

FIRE SAFETY TRAINING

Made Simple

The
RedCat
Partnership
Health and Safety Consultants

Build your Fire Safety training with our modular approach

Fire Extinguisher Practical; 2 hours

OBJECTIVES; for delegates to understand how they work, identify the correct fire extinguisher to use on a fire, and to demonstrate safe and correct use.

We use our Live Fire equipment; delegates will use real fire extinguishers on a real fire. It's the only way to really learn!

Fire Marshal; 1-2 hours

OBJECTIVES; for delegates to understand the duties of a fire marshal; their roles in both fire prevention, and an emergency situation. We'll need your Fire Procedures to make sure this session is relevant to your workplace. This session is a classroom-based and includes a RedCat Certificate of Completion.

Level 1 or 2 Award in Fire Safety

Highfield
Approved Centre

Convert the first two modules into a formal, nationally recognised (RQF) qualification for your staff, and bolster your due diligence.

- **Level 1** extends the course to a half-day. Suitable for staff in lower-risk premises and workplaces such as offices and shops.

- **Level 2** extends to a 1-day course, for those in medium risk premises and workplaces. 2-3 hours' pre-course work will be required before a half-day classroom session.

Both include a multi-choice examination, and a Certificate from Highfield, our accredited Awarding Organisation.

The Practicalities

CHOOSE Your Modules

Fire Extinguisher
Practical; 2 hours

Fire Marshal;
1-2 hours

Level 1 or 2 Award
in Fire Safety
