products with the most accurate test data.

# UNIVERSAL SUPPRESSORS

A man and a woman are standing side-by-side against a light-colored, vertically-ribbed background. The man, on the left, is wearing a blue and tan plaid shirt and blue jeans. He is holding a black AR-15 style rifle with a suppressor attached to the barrel. The woman, on the right, is wearing a black long-sleeved shirt and maroon leggings. She is holding a black handgun with a suppressor attached to the barrel. Both individuals are looking down at their respective firearms. The word "OPTIMUS" is overlaid in large white letters across the middle of the image, with a registered trademark symbol (®) to its upper right.

# OPTIMUS<sup>®</sup>

The OPTIMUS suppressor did what many thought was impossible; bring a suppressor to market that covers 90% of all commercially popular cartridges. Oh, and make it work on rifles and pistols. If you're looking for the best compact universal suppressor, you've found it.

A2

CAM-LOK®

TAPER MOUNT

3-LUG

EZ-LOK™

# OPTIMUS

*Years ago, Griffin Armament introduced a market-changing product, the Optimus<sup>®</sup> suppressor. This suppressor could be used on both handguns, as well as rifles, and was modular for length, modular for mounting systems, and was able to be taken apart for user maintenance. Despite the Optimus' success, Griffin has integrated several new technologies such as, ECO-FLO<sup>™</sup> baffles, the CAM-LOK<sup>®</sup> interface, and external cosmetic gripping tube geometry. These new features will ensure that the Optimus<sup>®</sup> suppressor remains at the forefront of the universal suppressor category for years to come.*

*Universal suppressors are capable for use on tilt barrel semi-automatic pistols as well as sub guns, fixed barrel firearms, and rifles covering nearly all popular commercial cartridges and firearm combinations. The Optimus<sup>®</sup> was engineered with an ideal 1.375" outside diameter which makes it well suited to pistols equipped with factory sights vs traditional rifle silencers typically being 1.5" or greater in diameter.*

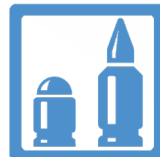

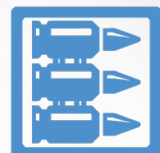

\*EZ Brake™ mount & Cam-Lok® Piston included

**LENGTH**.....7.9" Full, 6.6" Short

**Pistol** : 9mm

A photograph of two men in hunting attire standing behind a large bison in a wooded area. The man on the left wears a brown hat, a plaid jacket over a grey shirt, and olive pants. The man on the right wears a brown hat, a brown shearling jacket over a plaid shirt, and holds a black rifle with a long suppressor. The bison is lying down in the foreground. The background consists of bare trees and a light sky.

# *Bushwhacker*®

The Bushwhacker series was designed to exceed end user desires for the best large bore universal suppressors on the market. The Bushwhacker suppressors were engineered to be more compact, more durable, with higher performance, and more mounting options than any other market suppressors in this category. The Bushwhacker reigns supreme in the universal class.

CAM-LOK<sup>®</sup>

3-LUG

DUAL-LOK<sup>™</sup>

EZ-LOK<sup>™</sup>

# BUSHWHACKER

*Costly R&D resources were spent to develop the patent pending ECO-FLO™ baffle technology for the BUSHWHACKER® 46. This baffle system provides reduced back pressure, greater structural strength, higher heat resistance for enhanced durability, and longer service life, as well as 5-7db sound pressure level drops vs previous designs. This high-performance baffle technology allowed a reduction in overall length to a compact 7.75" while simultaneously increasing performance. These are typically inversely related variables in the world of suppressor R&D and represent a major win for the engineering dept.*

*The BUSHWHACKER® retains the patented RATCHET-LOK™ end cap system, which allows users to fully take apart, clean, and maintain their suppressor. Carbon and copper deposits parasitically reduce volume inside suppressors over time, which reduces their sound performance. The RATCHET-LOK™ end cap system ensures that your BUSHWHACKER® 46 can be cleaned years after ownership, which resets your suppressor to factory weight and sound performance specifications.*

**RATED FOR**....**Rifles** : .46 Cal and below  
**Pistol** : .45 Cal and below

Roughly a decade ago, we started getting a lot of feedback from the hunting community about hunters using our products on "once in a lifetime" opportunities, from elk hunts to grizzly expeditions in Alaska. We wanted to design a product we could trust our lives with and were flattered to see that our customers already had that same kind of faith in us. Consumer feedback reflected that our customers appreciated the time and effort we instill into the quality of the products. When an opportunity for an American Bison hunt in Missouri presented itself, we took our Marlin 1895 dark lever action rifle on the trip. We mounted a Leupold on it with a Griffin precision optic mount on the picatinny rail and were lucky enough to take a trophy bull. For us, it has been an honor to be included in all your hunting experiences, whether its day-to-day varmint clearing or priceless big game trophy hunts.

