True Worship in an Age of Counterfeits

By Joseph M. Jacowitz

“Your book is a masterpiece! Pastor Jacowitz’s latest book, *True Worship in an Age of Counterfeits*, is a thorough, definitive work which deserves to be—not only read—but studied. It is the most complete work on the modern religious scene that we have evaluated. The most critical subjects are evaluated biblically and investigated historically. The modern move from worship to entertainment is carefully examined, as is the issue of money in the ministry—from the TV evangelists, the “Health and Wealth” ministries to issues in the local church. Pastor Jacowitz deals with the reality of Cessationism, the major aspects of the failures of the modern Charismatic Movement from a biblical perspective. The various subjects are too numerous to be recounted here. Each chapter is concluded with a series of questions and discussions which are based on Scripture and illustrated from history. The voices of great evangelists and preachers from the past are often added to the principles and testimony of Scripture. This book is the most thorough we have studied—carefully based on Scripture and at times an exegesis of the text. Again, this is a detailed and thorough work which deserves to be studied.”
