Great books! We have been reading these to our first grader as bedtime chapter books for over a year now. She is currently reading in the middle/end of the 2nd world. I'm not sure she could read these on her own yet (I tend to think the length/complexity can be a little daunting), but she's been loving to have us read them to her. Because it has taken a lot to search for me to find out exactly which books are in each set (at this point they are not all listed here individually), I thought I would try to save some other trouble: It looks (based on publishing dates) that Fairy Dust and Quest for the Egg (Disney Fairies) start this series. It is NOT included in any of the box sets. I know that references to this book are mentioned in at least some of the books in the box sets. Tales From Pixie Hollow 4 copy Box Set:The Trouble with TinkVidia and the Fairy CrownBeck and the Great Berry BattleLily's Pesky Plant Tales From Pixie Hollow 2 :Rani and the Mermaid LagoonFira and the Full MoonA Masterpiece for BessPrilla and the Butterfly LieDD Seems that Fairy Haven and the Quest for the Wand fits between box set #2 and box set #3, at least based on publication dates. I don't know if there are references to it in the later books, or how it really fits in the series yet - I'll try to remember to update when we've read so far!). It is also not included in any of the sets, but is separate, just like \_Fairy Dust and Quest for the Egg\_ kicking things off. To create a series or add a work to it, go to a work page. The Common Knowledge section now contains a Series field. Enter the name of the series to add the book to it. Works can belong to more than one series. In some cases, as with the Chronicles of Narnia, disagreements about order require the creation of more than one series. Tip: If the series has an order, add a number or other description to parentheses after the series title (e.g., Chronicles of Prydain (book 1)). By default, it is sorted by the number, or alphabetically if there is no number. To force a specific order, use | to share the number and description. So, (0|prequel) sorts by 0 under the label prequel. What's not a series? The series was designed to cover groups of books generally understood as such (see Wikipedia: Book series). Like many concepts in the book world, the series is a somewhat fluid and contentious notion. A good rule of thumb is that the series has a conventional name and is deliberate creations, from the author or publisher. For now, avoid forcing the problem of only lists of works that have an arbitrarily shared characteristic, such as related to a specific location. Avoid series that cross writers, unless the writers were or became aware of the series identification (eg., avoid lumping Jane Austen with her continuators). Also avoid publisher series unless the publisher has a real monopoly over the works in question. So, Dummie's guides are a variety of works. But the Loeb Classical Library is a series of editions, not of works. Lily has a talent for making things grow. So when ... Fira is a Light-talent fairy, like fist ...
