3D Insider is supported by advertising and makes money by clicks and other ways. DJI has just released Mavic Air 2. See all the specs here. You only get one chance to record the most exciting times of your life, so make sure you do it right. Using a GoPro camera is the best way to get quality footage when in motion, but the variety of models available can make choosing one difficult. That's why we've compared the basic features and features, so you'll know exactly what you're getting. Video Resolution Making Sense if GoPro is to record the most exciting moments of your life. Now don't expect to end up with exciting video footage if the camera isn't up to scratch. That's why video resolution is perhaps the most important aspect of any GoPro. We compared frames per second (fps) to each GoPro's core video formats. It is (from the lowest quality to the highest quality) 720p, 960p, 1080p, 2.7K, 4K, and even 5K. Obviously, the higher the frame rate, the better the video quality. Model5K (fps)4K (fps)2.7K (fps)1440p (fps)1080p (fps)960p (fps)720p (fps)HeroNANANANA30NA60Hero-NANANANA60NA60HeroANANA60NA60Hero3 WhiteNANANANA303060Hero3 SilverNANANANA60100120Герой 4 SessionNANANANA6060100Hero 4 SilverNA1530NA601000120Герой 4 BlackNA3060NA120120240Герой 5 SessionNA3048NA90100120Герой 5 BlackNA3060NA120120240Герой 6 BlackNA60120NA240NA60Hero 7 SilverNA30NA6060NANAHero 7 BlackNA60120120240240240Hero 8 BlackNA60120120240NANAHero 9 Black3060120120240NANAHero 6 черный, Герой 7 Черный, и Hero 8 Черный все имеют самые мощные камеры с возможностью захвата 4k на 60fps, а также 2.7K на 120fps. However, Hero 9 Black has the ability to capture 5K videos at 24 and 30 frames per second. Check the table below to see the megapixels for each model's camera. ModelМегapixelсHero5Hero-8Hero LCD8Hero 3 White5Hero 3 Silver11Hero 3 Black12Герой 4Герой 4 Silver12Герой 4 Black12Hero 5 Session10Герой 5 Black12Герой 6 Black12Hero 7 Silver10Hero 7 Black12Hero 9 Black 20Hero 8 Black121 for Hero 3 Black 1 for Hero 4 Silver 1 for Hero 4 Black 1 for Hero 5 Black 1 for Hero 6 Black No 1 for Hero 7 Black 1 for Hero 8 Black 1 for Hero 9 BlackSize/PortabilityEach GoPro Model weighs between 70g and 130g. If you're not trying to climb Everest, if you're not trying to climb Everest, these differences don't really affect anything Both 70g and 130g are both exceptionally light. However, what can make a difference is the size. You'll find that Hero 4 Sessions and Hero 5 Sessions have a different design for the rest of the models. They are basically small cubes with sizes about 37.9 mm (width) (height) at 36.1 mm (depth). This makes them about half the size of other models. If portability is paramount to you, then Hero 4 Sessions and Hero 5 Session way. 1 for Hero 4 Sessions No. 1 for Hero 5 SessionBattery PowerIt is hard to give accurate numbers when it comes to battery life, because it depends on how you use your GoPro, temperature, and battery age. However, we gave some rough figures below. They are for continuous recording of 1080p video without other features included. ModelApproxym battery life (watch)Hero1.3Hero 1.3Hero 1.3Hero 1.3Hero 1.3Hero 3 'Silver1.5Hero 3' Black1.5Hero 4 Session2Hero 4 Silver1.5Hero 4 Black1.5Hero 5 Session2Hero 5 Black2Hero 6 Black2Hero 7 Silver2Hero 7 Black1.5Hero 8 Black2Hero 9 Black2.5Be is known that the inclusion of features such as Wi-Fi, Bluetooth, and voice control can significantly reduce battery life. Re-turning GoPro and on also drains a lot of power.'1 for Hero 9 BlackTouch ScreenTouch screens are comfortable to have as they make the job much smoother. In fact, people have become so used to using them on their phone and tablets that it can be frustrating not to have one available. Add to the fact that when you're on the move, you don't want to mess with clumsy buttons. Hero, Hero 4 Silver, Hero 5 Black, Hero 6 Black, Hero 7 Silver, Hero 7 Black, and Hero 8 Black all include this feature. Voice control allows you to give GoPro commands without using your hands. The only models equipped with this feature are Hero 5 Session, Hero 5 Black, Hero 6 Black, Hero 7 Silver, Hero 7 Black, and Hero 8 Black can also reach 10m without any protective housing. They are the only models that can go into the water naked. Now there are some accessories that can allow GoPros to go even deeper. They are shown in the table below. HousingCompos with Allous for Depth Up ToSuper SuitHero 5 Black, Hero 6 Black, Hero 7 Silver, Hero 7 Black, and Hero 8 Black can also reach 10m without any protective housing. They are the only models that can go into the water naked. Hero 9 BlackPriceCheck of Amazon's approximate prices for each model below. They can be changes without notice, so it's a good idea to check for yourself. Also, note that these prices are only for new models. The recently