She Doesn't Speak. She just listens. It sounds perfect to you. Life is full of unexpected changes. At the age of 18, I borrowed the adult cartoon Tarzun: Shame in the Jungle just for fun. Perhaps for the evocative vampire on the cover, carried by a figure that looks like a penis, lying naked on a huge platter. No one could doubt that the voice actor in this cartoon would be one of my most popular actors. If there was one comedian who would make me laugh without any problems, it's Bill Murray. Like Stripes and Ghostbusters. Or the incomparable movie Groundhog Day. No matter how small he is in a feature film, he always manages to create unforgettable scenes like Zombieland. Put Murray in fear and his typical acting methods will be a completely different experience. Just look at the dead don't die and you'll know what I mean. In short, a versatile actor who takes the film to a higher level with his contributions. This year I came to the conclusion that I had never seen a movie called Lost in Translation. A film starring Sophia Coppola (daughter) starring Bill Murray and a very young Scarlett Johansson. The subject matter was far from comical, even though something a little comical lurked beneath the film's surface. A film about two individuals in the midst of an identity crisis. A movie that take up love and loneliness. Loneliness finds themselves not only because they find themselves, but also because of the fact that they are in a country that does not understand the language, culture and general way of life. Two lost souls who discover, feel and encourage each other. Indeed, I was impressed to see this clever movie. Finally, the movie that shook my socks after a long absence. An thought-provoking movie that resonates for quite some time. Yes, some movies do it to me. And 17 years after the release of this huge film, we have renewed the collaboration between Sofia Coppola and Bill Murray. On the Rocks is not as magical as Lost in Translation. But something deeply hidden has a point of contact with the latter. Again, Laura (Rashida Jones) is in the midst of a crisis. both in terms of her marriage and her writing career. her husband Dean's suspicionsWayans) become stronger simply by launching their own company and then pretending to have a lot of work, only to cover up their affair. And writing a new book is also not easy. The day she tells her father Felix (Bill Murray) about her allegations to a charismatic wealthy art dealer with an untouched flirtation habit, he throws himself heart-to-heart into the affair with complete devotion. Before Laura realizes it, she is caught up in a wild search for the truth. On the Rocks is not as depressing and depressing a story as Lost in Translation. There is more humor in it. How another mother at school tells Laura about her love affair every morning. An interesting fact about human behavior and the evolution of the relationship between men and women Felix speaks of unexpectedly every time. A wild chase in a red, noisy convertible that is not so suspicious through the streets of New York. Perhaps it's rather light, simple humor. Still, it's subtle at the same time. The chemistry between Laura and her father feels coercive and authentic. And this doesn't come as a surprise: Bill Murray nailed it once more. He demands complete attention every time he enters a photo. The way he can charm random people with his characteristic acting and his slick stories is simply amazing. And it's not just the female population that falls for his smooth speaking. The way he turns the mood of a police officer from reprimand to useful is simply sublime. On the Rocks is about marital troubles, complex father-daughter relationships, and how people get lost in the turbulent and chaotic society in which they live. It is not another masterpiece of Coppola, but certainly it is another successful cooperation between Coppola and Murray. I would like to continue working together in the future. But sofia coppola's world, which has always parted audiences between condemmnors and passionate supporters, lives in a constant short circuit of recurring themes and characters. Adorable and disgusting father figures together, husband/companion figures largely absent, Savant girl figures in a mixture of innocence and raw cunning. In On the Rocks, as if the habit were welcomed, and with her, find an immediately established invisible dialogue, Lost in Translation, in a work for which Coppola is best known. It was a recall of the loss of the protagonist in the face of something that has all the air of an existential crisis, and Bill Murray's troublesome presence, icons of sarcastic charm and confused irony, loved and celebrated by atheistic films - Wes Anderson, Coppola, Jim Jarmusch - turned into icons that polarized national attention and promoted less distrust. From murray's appearance on stage to his epilogue, it's as if the screen is being invaded by his overflowing personality, with scenes of his comic stockpile and behavioral oddities waiting to be locked into a step. It is therefore (perhaps) paradoxical to make a film that can actually make a film that represents an unprecedented session of reflection on how Felix's character actually weakens at the Rocks (she is so suggestive, given the symbiosis of the urban context at the time of the film's release). In the first part, Rocks is written with rare fluidity, and in Laura it depends entirely on the second historical parent, seeing the astonishing figures of second mobility and anxiety. A visit to an elderly woman's private collection (with rare images of the original Monet) or an impromptu song at a Mexican resort looks like a scene built with a feature by Bill Murray rather than Felix, with ghostbusters actors and a glass of whiskey instead of Skywalker and lightsaber, like a fan service awash in great Disney productions. The ideas introduced in the first part - metropolitan impatience, writer's block - remain a constantly pending thread, left by an inadequate epilogue that chooses a path of minimalism so extreme that it approaches nothingness. It's the recurring curuccio of Coppola's film: the investigation of (existential) investigations, or the emptiness of any investigation? κ The comments areRegister. Validate the entry now. On Wednesday, November 4, 2020□□□□ Lizzie Was taken to Lost in Translation and told let's not on this on the rocks. I do not know... I couldn't see anything. Really flat movies like Flat and Boring turned out to be acting; now Murray, Coppola's apparent fetish, also seems to be bothering himself to make the four skits posted to him. Critic Review On Friday, November 6, 2020, Richard Brody the New Yorker in the Rocks Sofia Coppola cares less about style than other occasions, but the relative simplicity of her films is key to that substance: instilling privileges bested by the comforts and privileges bested up by wealth.
