

Nanjing ApexBeam Storage Equipment Co., Ltd.

**Bridge the gap between physical infrastructure and
your warehouse storage solution**

Our Journey of Growth and Innovation

Comprehensive Warehouse Storage Racks

At Nanjing ApexBeam, we offer a diverse portfolio of storage racks designed to meet every industrial need. Our racking products are engineered for efficiency, durability, and adaptability, ensuring streamlined operations for various industries.

Selective Racking

- Pallet rack
- Shelving rack
- Cantilever rack
- Multi-tier Mezzanine rack

High-Density Systems

- Drive-In Rack
- Push-Back Rack
- Shuttle Rack
- Gravitational Flow Rack

For Automation

- ASRS Rack for Stacker Crane
- ASRS Rack for 4D-Shuttle
- Rack Supported Building
- Weld type rack

Advanced Racking Systems

We offer a comprehensive range of cutting-edge racking systems. Each system is engineered to optimize storage density, improve accessibility, and enhance operational efficiency for various inventory types and handling requirements.

ASRS Racking

Maximizing vertical space utilization and enabling automated storage and retrieval of goods.

Shuttle Racking

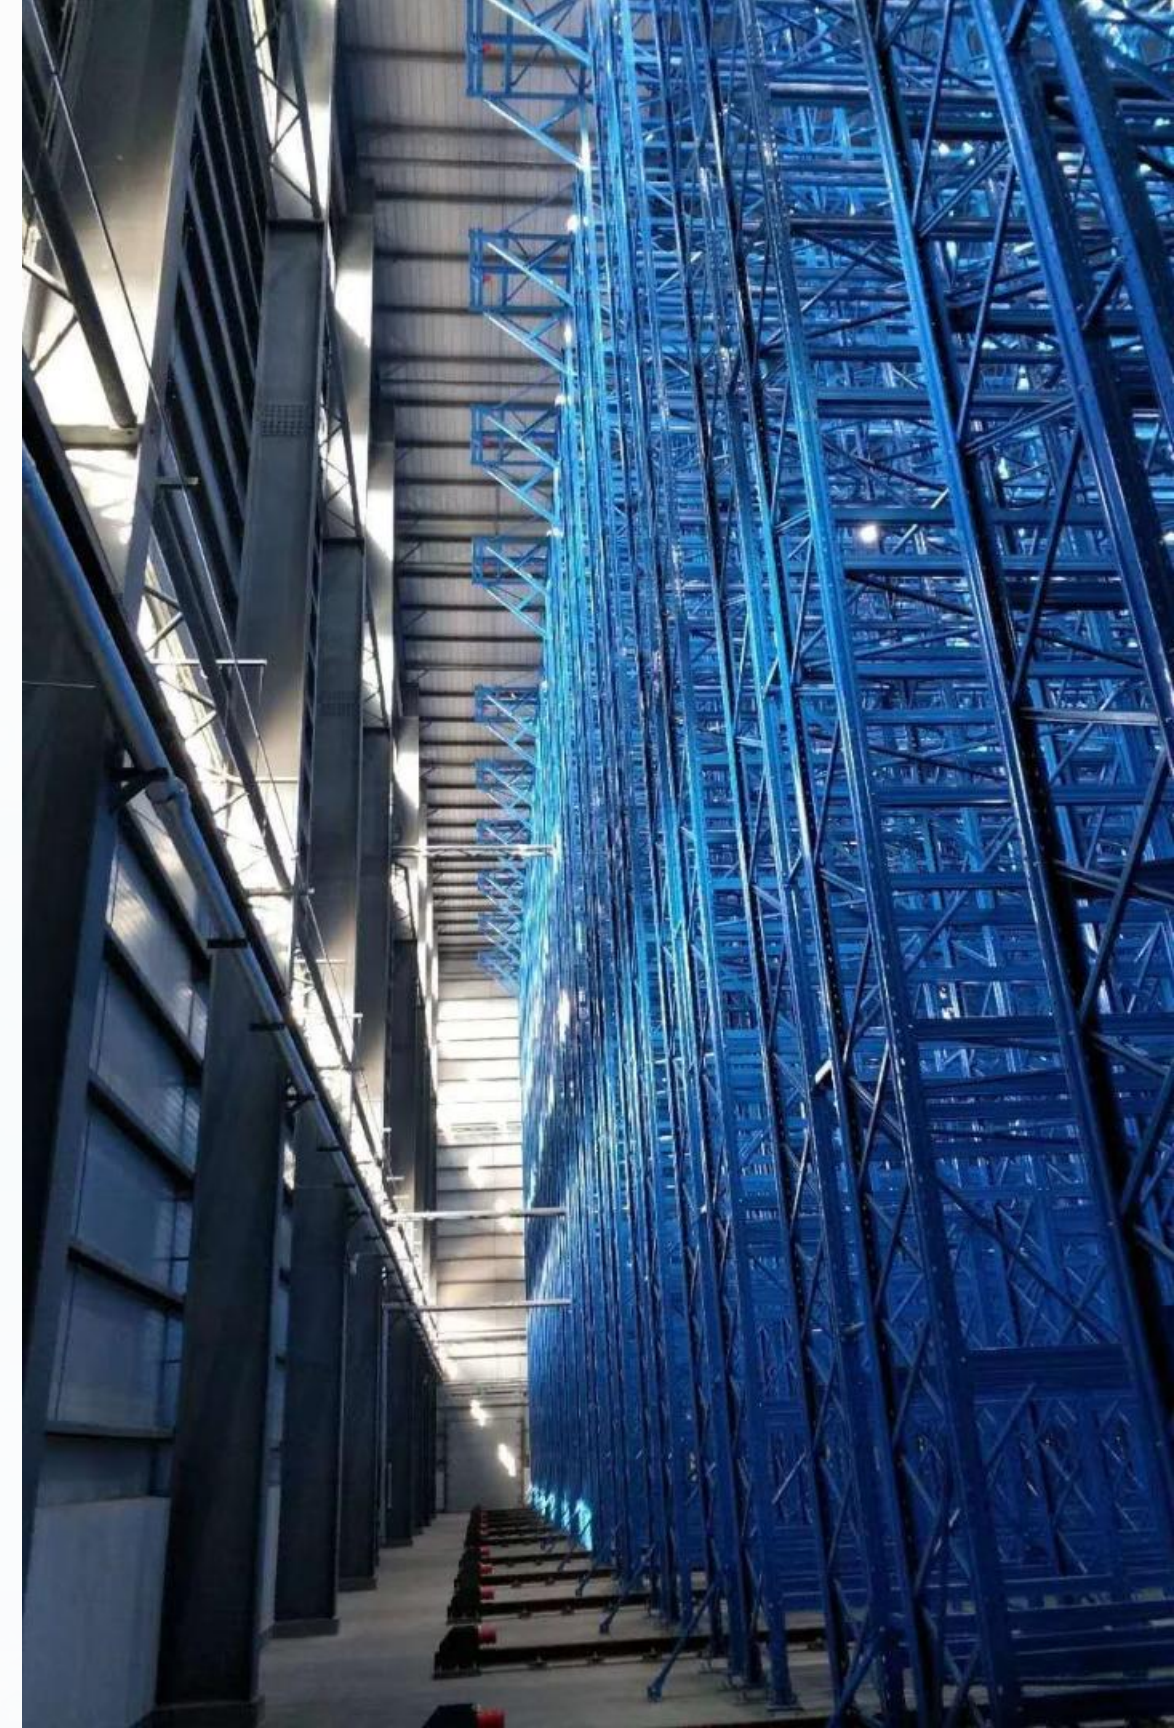

Semi-automated, high-density storage system , maximizing space utilization.