released Hero 9 Black is obviously the most expensive at \$449. The rest of the models fluctuate a little randomly in price. However, we see the cheapest deal on Hero 3 Black at \$120. ModelOverall ScoreHero0Hero LCD0Hero 3 White0Hero 3 Silver0Hero 3 Black2Hero 4 Session2Hero 4 Silver1Hero 4 Black1Hero 5 Session3Hero 5 Black5Hero 6 Black7Hero 7 Silver5Hero 7 Black5Hero 8 Black6Hero 8 Black61st: Hero 6 Black2nd: Hero 8 Black, Hero 9 Black3rd: Hero 5 Black, Hero 7 Silver, Hero 7 BlackWhat's New With Hero 9 Black? Hero 9 Black is the first GoPro camera with a front screen. If you like taking selfies or vlogging, then this GoPro is a game changer. The build quality of the body is also quite solid. Hero 9 Black comes with a built-in mount. This is great because you no longer have to edit the action of the camera to change the battery or memory card. Hero 9 Black is also the first GoPro camera that can shoot 5K at 30 frames per second. There are some enhancements through Hypersmooth 3.0, making for smoother shots with Hero 9 Black. There is also a new Time Warp feature that can speed up long timelapses and the Horizon alignment option as well. Finally, there are new fashions such as ultra-wide, maximum lens, lightweight mod, and display mods. What is the best in general? It is clear that Hero 6 Black is the most powerful in general. It can record the best videos (which is the main function of GoPro), so we can't help but rank it on top. It also includes a number of other convenient features such as touchscreen and voice control. Of course, it has a steep price tag. Hero 9 Black looks great for vlogging and might be the best option if you have a budget of \$449. Which is the best value for money? We believe Hero 5 Black is the best value for money. It's only \$230 and has the second best camera to record video. It also has a touchscreen, voice control, and it's just all around a powerful machine. If You Can't Afford a Hero 6 then just get the next best thing for about half the price. Other factors to considerIf reviewIf is important to you, then you can consider Hero 4 Sessions or Hero 5 Sessions, however, the sound quality does not match the quality of the video. The way to resolve this discrepancy is to use a GoPro external, side-by-side microphone. GoPro security cases tend to distort the sound, and waterproof covers block access to microphone ports. The so-called self-noise that integrated microphones suffer can spoil an otherwise excellent piece of filming. Irritating it is one such hindrance, but there are all kinds of other unwanted sound intrusions. The only way to assess the difference between internal and external microphones is to test. Even an inexpensive external microphone will make the built-in microphone redundant. It makes sense, all things are considered. GoPro is the first camera, and secondly, the recording tool. An independent microphone, however, is all about sound and nothing else. That's why the results are so stark. Understanding Mic Sales Jargon there are many commonly used words found on the sales pages of external microphones. You need a basic understanding of these so that you can make more informed buying decisions. Lavalier microphone: Small and light, usually worn around the neck. Highly directional microphones are perfect for recording sound from afar: small recording devices that clip on clothes, especially lapels and necktiesWireless: stand-alone microphones that don't use cablesCondenser microphone: high-quality with diaphragm, backplate, and capacitorCardioid: Unidirectional microphone that lifts the sound in the heart shape of the heart microphones that pick up sounds like the front, and the rear of the subject Handheld microphone: self-evidentNoise: refers to unwanted sounds or static interferenceDecibel (dB): a logarithmic unit that measures the sound levelpressure: a small electronic device used to increase low signal output Max SPL: the maximum level of sound pressure the microphone can handle without distortion There are other, but the terms above, two types of microphones commonly used for GoPros, have a variety of microphones. The Lavalier Vs. Shotgun MicsWho the look you choose depends on your needs and expectations. These products have their strengths and weaknesses. I highlighted the pros and cons of each type below. The pros of the Lavalier microphone include: Can place close to the subject for a clear sound and smaller interferenceWireless microphones give you the freedom to walk and talk as you record the Cons of the Lavalier microphone include: All-directed lavalier microphones can pick up unwanted, ambient soundsWireless lavalier microphones are vulnerable to wireless microphones So the exact placement of the essentialCost microphone is more than lavalier microphonesSumming Up GoPro External