izumi Discounting and the DCP for Binomial Option Pricing in a Credit Based Model by PIMA Di of, How many ways a number can be divisible by 7?. This is a list of solved maths problems from a variety of different sources on the Internet. The problem text or question description may be referenced in-line or linked. You are buying a lottery ticket. The winning amount is worth a million dollars. However, the ticket cost you $50. You can either.Q: In Spark, how to count the number of rows for a particular value of a column? I have a Dataframe as below, I want to count the number of rows for a particular value of a column. for example, I want to count the number of rows for 'yes' value in the'status' column. For example, for the below code, I want to count the number of rows for 'yes' value in the'status' column, so I should get 1 as the output. A: You can use collect_set. For example: import org.apache.spark.sql.expressions.Window val countRows = Window.partitionBy("status").orderBy("id").count("*") You can then filter the countRows to include only status of yes: val countRowsAndYesStatus = countRows.where("status = 'Yes'") The result is a collection, so if you want just the size of the collection you can use count. countRowsAndYesStatus.count Q: What does this when I press "L" in a text field? This is what I am doing when I press "L" in a text field: //Started with KeyboardView -(IBAction)keyboardDone:(id)sender { [[self keyboard] resignFirstResponder]; [txtProductName resignFirstResponder]; } - (BOOL)textFieldShouldReturn:(UITextField *)textField NSString *input=textField.text; NSArray *tokens= [input componentsSeparatedByString:@"-"]; NSString *firstToken= [tokens objectAtIndex: 520fdb1ae7