-Austin Green, Founder

# BUSHWHACKER

*After the success of the BUSHWHACKER® 46, Griffin sought out to provide the same great universal servicable suppressor to the 36 caliber category. Using high performance ECO-FLO™ baffles, Griffin was able to reduce overall length to a compact 7.2" while providing amazing sound performance. The light system weight of this suppressor allows for satisfactory application among a broad array of hosts, from 9mm pistols to magnum hunting rifles and everything in between. Common calibers that users can enjoy include but are not limited to 22lr, 7.62x39, 300blk, 5.56mm, 308win, 6.5CM, 300win, 338lm, .357mag, 9mm, and many more. This can is incredibly versatile and strong.*

*The BUSHWHACKER® retains the patented RATCHET-LOK™ end cap system, which allows users to fully take apart, clean, and maintain their suppressor. Carbon and copper deposits parasitically reduce volume inside suppressors over time, which reduces their sound performance. The RATCHET-LOK™ end cap system ensures that your BUSHWHACKER® 36 can be cleaned years after ownership, which resets your suppressor to factory weight and sound performance specifications.*

# WHERE ARE SUPPRESSORS LEGAL?

Knowing and exercising your rights is important to preserving your liberties. That's why we have included this map showcasing the current states where it is legal to privately own a suppressor. Even if it is legal to own in your state, double check your local rules and regulations.

Currently allowed in:

AL, AK, AZ, AR, CO, CT, FL, GA, ID, IN, IA, KS, KY, LA, ME, MD, MI, MN, MS, MO, MT, NE, NV, NH, NM, NC, ND, OH, OK, OR, PA, SC, SD, TN, TX, UT, VT, VA, WA, WV, WI, WY.

Suppressors are not legal for hunting in Vermont or Connecticut.

*Mount system into the machined unibody guaranties accuracy, durability, and speed of attachment. A patented high efficiency, low profile flash suppressor was integrated into the front of the suppressor. This feature reduces flash, providing minimal signature for the user in low light environments. For users seeking a dual role suppressor that can run on both tactical carbines and precision varmint rigs, this is the ticket.*

# PALADIN<sup>®</sup>

## HD

When the PALADIN suppressor was released, it solved a unique and unaddressed problem in suppressor tech. Engineering a hard use, lightweight, centerfire suppressor that can be disassembled for maintenance in the field by the end user.

We improved the PALADIN, with the *Heavy Duty* series, keeping its user serviceability, but greatly increasing durability, service life, and performance. We believe products should be built to last so we put our money where our mouth is.

# PALADIN

## PALADIN<sup>®</sup> 5

# LASER WELDED

Welding technology has been advancing considerably within the last decade. While TIG welding is still a necessary and ideal technology for certain applications, laser welding provides an ideal weld for tubeless suppressors.

Warpage reduction, consistent depth penetration, and precision CNC placement of the weld are benefits that allow laser welded tubeless silencers to achieve unbelievably light weight specifications while retaining the durability that you demand.

# EXPLORR®

The EXPLORR family of suppressors were designed to bring durability, accuracy, and extreme lightweight to the welded class of tubeless rifle suppressors. Griffin was the pioneer in tubeless technology for the US market over a decade ago with the introduction of the first-generation Recce suppressors. The advent of laser welding technology has provided extreme light weight capability that provides unreal weights to enable your next expedition for success, where ounces equal pounds.