MicsGoPro users with YouTube and social media channels should improve their sound. Think about where you shoot, how you shoot, and the type of microphone that best suits your audio needs. Microphones are not as exciting as the cameras they support, but they are equally important. The perfect video with a crappy sound won't make you stand out from the competition. Answer the point below to help narrow down your choices. You need high-quality audio: Make extra, high-tempo GoPro action filmsRecord events in real timeProduce outstanding podcastsreview product reviews or how-to vidsOthersPeople who take their sound (audio) seriously much more likely to attract a serious audience. Those who neglect it and focus only on the element of the image (visual) will always be in second place. Thus, the success of any video depends on its audiovisual appeal. Clear, realistic sound can compensate for the average quality of the video, but the opposite is not true. This, according to industry experts. About my 'GoPro Microphone' Guidel reviewed dozens of best-selling GoPro microphones and come up with a list of the top 10. I reviewed the real user reviews as well as personal thoughts in the review process. The first three products are my pick for the best budget, best value, and Top Pick. Compatible GoPro microphones are lower than those that are in vice order - from the lowest to the highest - for convenience. table below to go to products that interest you. GoPro Microphones Comparison TableView on on Rating: 4.6/5Full product compatibility: GoPro action cameras, desktops and Macs, Android/iPhone smartphones, DSLR cameras, video cameras and other mobile recording devices. Best Feature 1: Voice's Technology Reduces Static InterferenceBest Feature 2: Interview Accessories IncludedPlus Points: Easy to Use, Extra-Long Cable, Multiple Adapters, 2 Lapel Mics, Storage BagMinus Points: Weak Lavalier Lapel Lapel Set HighlightsThe Solid Lavalier Lapel Set is an all-targeted microphone that has exceptional value for money. The sound quality is incredible for a budget product. Voice's technology helps keep the sound clear and clean. It does this by blocking unwanted static interference, buzzing and echoing. This product is super-easy to customize and use, and it comes with an extra-long 6.5ft (2m) cable. This is in addition to the standard 4.7-foot cable. You get a 2-microphone interview set in the box and a range of useful accessories to boot. Consider this multi-purpose microphone if you're experimenting with YouTube or vlogging presentations. The entire kit comes with a smart soft storage bag to keep things organized and easy to transport. Not so good there's little to gripe about considering the price of this set of mic interviews. The clips are pretty weak, but they have to hold out if you remember their fragility. It's also an omnidirectional microphone, and it makes it easy to record with. But it can also pick up unwanted background noise in some situations. View of AmazonTech SpecsBrand: SolidPolar Pattern: OmnidirectionalCable: 79 (2 meters)Connector: 3.5 mm TRRS for TRS AdapterPower Supply: Plug-inPackage Dimensions: 6 x 6 x 1 Product Weight: 2.4 ounces. Guarantee: 90 Days guaranteeThe Pros includes 2 lapel microphones Little static intervention Interview accessories included easy-to-use extra-long cables Multiple adapters Storage pouchView on AmazonEditor Rating: 4.7/5Full Product Compatibility: GoPro HERO2, 3, 3, 4, Silver, and Black. DSLR, washless camera, PC, or any laptop w/dedicated microphone input. In addition, digital voice recorders, such as Tascam and Zoom etc. Best feature 1: Small, lightweight, plug-in-n-play micBest feature 2: High-quality materials, Plus points: Low profile, omnidirectional, increases the volume of recording, crystal clear, minus points: Not ideal if there is a lot of background noiseEDUTIGE Dual Mic ETM-001 HighlightsThe Best Value Is going to low-profile EDUTIGE Double MIC ETC It uses high-quality materials in its assembly, i.e. a metal body and a gilded 3-pole plug. They call it 'Do Everything Mic.' it's omnidirectional, which means it catches the sound from all sides. Its small and ultra-compact, but enhances the volume of recording as you believe. Check out the manufacturer's video for a sound comparison with the IN microphone and out of different devices. It's a great tool to enhance sound and and the quality of your GoPro.The Not So GoodIt's omnidirectional microphone, so it lifts the sound in all directions. This is usually ideal for GoPro users who want to capture the atmosphere of their recording. But it can also pick up some unwanted nearby audio distractions. Crowded or loud areas can compete with your voice, for example. Another con is that the product does not include the mini USB microphone adapter required for