Fantastic world, lively, huge and diverse, with landscapes such as volcanoes, open fields, ice-covered mountains, tundra, swamps, rocks and more. The gameplay leaves much to be desired, very fluid game and that responds well to the teams. Incredibly detailed, with days of content, although some of the collectibles don't have a height reward. Unfortunately, the game has many downloads, most of which are considerably long, and has areas where the frame rate drops much more than is tolerable, even after an update that promised to improve the problem. Another thing that alarmed me was the English dubbing that it's awful, it's plus the fact that the characters are undeveloped and charismatic and the story is not spectacular, and we have cutscenes that are almost unbearably bad, fortunately they little and don't compromise the experience so much.