# TAPER MOUNT

*There are two new versions of the EXPLORR® suppressor. The first stays true to the original with a dedicated taper-mount interface. While the mounting method stays the same, there are numerous upgrades that boost performance. The EXPLORR is now laser welded, which reduces weight but increases the overall strength. ECO-FLO™ baffle technology was integrated to enhance overall sound reduction and reduce blowback to the shooter. The serialized component is located on the rear of the assembly, allowing repair, if ever needed for the lifetime of the product. This version is slightly lower weight for users seeking the lightest weight possible.*

# UTILITY MOUNT

*The Utility Mount version of our EXPLORR® suppressor features a universal 1.375" x 24 mounting interface. This version comes with a PLAN-A™ Taper Mount adapter. It is also compatible with our Bushwhacker® booster housing allowing this versatile suppressor to be mounted using CAM-LOK®, 3-LUG, A2, and Taper Mounts.*

*Both versions feature our integrated low profile flash hider front cap. Slightly heavier than its Taper Mount cousin, the Utility Mount version is suited to those seeking to get the most versatility out of their next adventure.*

*prone issues of ratcheting systems common to the marketplace. Our mounting system was designed to provide trouble-free use. GATE-LOK™ suppressor mounts are precision ground to six ten thousandths of an inch for minimal, repeatable, and completely dependable point of impact shift. Speed and durability are hallmarks of the GATE-LOK suppressors.*

# 30SD-K

The 30SD-K is a compact .30 caliber GATE-LOK™ suppressor that includes our patented ECO-FLO™ baffles,. These baffles ensure extremely low sound signature and back pressure regardless of the cartridge used. All that housed in a billet machined cage chassis for unmatched strength.

A large, stylized blue letter 'G' is positioned at the top of a vertical column on the left side of the image.

A large, stylized blue letter 'R' is positioned second from the top of a vertical column on the left side of the image.

A large, stylized blue letter 'I' is positioned third from the top of a vertical column on the left side of the image.

A large, stylized blue letter 'E' is positioned fourth from the top of a vertical column on the left side of the image.

A large, stylized blue letter 'K' is positioned at the bottom of a vertical column on the left side of the image.

*The Griffin Armament 30SD-K was born from customer feedback, the desire for a shorter multi-cal .30 caliber GATE-LOK™ suppressor.*

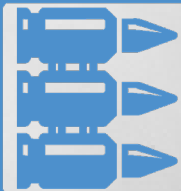

*Pursuing maximum performance, the design team incorporated Griffin Armament's patented ECO-FLO™ baffle technology into the 30SD-K. The 30SD-K offers an incredible 123dB 300BLK subsonic sound signature, 133dB on 5.56mm, and 139dB on .308. The 30SD-K offers users a wide range of platform coverage from 7.62mm, 300BLK, 6.8spc, and 5.56mm using our variety of GATE-LOK™ muzzle devices. Firearms chambered in 5.56mm are supported with this suppressor via use of any of our GATE-LOK™ mounts, in addition to compatible A2 compensators.*

# MACHINED

Our products are created using innovative machining techniques, industry leading tooling, and high-grade materials. The Griffin Shop believes in state-of-the-art CNC machining best practices to assure that efficient, accurate parts are produced. This creates value driven products for the end user.

Our mission at Griffin is to create unique, innovative products that establish market trends and solutions. Controlling our engineering and manufacturing assures these products are their best embodiment. Function, quality, performance and aesthetics are equally important in our end product.

# PISTOL SUPPRESSORS

# RESISTANCE<sup>®</sup>

The RESISTANCE was created to bring a versatile, fixed length, quality suppressor to the market at an affordable price. For users that do not need or want a modular suppressor, the RESISTANCE is the perfect option. One of the toughest on the market, the RESISTANCE fights the notion that quality pistol suppressors have to break the bank.

*an easy and satisfying end user maintenance experience. RESISTANCE<sup>®</sup> silencers are user serviceable, ensuring a long, high-performance service life. Front caps can be interchanged for smaller, .22 caliber or 9mm front caps. Flash hider front caps are also available.*

# REVOLUTION

The REVOLUTION suppressors were the first modular suppressors to hit the US market. The ability to change between short and long configurations depending on application quickly became very popular. These also boast to be the most versatile in class, supporting taper mounts, 3 lug interfaces and many rifle calibers due to their strong construction.

# INSPECTED

Consistency is key to build brand goodwill. We follow an in-depth quality control process during the entire product life cycle to assure that our customers are satisfied.

Our quality control process starts when material is verified at delivery and ends at the packaging stage with our team of trained technicians inspecting every part before shipment to our customers. Our products require strict adherence to company guidelines and a commitment to uncompromising quality control.

**GENERAL**

**PURPOSE**

**SUPPRESSORS**

A close-up, shallow depth-of-field photograph of a person in military attire holding an AR-style rifle. The person is wearing a tan tactical cap and a black watch with a yellow face. The rifle is equipped with a long, cylindrical, black suppressor. The background is a blurred forest with bare trees. The text 'GP5/7' is overlaid in large white font on the bottom left, and a descriptive paragraph is on the bottom right.

