2014 ios 8 do you have a cdrom or a usb drive usb drive which should I use? i got my ipod touch so i would use that usb should be ok JuJuBee, The desktop has a install not a live run. I do not see a DVD on the boot list JuJuBee, Run the graphic desk top recovery and run that Was that for me? no No other user has the same problem. JuJuBee, Not sure on what you are up to here, but what does fdisk -l show? look at this guys check the post that isnt a spam JuJuBee, Take it easy a bit. oops !recovery To rescue a broken system, boot the alternate install CD and select "Rescue a broken system" this is after the crash JuJuBee, That is not a good situation, to run the cd at all you are running a broken setup. Ok, so what can I do? I have used cd before without problems... JuJuBee, Those two lines that were pasted can't be valid, can you boot a live cd? I am at the ubuntu boot menu Do I select "try ubuntu" or "install"? JuJuBee, Hold the shift at boot to get the grub menu Yes, I see a list of devices. Which one to I 520fdb1ae?
