.. it's very light, and it's also very fun." The game is best played with only two to four players. There are two main options: a competitive mode or a cooperative mode. The competitive mode is a racing mode where players must collect as many ragdolls as possible and race against each other to try and reach the goal first. A player who collects the most ragdolls wins. The cooperative mode has the players use different weapons, abilities, and skills to defeat their enemies, such as using the radar to destroy an enemy with a missile, using an ability that allows the player to fly, or using a devastating weapon which leaves a ragdoll in its wake. Gameplay The game is played using an analogue gamepad, with the controller held in the left hand and the stick held in the right. The controller resembles a pistol, and so is sometimes referred to as a "pistol gamepad". The game consists of several challenges, known as territories. The objective of the game is to collect as many ragdolls as possible in order

to complete a territory, and then to collect the most ragdolls in order to complete the game. The game is played across several islands. Each territory consists of a number of pre-determined objectives. The first objective is to collect all of the rags in the territory, but it is not compulsory to collect all of them. The player must then defeat a boss to achieve the second objective, collect a certain amount of rags, and then defeat another boss. The game then requires a third objective, which must be completed to complete a territory. Once a territory is complete, the player is awarded a prize and progresses to the next territory. As the territory progresses, the number of rags that the player must collect becomes more challenging. Reception Ragdolls was received with mixed reviews upon release. Many critics highlighted the game's unique selling point, but were divided on whether the game was fun to play. GameZone ranked Ragdolls among the top ten most surprising indie games of 2015. It is currently rated 8.8 out of 10 at Metacritic, indicating generally favourable reviews.