# GP5/7

Designed to provide the end user with a lightweight, durable, and affordable suppressor. Our GP series comes pre-drilled with a .125 hole for pinning to create one stamp guns. If you are looking for a dedicated, direct thread suppressor then the GPs are the boldest in the class with superior performance.

*rear 3/4" (or 19mm) wrench flats provide options for traditional use or fore-end rail integrated applications. GP suppressors are pre-drilled with a .125" hole for pinning and welding to create "one stamp guns". The GP5 can be pinned on a barrel as short as 10.5" The GP series provides quality, engineering, construction, versatility, and affordability in one.*

# GP-N

The GP-N is a dedicated 5.56mm suppressor which provides secure fitment to common A2 compensators, a familiar muzzle device to nearly all AR15 rifle owners. The GP-N was designed to bring modern suppressor technology to the A2 mountable class of silencers.

*The GP-N™ is available in two versions. Both the GP-N™ and GP-N™ LE (Law enforcement only) have the A2 collar mount machined into the tube body for ultimate strength and precision. The LE version features a flash hider end cap, a larger bore diameter, and does not require the use of shims.*

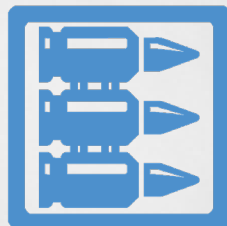

*Both models also feature our ECO-FLO™ baffles, which is the newest baffle technology from Griffin Armament. This baffle system provides reduced back pressure, greater structural strength, longer service life, and up to 9db sound pressure reduction vs traditional designs. The GP-N™ body is full H900 heat treated 17-4 stainless steel and cerakote finished. GP-N™ LE price on request.*

Engineered Silence™

Your Suppressor has been test fired  
as a final quality assurance  
measure to enhance quality control and end  
user safety.

# PRODUCT TESTING

As a company, we want to show appreciation to our customers and one way of doing that is by making sure that the product you ordered meets our high quality and safety standard.

That is why we test fire all applicable products before they are shipped and provide a test fire card certifying its quality and safety.

When your suppressor arrives at the door you know you are receiving a high-quality, factory qualified product that you can depend on.

# MOUNTING SYSTEMS

# DUAL-LOK™ Mounts

*The DUAL-LOK™ mount was engineered to provide an active locking mount with incredible rigidity and accuracy. Griffin accomplished these goals in a compact size envelope with a minimal weight penalty to the suppressor and host firearm. This is the culmination of a 20 year saga in the R&D of QD suppressor systems*

# GATE-LOK™ Mounts

*The Griffin GATE-LOK™ system was designed to provide an active locking mount with unmatched speed of attachment and durability. Griffin has been manufacturing these mounts for over ten years with slight revisions to the system along the way. These mounts will fit mil spec A2 flash hiders as well as Griffin GATE-LOK™ muzzle devices. Griffin's devices are engineered to have a more precise fitment and will exhibit better accuracy and lower POI shift than A2 "birdcage" devices on the market.*

Built to last, these mounting devices provide cutting edge performance and exacting tolerances to meet the highest demands of our customers.

# SUPERIOR PRECISION RIFLE MODULAR MOUNTS

**MSRP:** \$209.95

## FEATURES:

SPRM™<sup>2</sup> Mounts allow incorporation of AIS™ (Accessory Interface Suite) products which bring ambidextrous modularity. Our patented design splits the rings on two parallel but offset planes allowing five mounting surfaces.

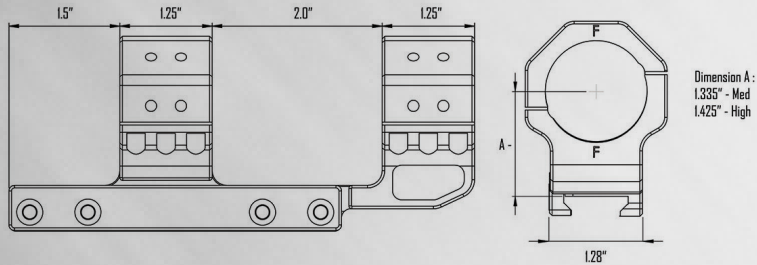

Dimension A:  
1.18" - low  
1.35" - Med  
1.425" - High

## AVAILABLE IN:

SPRM™<sup>2</sup> Mounts come in heights ranging from 1.1" up to 1.45" offered in 30mm, 34mm and 35mm. These are ideal for bolt action firearms.