Rack Supported Mezzanine

High-density, Maximizing space utilization, easy access, usually combine with shelving rack.

Rack Supported Building

Automated, high-density storage, maximize vertical space utilization, cut cost for warehouse building.

Our Commitment to Quality Standards

ISO 9001

Rigorous quality management systems ensure consistent product excellence and customer satisfaction.

ISO 14001

Environmental management certification demonstrates our dedication to sustainable manufacturing practices.

ISO 45001

Occupational health and safety standards protect our workforce and maintain safe production environments.

These international certifications reflect our unwavering commitment to excellence. Every storage products we deliver meets the highest global standards.

Our Commitment to Excellence

Superior Quality

Clients consistently praise our robust and precisely fabricated storage racks.

Timely Deliveries

Our efficient logistics ensure projects are completed and delivered on schedule.

Seamless Management

From concept to installation, our project management is highly organized and effective.

Transparent Communication

We keep clients informed with clear, responsive communication throughout every stage.

About Our Factory

- **150 Dedicated Team**

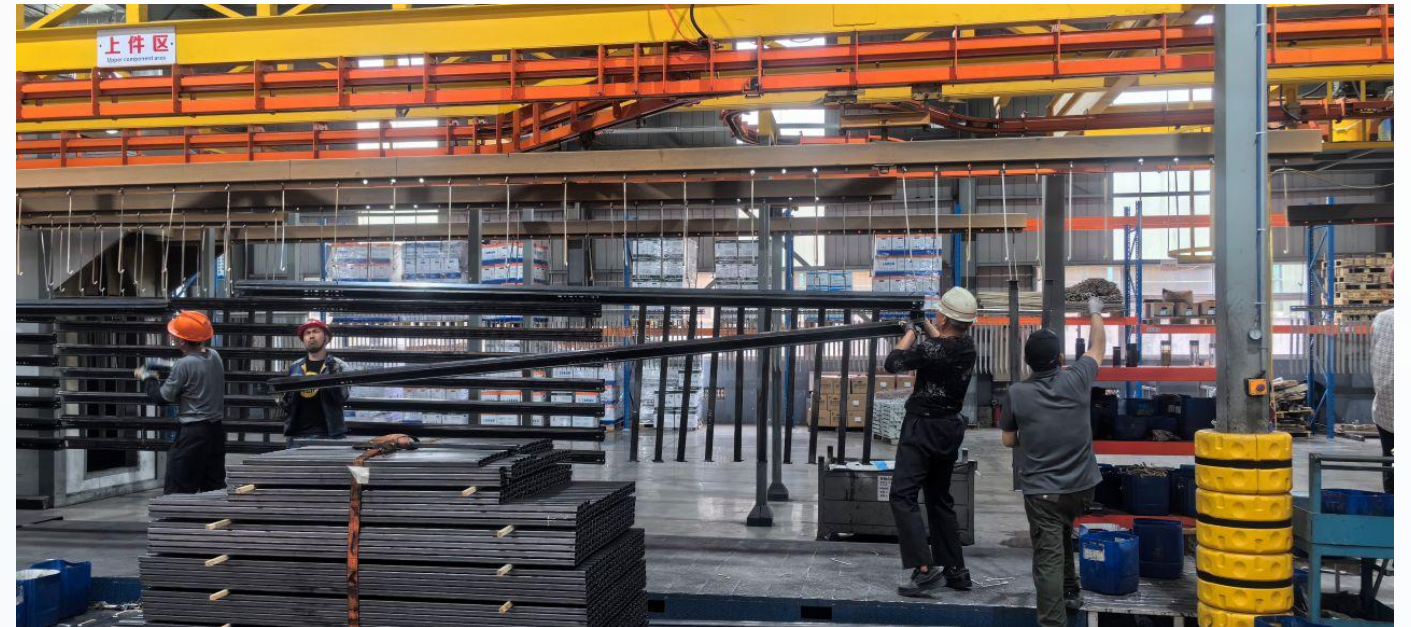

The skilled employees drive innovation and manufacturing excellence.

