

**THE FIRST INTELLIGENT HIGH TECH FITTING ROOM**

We are revolutionizing how fashion is produced and sold for good

Michele Maiello doesn't talk much.  
But he sees everything.

Our Sherlock Holmes.

"Why can't I just buy my clothes in few seconds?"

That's how oasi was born.

UNRELIABLE

MAIN COMPETITORS

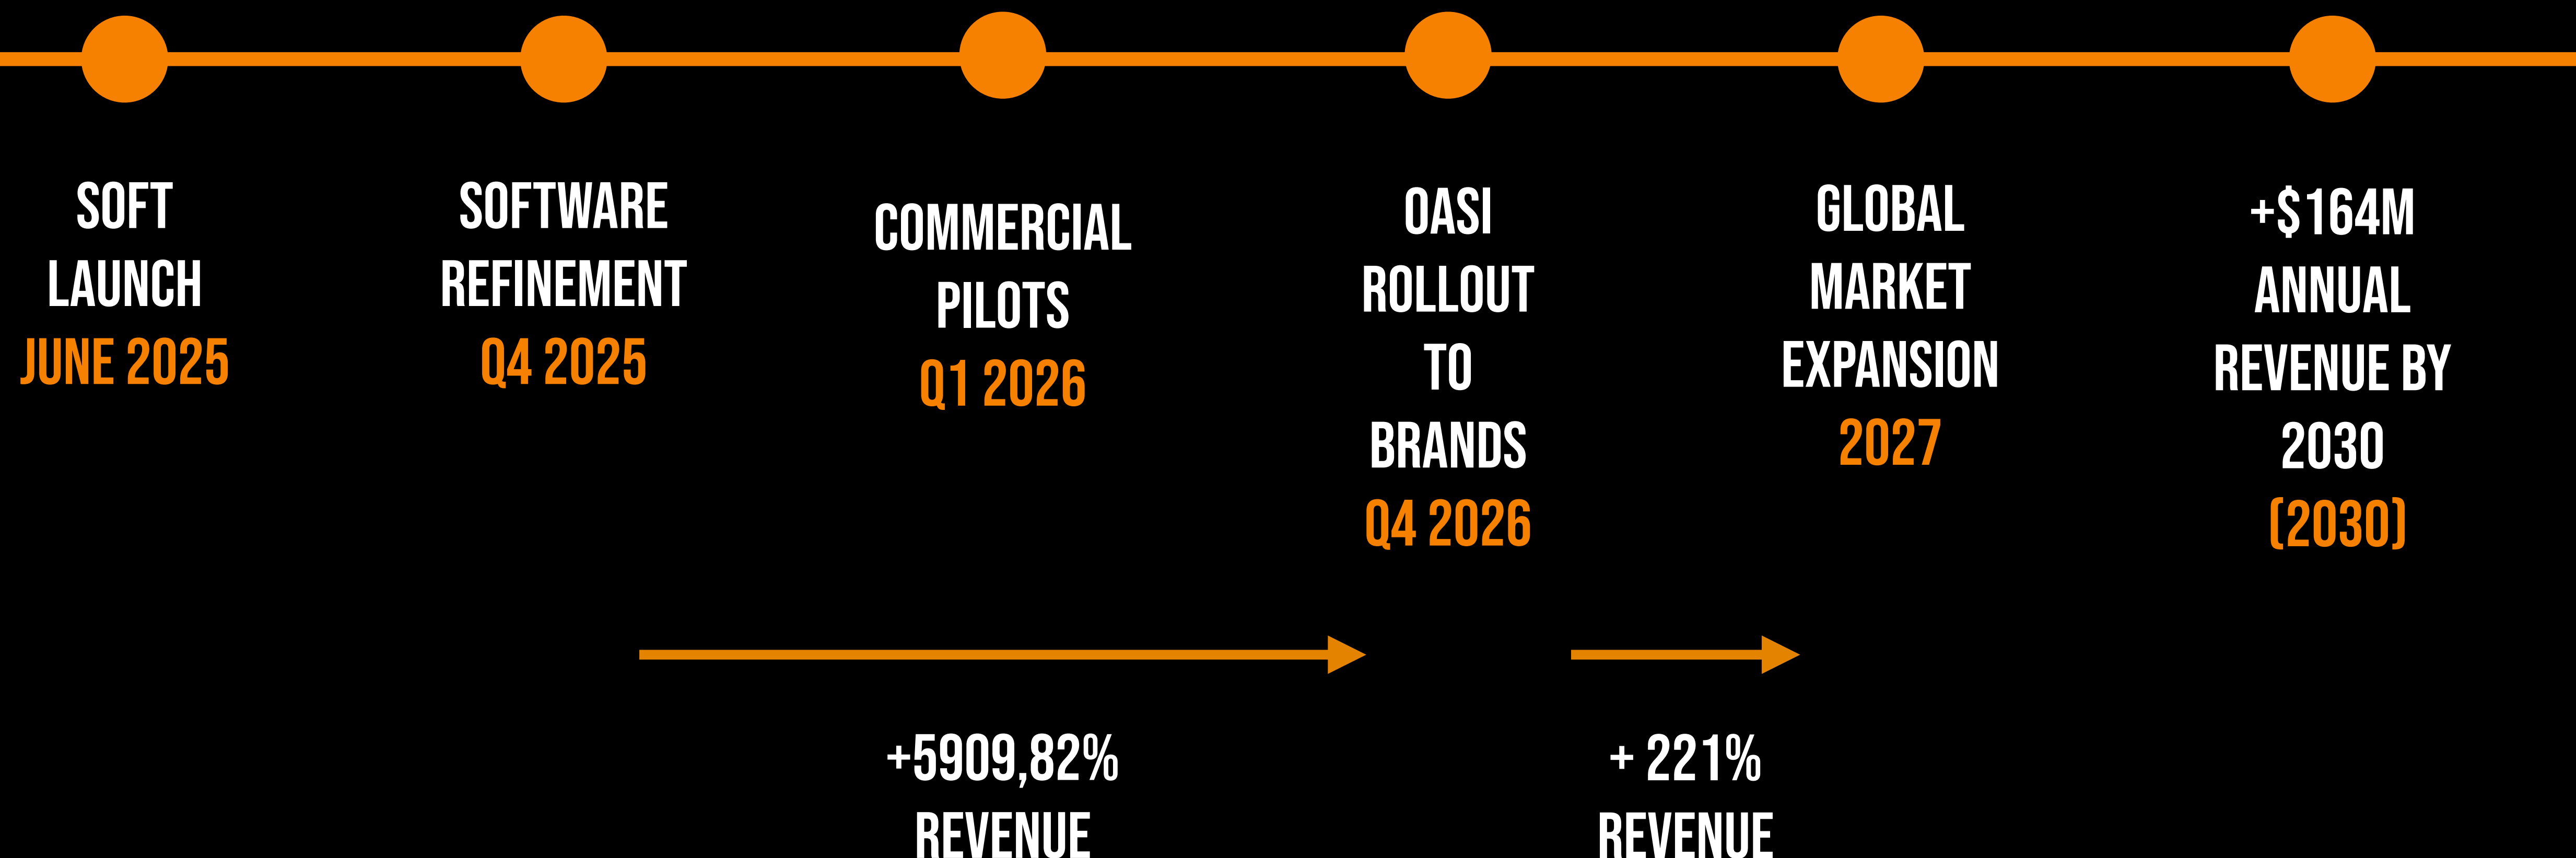

We help fashion brands and retailers sell and produce better by letting people **try on clothes virtually** on their real body, using a smart fitting room powered by 3D avatars and AI.

*Our secret sauce? A hyper-realistic body and direct link between store and production.*

OASI is where AI meets the real world a scalable system of hardware, software, and vision that transforms industries through recurring value.

# OUR VISION

We started with fashion.

But OASI was never just about clothes.

It's about reconnecting the physical and digital world through AI and 3D, with the human being at the center.

We're not building a feature.  
We're building the new interface between people and the physical world.