# CANTILEVER MOUNTS

**MSRP:** \$209.95

## FEATURES:

SPRM™<sup>2</sup> Mounts are designed, programmed, and manufactured with Aerospace level accuracy and process control standards. Each raw workpiece is probed and set to perfect coordinates before the manufacturing process to ensure a perfect mount everytime.

## AVAILABLE IN:

Cantilever Mounts come in heights ranging from 1.335" up to 1.93" offered in 30mm, 34mm and 35mm. These are ideal for flat top rifles such as AR10's and AR15's

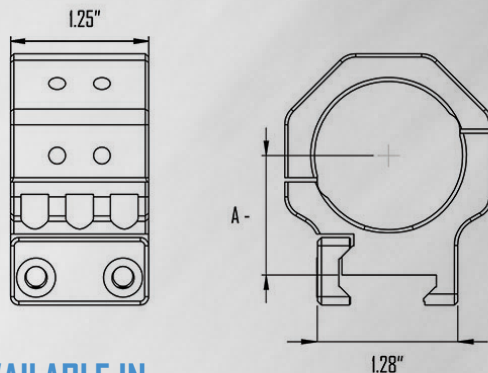

# OPTIC RINGS

MSRP: \$184.95

## FEATURES:

SPRM™<sup>2</sup> Rings allow incorporation of AIS™ products which bring ambidextrous modularity. Our patented design and manufacturing quality is carried over to this product line from our one piece mounts at a more affordable price.

Dimension A :

1.06" - X low  
1.125" - low  
1.265" - Med  
1.375" - High  
1.5" - X High

## AVAILABLE IN:

SPRM™<sup>2</sup> Rings come in heights ranging from 1.08" up to 1.5" offered in 30mm, 34mm and 35mm options. These are ideal for tradition bolt guns requiring low mounting and ejection port clearance.

# SUPPORTED OPTICS

## FOR RAPID TRANSITION PLATES

Supports Aimpoint ACRO, T1/T2, H1/H2, Comp M5, Sig Romeo, Vortex Spark, Trijicon RMR, SRD, Holosun HE507C, HS407C, HS508C, Leupold Deltapoint, J Point, Optima, Dr Optic, Meopta, Insight microdot, Burris Fastfire, Vortex Venom, and Viper, CMORE STS, RTS, STS2, and Vortex razor. Picatinny RTO™ plates are also offered. Flat mount AIS™ products support a myriad of optics as well as Wilcox RAPTAR, Simrad, and Picatinny (STANAG 4694 "NATO Accessory Rail").

## M<sup>2</sup> SIGHT DEPLOYMENT KIT

MSRP: \$199.95

Griffin M2 sights offer an industry first, patent pending, modular base plate system. Constructed from QPQ Treated 17-4 and ordnance grade steel, Griffin M2 Sights were designed to be the correct product for every backup sight application. A shooter can use these durable, low profile sights in a 12 o'clock mounted application while having the flexibility to reconfigure them to ambidextrous 45 degree angle sights using the alternate and available angle plates.

M<sup>2</sup> SIGHTS™ can be purchased in either a vertical kit configuration, an angle kit configuration, as front or rear only, or as a full deployment kit. Plates can also be purchased separately. If you find yourself eventually wanting the other hardware, it is there for you affordably and you don't need an entirely dedicated set of new sights. Stamped stainless shims are also provided to protect your picatinny rail from scratches and to evenly spread the torque load.

# SN-ACH™ SUPPRESSOR NORMALIZED AMBI CHARGING HANDLE

Engineered specifically for use with suppressed firearms our patented SN-ACH™ features a high shelf rear, bottom gas groove, and a side vent that reduces gas to the shooters face.