- **50K Sq. Meter Facility**

Expansive manufacturing footprint enables large-scale, efficient production.

- **40K Tons Annual Output**

Delivering significant capacity for high-quality steel racking products.

Located in Jiangsu Province, our facility is strategically positioned for optimal logistics.

Our Factory's Facility

Our factory's advanced manufacturing facility is strategically located. This prime position ensures efficient production and streamlined global distribution. We maintain rigorous quality standards.

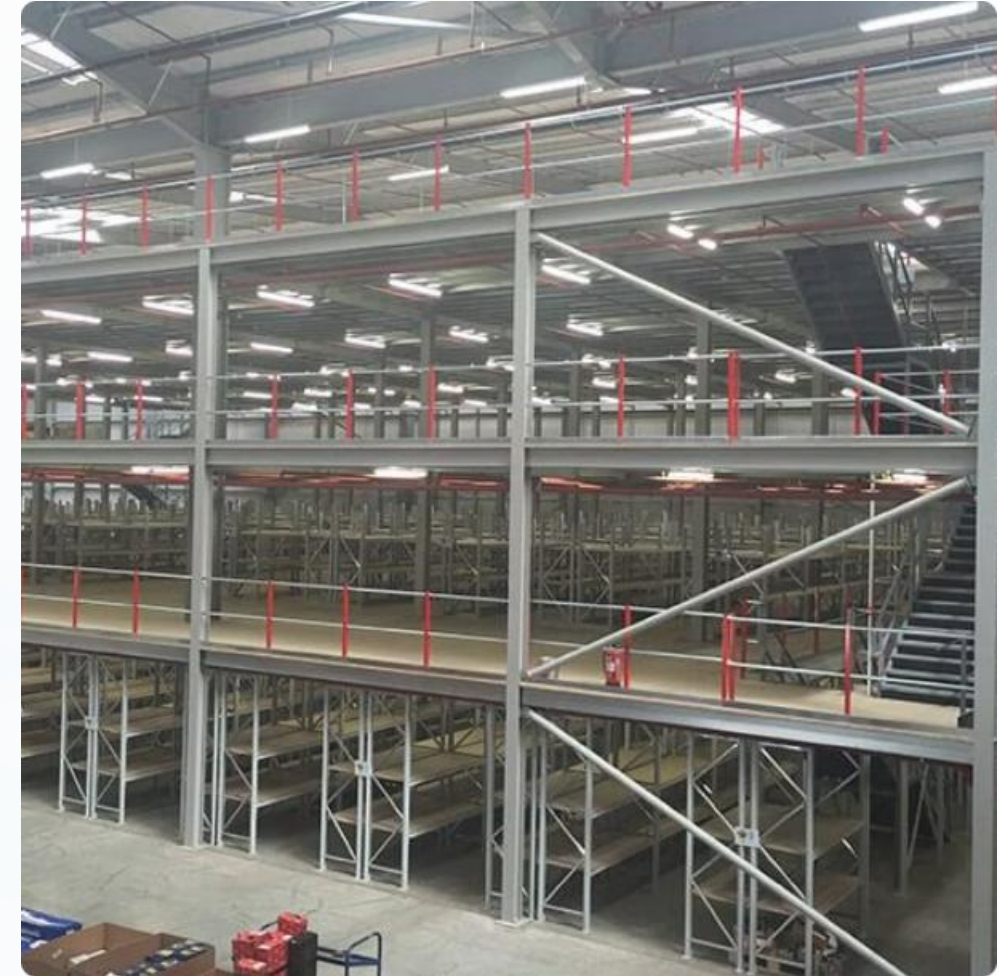

Client Success Projects

Shelving Rack

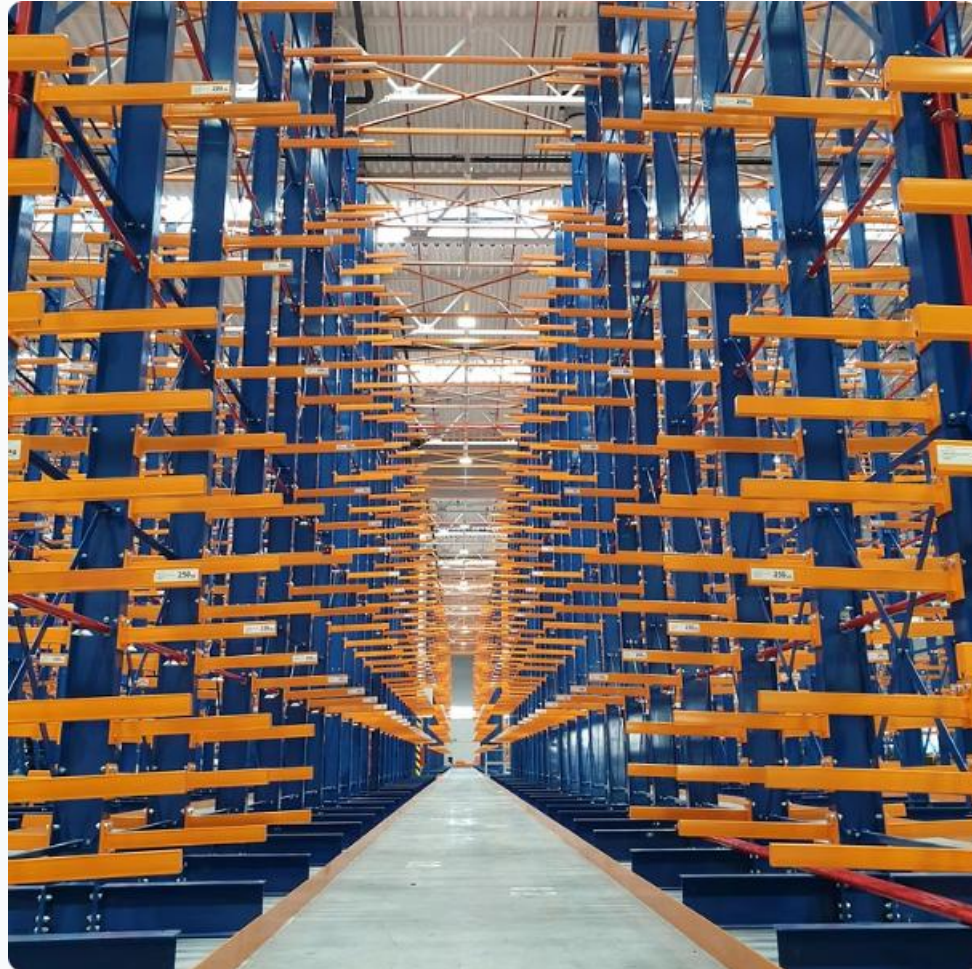

Shelving rack cases work best for light-duty or middle-duty storage usage, providing selective access to the goods stored.

Mezzanine Rack

Mezzanine rack helps use the vertical space and provides versatile usage of the space

