A full course description for AP Environmental Science is available at collegeboard.org. There are 6 broad topics covered by AP Environmental Science, and they form the basis of the course: Science is a process: Science is a method of learning about the world. It constantly changes our understanding of how the world works, and it's not static. Energy conservation Basic all ecological processes: Energy cannot be created, it must come from somewhere. As it flows through the system, the useful amount of energy decreases at every turn. Earth is one interconnected system: Natural systems can change over space and time. Different biological systems have different abilities to recover from the disorder. Humans change natural systems: Humans change and affect the environment for millions of years. Technology and population growth have increased both the rate and scale of human impact on the environment. Environmental problems have a social and cultural context: Developing solutions to environmental problems requires understanding of cultural, social and economic factors. Human survival depends on the development of practices that will achieve sustainable systems: Managing common resources is essential, and a combination of development and conservation is needed. Each of these topics is covered by the AP Environmental Science Exam, in different proportions. Students taking the AP Environmental Science Exam must demonstrate knowledge of the above concepts and topics. Mastery of students is assessed by a 3-hour exam containing questions in both choice or format of the free response. The exam is divided into 2 parts, with the multiple choice section accounting for 60% and the free answer accounting for 40% of the final score between 1 and 5. Section 1: Multiple choice 90 minutes and covering multiple topics and topics. Questions organized in sets with a common theme and individually. It accounts for 60% of the final result. Points are awarded for each correct answer, and points are not deducted for incorrect or unanswered questions. Section 2: The free answer is 90 minutes long and contains 4 open questions. It accounts for 40% of the final dataset score. 1 based on, 1 document-based issue, 2 synthesis and evaluation. Students are asked to analyze the general question in psychology, using topics and concepts from the topics above. For exam dates, check out The College Board AP Calendar.