AR-15 MSRP: \$89.95

AR-10 MSRP: \$99.95

# AR PARTS

The **C2E™ Contour Connect End Plate** are a low cost but high-quality option for a streamlined QD endplate. Made from heat treated ordnance grade steel, this plate perfectly contours to your forged lower. **MSRP: \$17.95**

The **Ambi Selector Kit** gives customers three fully featured selector products that match the stylistic geometry of our SN-ACH™. Built around a heat-treated ordnance grade steel central selector hub, two paddles can be configured to left or right handed use. Available in 90°, 55°, and a 60-120° for M-4/M-16. **MSRP: \$39.95**

# AR-SOB AND BUFFER SPRINGS

The **AR-SOB** provides reciprocating weights which dampen recoil and provide a smoother shooting carbine. Buffers are one of the more overlooked components but can reduce mechanical and critical failures. **MSRP: \$54.95**

The **BUFFER SPRINGS** are manufactured from 17-7 stainless steel wire, offer excellent resistance to corrosion, superior fatigue properties, and exceptional rigidity and durability. **MSRP: \$8.95**

HEDP™ BARREL AND GAS

# LOW-PRO-RIGID™ RAILS

A strong, lightweight and ergonomic rail system that features 3 sides of M-LOK® compatibility, constructed from 6061-T6 Aluminum, and weighing from 7.2oz up to 11.62oz.

**MSRP:** \$169.95-210

142

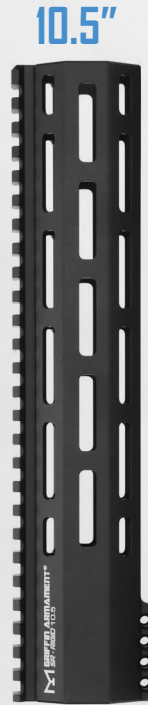

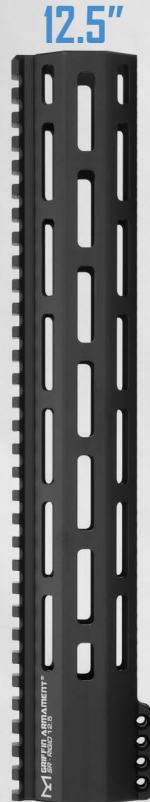

# SR-RIGID™ RAILS

## SUPPRESSOR READY

A strong, lightweight and ergonomic rail system that features 7 sides of M-LOK® compatibility, constructed from 6061-T6 Aluminum, and weighing from 7.2oz up to 11.62oz.

MSRP: \$169.95-200

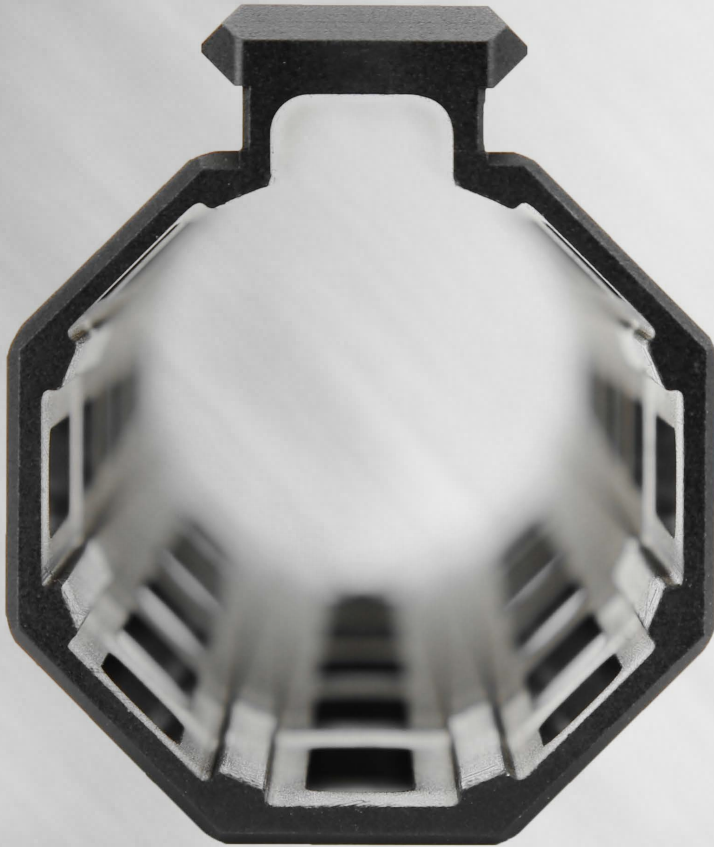

# LOW-PRO-RIGID™ RAILS

Griffin Armament® Low-Pro-RIGID™ rails are a slim, low profile, ultralight, yet rigid M-LOK rail. Design objectives of this rail were to provide a slim, ultralight rail with increased rigidity over similar weight and profile current market options. A custom extrusion provides significant internal reinforcement to reduce flex when gripping the carbine firmly in the shoulder pocket. Understanding the importance of low light targeting, these reinforcements provide rigid mounting for IR laser aimers ensuring minimal POI shift when torque is applied to fore-grip type accessories, or when loads are applied to the rail (shooting off barricades, loaded bipods etc). Internal testing showed 70% less POI shift with laser aimers versus competing “slim rails”. Carefully positioned slots in the rail allow for rapid cooling when running the carbine fast while maintaining rigidity.

