It's probably true that kids shouldn't keep expensive smartphones or tablets. They have a penchant for destroying these things. However, if you are brave, your mobile device can be a small window into the world that can entertain your kids for hours and sometimes it can even help educate them! Here are the best Android children's games. AndrobabyApp/yz children's gameFisher-Price gameFooFoo KidsGoKidsPrice: Free / Options (usually about \$1.99)Androbaby is a developer on Google Play. They did quite a few children's games. Some of them are ideal for young children. Some of the games include First Words for Babies, Baby Farm Games, Baby Flashcards, Animal Sounds, and Color Training for Babies. They have games for the elderly too, such as 2048. Most games are free with advertising. You can usually remove ads at a nominal price. Those who subscribe to Google Play Pass can get most Androbaby games for free. App's Child GamesPrice: Free/Options (usually about \$1.99-\$2.99) App quiz is another developer on Google Play. They also have a decent amount of good children's games. Some of the titles include Baby Puzzles, Baby Musical Instruments, Baby Balls, Toddler and Baby Games, Car Wash for Kids, and a few more. The games are simple, colorful and noisy. They are essentially just mobile versions of real life children's toy games. Every game is free to download. There is an advertisement if you stick to the free version. Paid versions remove ads. Fisher-Price Child GamesPrice: Free/\$2.99 EachFisher-Price is a huge name in children's entertainment. They make a lot of toys that you've probably seen before. They also have a bunch of children's games on their mobile phone. Most games range in price from free to \$2.99. This makes them easily accessible, even for those with a tighter budget. Free, usually, have no advertising either. There are games that have nursery rhymes, hide and look, counting, and sound games. Several games contain multiple games in one. They don't all work at home. However, most of them have to work very well. FooFoo KidsPrice: Free/Options (usually about \$0.99)FooFoo Kids is another app developer on Google Play with a bunch of children's games and games for older kids too. It may take some searching to find the child's appropriate games. However, they have super simple things like a balloon popping and coloring app that should require virtually no effort for kids to play. All FooFoo Kids apps are free. Some are in the app purchases, but we haven't found one that cost more than \$0.99. This is a worthy generic option for children's games. GoKidsPrice: Free / VariesGoKids is another developer who lots of children's games. Most of them are not educational. You can find some educational things thrown out as well. Their biggest games include Animal Farm, Baby piano zoo, learning form, and Ocean Bubbles Pop. Most games are free for With advertising. Usually you can pay to remove this ad. Some are for older children. It's just something to keep in mind if you run into one that's too hard for your child. GunjanApps StudiosPrice: Free/Options (usually \$1.99-\$3.99) is another developer on Google Play who makes children's games. There aren't as many as some other studios. However, they seem to be doing very well. Some of the best games include balloon pop, preschool kids, alphabet for kids, baby shapes, and Baby First Words. Some of them work very well. Others have several errors that can affect the gaming experience. We recommend checking user reviews to see what is what. Most are free to download, but the free version may have advertisements. The premium version of these children's games is usually relatively inexpensive. KidloLandPrice: Free with in-app purchases/\$4.99 per month/\$39.99 per yearKidloLand is actually one of the best mobile children's games available right now. It boasts over 300 mini-games, interactive videos, nursery rhymes, stories and more. Most things can be downloaded for offline use. In addition, no version of this app has advertising. However, it has many different ways of paying. You can buy things as individual purchases in the app. There is also a subscription service that gives you access to all of this. The app is fairly good with a lot of things to do. We understand if this subscription price seems like a bad idea, however. We're definitely not fans of it, either. However, this one offers more than some developers offer throughout its catalog, so it's worth looking at. Lively Mind is another developer on Google Play with a bunch of children's games. They now have about half a dozen titles. They cover topics such as singing songs, simple puzzles, rhymes, music, and some common things like animal sounds, fireworks, balloon popping, and more. The games are relatively simple and most kids should have no problem with them. Apps also work without too much trouble. Unfortunately, the free version contains ads. However, premium versions are inexpensive and they remove advertising. Magic Joy DoodlePrice: Free /0.99Magic Joy Doodle is a simple drawing app for kids and adults. You draw things in bright, neon colors on a black background. Then you can play the whole sequence back and re-watch what you have drawn. There are several different color variations, different doodle drawings, and you can save images to share on social media later if you want to brag. The color of randomization and Use to make great for younger children and the premium version is also pretty cheap. Talking Tom GamesPrice: Free Top PlayOutfit7 is one of the most popular developers on Google Play. They do Talking Volume series games. Some of them are their include my talking Tom, my talking Angela, and many others. Each game is a little different from what it was before. Their latest name, My Talking Hank, is actually a sim where you take care of a puppy named Hank. It's all very charming. It may be too much for some kids. However, they are free to download. Make sure your password protects your Google Play account. They have in-app purchases. If we missed any of the best children's games for Android, tell us about them in the comments! You can also click here to check out our latest Android app and game lists! Many people these days have switched to some kind of music streaming service like Pandora, Spotify, Google Play Music, or Apple Music. However, there are those of us on the left who hang on to our media collection because streaming isn't quite good enough yet. If you have your own music collection and a stock music player doesn't do it for you, then here are our picks for the best music player apps on Android! Of course, if you need apps that stream music, we have a list for that here! Those with LG V-series smartphones should probably use Poweramp, LG Stock Music Player, or UAPP. They just work better with the LG V-Series amplifier/DAC combination. Finally, here's our list of recommendations for music players on Android Auto! AIMPBlackPlayer EXJetAudio HDMediaMonkeyMusicoletNeutron PlayerPhonographPlayerPropowerSarBonus: USB Audio Player