

Level 3 Award in Health and Safety

A New Approach

Health and Safety Consultants

A 'COVID-Secure' Approach

We know the current importance of social distancing. In response, we have created a new structure for this Health and Safety qualification. We use a mixture of structured, self-directed learning, interactive webinars with the RedCat team and a formal computer-based test, invigilated by the Awarding Body, Highfield ABC.

WHO'S SUITABLE?

Supervisory staff in any workplace or sector, who are involved in the implementation of health and safety management systems,
Owners and managers of smaller businesses.
Anyone looking for an alternative to IOSH's Managing Safely.
If you're unsure, contact us.

HOW?

We send all the relevant materials prior to the first session, including the traditional coursebook. Learning is spread over four, 2- hour live webinars, delivered from our [No.8 training facilities](#). Delegates must attend all the live sessions and complete the work assigned to qualify for the assessment at the end of the course.

WHY REDCAT?

Tutors Sarah and Richard, as chartered practitioners and former inspectors, have extensive knowledge attained over 60+ years of experience. We deliver the knowledge, retention, understanding and behaviour change that supervisors require, something traditional e-learning can't guarantee.

The Practicalities

REQUIREMENTS

- A Level 2 Award in Health and Safety is beneficial
- A quiet space for study
- A laptop or personal computer with basic office programmes
- A reasonable internet connection
- An isolated space during the test
- A webcam and smartphone
- A valid form of photo identification

For the test, delegates are required to 'Live Stream' their surroundings using their smartphone to prove there are no 'cheat aids' hidden out of sight of the webcam. Answers are automatically uploaded online, once completed you'll receive the official certificate through the post.
