This is a program that helps you customize the sound output of any song on your computer until you get the preferred sound you want. It comes with a very beautiful interface that is very easy to use in customizing any song on your computer. It has a set of equalizer bands that can be set to any frequency for you to achieve the desired result. Boost bark or trebleYou can loseless increase the volume or just frighten the bark or fright. It has custom presets so you can apply different settings and tests with a few clicks. You can change uninhibited layers, med and high frequencies to the point when you obtain the sound you are looking for. To abstain from spending a similarly extensive degree of time preparing an alternative melody, the program empowers you to save all the equalizer courses of action as presets you will then be able to apply when you consider that they fit. Another interesting feature that this program has is the ability to convert audio files, you can be given the luxury of transforming a whole directory of songs and it also supports a wide range of audio formats. It is part of other category of sound tools and is licensed as shareware for Windows 32-bit and 64-bit platform and can be used as a free trial until the trial will end. The Bass Treble Booster demo is available to all software users as a free download with potential limitations compared to the full version.