ProRead Next: The best free music download sites on the Internet that are legalAIMPPrice: FreeAIMP is a pretty powerful mobile music app. It supports the most common types of music files, including props such as FLAC, MP3, MP4 and others. You'll also get plenty of customization options, themed and other fun things like this. The app has a simple user interface, and we had no problem getting around and listening to music. It keeps it simple with a decent material design interface. We also praised its outstanding equalizer, http live streaming, and volume normalization. It's definitely a step up from most major music player apps. There is also a desktop version in case you want to kill two birds using one app. BlackPlayer EXPrice: \$3.29BlackPlayer is a simple but elegant music player that puts very little between you and your music. It works on the tab structure and you can set up tabs to only use the ones you really want. On top of that, it has equalizer, widgets, scrobbling, ID3 tag editor, ad-free, theme, and support for the most used music files. It's a delightfully simple and fantastic option for amateurs. The free version is a bit bare dice with a paid version providing a lot more features. Fortunately, the pro version is not expensive. According to our July 2019 update, the free version of BlackPlayer seems to be missing from the action. We'll check back in a few months to see if it comes back. / \$3.99 \$2.99JetAudio is a long time favorite Android user because it has enough features to be better than most, but still simple enough for everyone to use. This one features various audio enhancements that come as plugins, so you can customize your music experience a little more than usual. It also comes with an equalizer (complete with 32 presets), simple effects like bass pulse, tag editor, widgets, and even MIDI playback. Free and paid versions are almost identical. The paid version simply removes ads and adds themes. You can also use this for free if you subscribe to Google Play Pass.MediaMonkeyPrice: Free/\$2.49MediaMonkey is a bit of a dark horse in the music player app business. It has a ton of features, including organizational functions for things like audiobooks, podcasts, and the ability to sort songs by things like composer (instead of just being an artist). It also has basic things like an equalizer, tag editor, support for embedded texts, widgets, browsing folders and more. His non-nonsense approach is refreshing. This is a great option for people who just want a music player who plays music without a ton of extra stuff. It is also completely free without any in-app purchases and, due to lack of internet access, without advertising. Neutron PlayerPrice: Free trial / \$5.99Neutron Music Player is another music app that is not as popular as it probably should be. It has a 32/64-bit audio rendering engine that (according to developers) is independent of Android. The idea is that it helps the music sound better. It also has many other features, including support for more unique file types (flak, MPC, etc.), a built-in equalizer, and a host of other audiophile-specific features. It's a bit expensive, and the user interface is definitely not the best on the list. However, everything else about it is good. Free/optinal donationPhonograph is one of the few good open source applications. It positions itself as simple. Easy and easy to use. In most cases, this is true. It has a classic, simple user interface Of Material Design. It is quick to move through as needed. You can also change the subject if want, but the theme editor is not particularly powerful. Along with this, you'll get Last.fm, tag editor, playlist features, home screen widget and some other navigation features. This is a very simple and great option for those who just want to listen to their music without anything getting in the way. This app is also available without in-app purchases with Google Play Pass.PlayerPro Music PlayerPrice: Free/\$4.99PlayerPro Music Player is another lesser known music app that should be getting a little more traffic. It has a good interface that makes everything easy to use along with skins that you can download and install for more customization. You'll also get support for video playback, rare ten-team equalizer. Android Auto and Chromecast support, various sound effects, widgets, and some fun little features such as the ability to shake the phone to get it to change tracks. It even supports Hi-Fi music (up to 32-bit, 384 kHz). You can demo the app for free before forking out \$4.99.Poweramp Music PlayerPrice: Free/\$3.99Poweramp has long been one of the go-to music player apps of choice for many Android users. It has a sleek interface with themes that you can download from the Google Play Store. The interface can be too smart for its own good sometimes. Otherwise fast, efficient and powerful and themes are available if you want to this route. The app also includes a variety of playback features, including gapless playback, crossfade, and it has support for multiple types of playlists along with Android Auto support. You'll also find widgets, tag editing and other settings. This is a powerful player who seems to strike the right chord with almost everyone. Pulsar Music PlayerPrice: Free/\$1.99Pulsar is definitely one of the best music player apps available right now. Features include beautifully made Material Design, Tag Editing, Gapless Playback, Smart Playlists, Sleep Timer, and Last.fm scrobbling. Pulsar also has Chromecast support and some of the best Android Auto Support we've seen of any app on the list. It's not as feature heavy as some of the paid options, but that doesn't necessarily mean it's bad. This is a great option for those looking for something minimal, light, and good view. The pro version is inexpensive and only adds a few more features. Neither the free version nor the premium version has advertising. Bonus: USB Audio Player ProPrice: \$7.99USB Audio Player Pro is the king of its own niche. It works great as an audio player for just about anyone. It comes with UPnP support, a bit of extras like gapless playback, 10-band equalizer, and eye-catching, functional Interface. However, where it really sings is for the audiophile crowd. The app supports up to 32-bit, 394kHz native audio with support for FLAC, MSA, DSD, SACD, and a ton of other audio codecs. Codecs. It works especially well with USB DACs as well as HiRes DACs like the one in LG phones. That's good because most other music players don't do it very well. You can even stream music (via TIDAL, zobuz and Shoutcast) through this app to use your hardware. It's a bit expensive, and those without special DACs definitely don't need anything like that, but it's better for those who use such equipment. If we missed any of the best music player apps for Android, tell us about them in the comments! This is an update to an earlier article, so check out the comments for some suggestions from our readers! You can also click here to check out our latest Android app and game lists!
