and AutoUpdate . Together these 5 components work together to make Dreambox a functional piece of equipment. What differentiates the suite from similar products on the market is the fact that the suite was built with the budget in mind, so it is priced lower than others, which are very similar to this pack. Reception The DreamboxManagerSuite has received good reviews. It was hailed as the most popular Dreambox application package by many of its users. It has sold hundreds of licenses and has been named and released as one of the top 5 dreambox packages by various online communities and web sites. DreamboxManagerSuite Version 1 was released with the DreamboxManagerSuite. It is very similar to the previous version, the only difference being that it contains support for many more boxes and the updates are now done via a menu, instead of the manual updater. DreamboxManagerSuite Version 2.0 is a complete rewrite of the DreamboxManagerSuite. It was developed by the same developers as the previous version and was released in August 2011.