## SR-RIGID™ RAILS SUPPRESSOR READY

Griffin Armament® M-LOK compatible SR-RIGID™ rails (Suppressor Ready - Rigid) allow up to 1.5" outside diameter silencers to be mounted inside the octagonal M-LOK rail. This provides suppressor aficionados a sleek, and compact overall length to AR15 type firearms. The new SR-RIGID™ rails features a close tolerance, heavy-duty, 7075 aluminum, T6, type 3 hard coat anodized finish. The barrel nut can be easily installed to 35-85 ft/lbs using the included Griffin Armors Wrench. The new slip fit clamp design is extremely user friendly and does not require any shims or special timing methods. The clamp geometry in the rear section of the rail is low profile and ergonomically pleasing even for long durations of extended carry at static security positions.

# ECS™ AND MARITIME RECEIVER EXTENSION

The ECS™ (Extreme Condition Stock) is optimized for AR firearms. Durable and aesthetically pleasing, its water evacuation ports allow for maritime operations when used in conjunction with the pictured receiver extension . Available in Black, FDE, OD Green, and Grey.

## Rail Shield™ Kit

MSRP: \$29.95

The Rail Shield™ four panel kit offers an angled grip or flat bottom panel option and two side panels that contour to the user's hands. Our four-piece kit also comes with M-LOK® hardware and is available in Black, FDE, OD Green, and Grey.

## A3 Grip

MSRP: \$15.95

# TRAINING CANS

Griffins training cans offer realistic weights and attachments for Simunitions/UTM's & Blank fire. If you're unit is considering our popular suppressors, these items facilitate training to keep your skills honed and team mates safe.

RECCE 5 SIM CAN

MSRP: \$194.95

RECCE 5 BFA CAN

MSRP: \$194.95

GP-N BFA CAN

MSRP: \$249.95

## SWITCH HITTER™

Griffin's convertible sling, the Switch Hitter™ features a metal slider and metal QD coupler. It's a durable sling that allows you to go both ways... if that's your thing.

Available in Black, Foliage and Coyote

MSRP: \$59.95

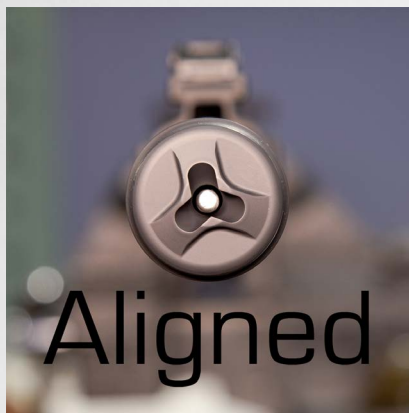

# SUPPRESSOR ALIGNMENT CHECK RODS

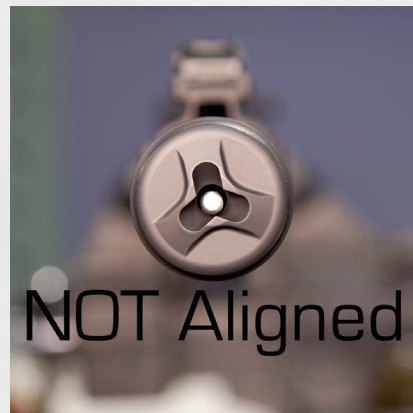

With the appropriate Griffin Armament Suppressor Alignment Check Rod, an end user or gunsmith can verify alignment of the chosen suppressor and mount with the desired host. Installation and use of this tool is simple and should prevent baffle strikes or any unexpected issues. Our rods are Swiss machined to exacting tolerances and nearly perfect straightness to ensure that your investment is safeguarded from poorly threaded barrels or improper instillation.

Perfect Alignment  
Rod is perfectly centered in the  
bore

Acceptable Alignment  
Rod isn't centered but does not  
touch suppressor

Poor Alignment  
Rod touches the suppressor