Client Success Projects

Cantilever Rack

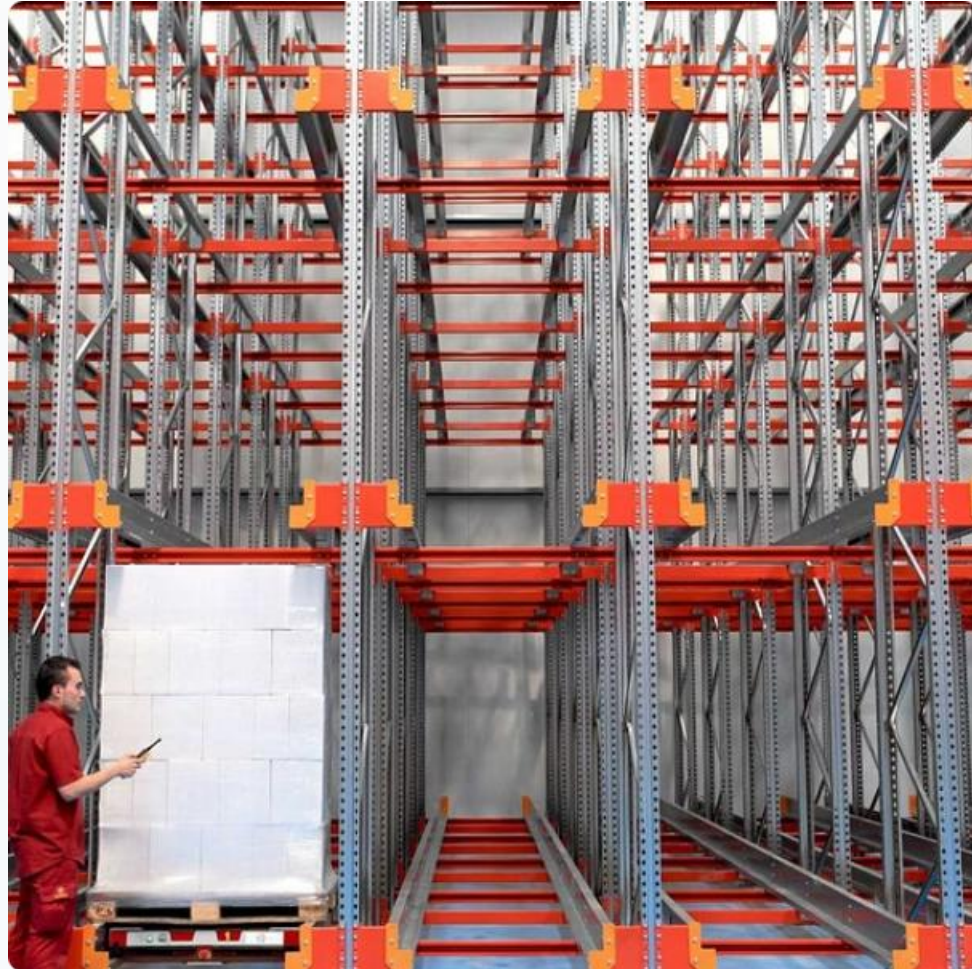

Cantilever racks make it easy to load long and heavy stuff like poles, boards, cords, etc.

Deep Lane Drive-in Racking

Drive-in racking cases maximize space for bulk goods, ideal for large quantities of uniform products.

Client Success Projects

Semi-Automated Shuttle Racking

Our shuttle racking projects deliver high-density storage and swift, automated pallet movement.

4D Shuttle Racking

4D-shuttle is now popular in Asia, replacing the shuttle-carrier automation

Client Success Projects

ASRS Precision Automation

ASRS racking solutions implement robotic systems for rapid, highly accurate storage and retrieval.

Clad Rack Structural Integration

Clad rack warehouses use the racking itself as the building structure, optimizing construction and cost.

Client Success Projects

ASRS Precision Automation

ASRS racking solutions implement robotic systems for rapid, highly accurate storage and retrieval.

Racking system for Shuttle-Carrier

An automated material handling solution that transports and stores multiple goods efficiently

Why Choose Nanjing ApexBeam?

Partnering with Nanjing ApexBeam guarantees top-tier service. Our commitment to quality, innovation, and client satisfaction makes us the ideal choice to help your innovative solutions become true. We empower your business growth.

Proven Expertise

Years of experience in advanced storage rack manufacturing.

Client-Centric

Tailored manufacturing services meeting unique business needs.

Uncompromising Quality

Durable, reliable products built to last.
