## Kelly's kindergarten games

A couple of years ago I did game-boards to go along with some cute princess-themed word-view books I found over at Kelly's Kindergarten. Print both pages of the Cinderella Ball's view words. (3rd game down) and/or words view under Sight Word Memory: Princess-easy (you'll have to scroll down to the 15th game). Print the cards on the cardboard. To play, place all the cards face down in a pile. Get turns drawing a card and moving the playpiece to the next word view available on the board game. If you draw the card at midnight you lose a turn. If you draw Cinderella's glass slippers, you take two books and move twice as much. The first person who arrives at the castle with one of the words of view written there wins the game. Click here for Princess Sight Word Game: is, to, would, see, my, go, for, red - (photo left) Click here for Princess Sight Word Game - yellow, are, she, six, blue, you, green, up - (pictured right) If the little one is not in princesses, be sure to hop over to Kelly's Kindergarten as she has a wide range of early reading games to choose from with many different themes (Cars, Nemo, Snowmen, 101 Dalmatians and many more) On a different note, but still on the topic of the princess I think... My girls have been trying to draw castles lately. Here are some easy step-by-step directions for your child to draw their own castle. If your child knows the sounds of the letter, you may be prepared to learn to read. Fun file games and activities to help kids learn to read. Visit this post, Teach your child to read, for fun ideas that help your child learn to read! THANK YOU for DENICE and CHRISTIE in Cushing, Oklahoma for awesome popcorn tin! You have no idea that did not only my birthday, but my whole week! The treats inside were delicious! We finished our school year here in Baltimore and it was a very bittersweet ending for me. I'm really excited for the summer vacation, but sad to know I'm not going back to kindergarten (and my great team) in the fall. You're not going to believe how much I've packed the last few months. Some I took to third grade, but there's a lot in my basement. In fact, I have a whole wall of boxes and supplies that are just for kindergarten. I couldn't break up with them if I decided to go back to kindergarten after this year. I'm looking forward to trying something new - I've already thought about setting up a third-grade room and playing around with class design. So I promised before, I'll leave this site up and running. Once I figure out what I'm doing in third grade, I'll add a page about my new class. Thanks again for everyone who takes the time to let me how the site helped you. I can't always reply to every email (though I try), but I certainly read them! I hope everyone has a wonderful and relaxing summer! April 1, 2012: I have some sad but interesting news (and this is not an April Fools Joke!): My administration has decided that I will move to third grade for the next school year in an effort to raise test scores at our challenging school. I'm heartbroken to leave kindergarten, but so I mull over this news I'm getting excited to try third grade (and teach some of my previous students again!). I'll continue to keep Kelly's Kindergarten up and running (it has far too many visitors to take it down), so don't worry there! You might even expand it to include a new Kelly's Third 3. although it simply does not have the same ring to it (lol). My house is still a pretty busy place... I still have a full house, but there's been some changes. My adopted son is now 11 years old and growing fast. My gods who are 17 and 18 still live with me. And now we have a girl! My 18-year-old godson greeted a beautiful daughter in the world in December, so now I have an adorable little girl to spoil! March 2012: A big thank you to all visitors to this site. You made Kelly's kindergarten such a success that last month I managed to crash my hosting company's servers with all our traffic. We bypassed national sites in terms of visitors and traffic! Since then we have upgraded to a larger hosting company so that we don't have any more interruptions. Kudos to Viabit, LLC for all their services and help in recent years. I didn't know we were going to outrun you! If you haven't visited in a while you might want to check out these new additions: Themes has been updated for 2011-2012 Two new games have been added to the Dollar Store Delights Games page: Fishy Fun and Clean Out My Garden A new game has been added to the Games to make the page: Wishy Washy Game Thanks for Stopping by! Games to do \* Activities with a \* were created by Kelly Nyman-all the others are traditional games or were found online. \*\* All included black line masters were created by Kelly Nyman using Microsoft Office Clip Art Wishy Washy Game\* (blackline master--game mat) (blackline master--dice) Print a board for each child. Laminate and cut apart on the middle line. The top is the game mat for every child. Cut the pieces of the game on the bottom half. Print a die, laminate, and assemble. To play give each student a matte game and place the game pieces face up in the middle of the table. Students read a word/letter/etc and then roll die and follow the instructions on the die (take the piece shown, choose any piece - or put a piece back. If the student rolls a piece they don't need, then they just lose that turn and play on the next student. First student student Collect all 4 pieces wins the game. Various game boards \* These aren't very fancy, but my kids still enjoy them (they're from my early game-making days - I just found them on my computer). Print the board. To avoid having kids accidentally knock each other's pieces off I like to print a board game for each child and they have each move their playpiece on to their board. Give children playpieces (I only use math manipulators would be cubes or bears). You can use a regular die or use an empty cube (written on wooden math cubes with a Sharpie works well) to create a custom die. If you make a habit of dying you can include numbers and special things, would roll again +2. To play have children place their playpiece on top. Children take turns reading a word book, rolling the mold and moving. Follow the instructions on the board. Hearts Game Board Ovals Game Board Arrow Game Board Rectangle Game Board Pasta Board Cinderella's Ball\* (black line masters included--page1) (black line masters included--page2) Print one set of Cinderella cards (with words) and a set of special cards. Cut all the cards apart and place in a box. To play, maybe pass or pile. Students draw a book one at a time and read the word. If They do, they have to, they might keep it. The game moves to the next person, even if the player becomes correct. If a player gets a glass card slippers, he can take a Cinderella card from another player (plus keep the glass card slippers). The game continues until someone gets a Midnight card (watch). Then everyone counts their books. The person with the most is the winner \*\*\*\*Also see Meltdown, Rotten Bananas, and Crazy Carrots for similar games \* \* Crazy Cars \* (black line masters included - page1) (black line masters included - page2) Print a set of cars cards (with letters) and a set of special cards. Cut all the cards apart and place in a box. To play, maybe pass or pile. Students draw a book one at a time and read the word. If They do, they have to, they might keep it. The game moves to the next person, even if the player becomes correct. If a player receives a keys card, he can take a Cars card from another player (plus keep the keys card). The game continues until someone gets a card flag. Then everyone counts their books. The person with the most is the winner \*\*\*\*Also see Meltdown, Rotten Bananas, and Crazy Carrots for similar games \* \*\*\*\* Sight Word Uno --Cars Version\* (black line master included) (words of view) Print a copy of the playing cards (you may want to print 2 sets of special cards). There are 4 sets (different characters with 9 word cards each plus a set of special cards (shoot 2, wild, reverse, bounce, shoot 4 / wild). To play, make 5 cards for each player. Put the rest of the face of the face in the middle of the table. Give a book up. The first player must read the book and match either the word or the character. If he puts down the matching character (new word), he must also read the new word. Continuous play with players matching either words or characters. If a player doesn't have a game, he draws a card out of the pile. Players can play a Draw 4 or Wild Card at any time. Draw 4 means that the next person takes 2 cards instead of playing a card (as in traditional UNO). A wild card allows the player to select the character. Players must match the skip, reverse, or draw 2 cards to the current character. Keep playing until some get rid of all his cards. This is the winner. Optional: You can ask players to call UNO when they have a card left. \* You can easily change the words used in this game by deleting those words and replacing them with your own. Mr.Krabs Money Game\* (black line included) Print a board for each child and laminate. You can use a regular die or use an empty cube (written on wooden math cubes with a Sharpie works well) to create a custom die. If you make a habit of dying you can include numbers and special things, would roll again +2. You will also need a certain type of money manipulators would be 2 color counters or plastic coins and word/letter cards. To play, students take turns reading a word