GoPro.View on AmazonTech SpecsBrand: EDUTIGEPolar Template: OmnidirectionalCable: Mini USB Adapter (Not Included) Connector: 3.5 mm 3-pole Gilded Power Supply: Plug-inPackage Dimensions: 0.8 x 0.4 x 1.2. Pros: Small and Light Design Plug-n-play microphone High-quality materials Increases the volume of recording Crystal pure sound Low profile. Discrete OmnidirectionalThe Cons Omnidirectional is not ideal for crowds or high-profile areas of Cable not includedView on AmazonEditor Rating: 4.8/5Full Product Compatibility: GoPro Hero 5 Black, 6 Black, 7 Black, GoPro Hero 3, 3 and 4, modern smartphones, and DSLR cameras (not Canon Rebel T6, or Sony A6000). Best Feature 1: Affordable, high-quality GoPro microphoneBest feature 2: Includes many AccessoryPlus points: Small and compact, cardioid, noise-free, excellent entry-level micMinus points: Dead cat windshield clutched audioEACHSHOT Professional mini-microphone HighlightsThe Top Pick is still available GoPro compatible microphone. EACHSHOT Professional Mini is a capable video cardioid product. The sound quality is a remarkable improvement over the built-in GoPro microphones. It is an all-aluminum product that boasts an excellent anti-intervention function. There are a lot of mic accessories in the box too. These include a windshield, a wind clutch, a pair of audio cables, and a carry case to boot. The small, compact design makes it the perfect travel microphone. The sound is better focused than the previous two picks due to having a cardioid microphone. This means that it picks up the sound from the front and ignores the noise from behind. And his dead cat windshield does a brilliant job of eliminating wind noise. Consider THE EACHSHOT Professional Mini-Mic if you are on the entry level but is keen to experiment with more pro-level audio. Not so GoodThe Dead Cat windshield is incredible, but its efficiency comes at a price. That is, it tends to drown out the sound a bit, although only the most critical ears will notice. However, it's light years ahead of GoPro built-in microphones even with a fluffy windshield in place. View on AmazonTech SpecsBrand: EACHSHOTPolar Pattern: Super cardioidCable: TRS For TRS CableMaximum SPL: 100 dBPower Supply: Plug-inSignal / Noise: ≥58 dBPackage Dimensions: 3.34 x 0.82 Product Weight: Oz. Pros Affordable, high-quality microphone Perfect for growth entry-level users includes a lot of accessories Small and compact design Cardioid polar pattern eliminates wind noiseCons Slightly muted audioView on AmazonEditor Rating: 4.4/5Full Product Compatibility: GoPro HERO3 and HERO3's Best Feature 1: Hands-free lapel lapel clip-on micBest feature 2: True voice playPlayPlus points: Plug-n-play, The speaker style, two of all, USB adapter, available pointminus: Short wire restraint, raises bodily noiseMovo GM100 Mic HighlightsThe Movo GM100 is a great alternative to the built-in microphone of your GoPro. This is a loud lapel lapel clip-on type of microphone-style announcer. It comes with two microphones, two sturdy ties clips, two windshields and a MINI USB adapter. It's also a plug-in-n-game. This means that you connect it to a compatible GoPro and you're good to go-no batteries required. The result is a clear sound that is free of common interference such as static and unwanted buzz. The microphone uses an omnidirectional polar pattern, so it equally picks up sounds from all sides. It has an entry-level price, but gives results that far exceed its class. The wire is not so GoodThe mic short, which limits where you can put it. It's not a major negative, but it's a bit frustrating at times. Also, this microphone is sensitive, which is good and bad. Be careful what you wear as it picks up noises from materials that rustle up when you move. View on AmazonTech SpecsBrand: MovoPolar Pattern: OmnidirectionalTransducer: Electret CapacitorSignal/ Noise Ratio: 74dB SPLCable Length: 47 (1.2 meters)Connector: 3.5 mm MalePower Supply: Plug-inPackage Dimensions: 4.5 x 3.5 x 1.1 Product Weight: 1.6 ounces. Guarantee: 1 yearThe Pros Excellent alternative GoPro mic Hands-free Lavalier clip-on microphone True Voice Play Plug-n-play Newscaster Design Two of the total quality USB adapter Available price tagThe Short Wire Limits raises bodily noiseView on AmazonEditor Rating: 4.5/5Full Product compatibility: GoPro HERO 2, 3, 3, 4, 5, 6, 7, iPad, iPhone, Android/Galaxy smartphones, DSLRs, video cameras, laptops, PC, PS4 controllers, Tascam, boost recorders, and more. Best Feature 1: Wide compatibilityBest Feature 2: Durable, lightweight, and discreet, Plus points: Plug-N-play, headquarters stereo audio, long extension cord, extras, e-book for filmmakersMinus points: TrRS needs a TRS adapter to work with the GoProsPurple Pandalier Lavalier Mic HighlightsThis mic kit lightweight, discreet and durable, making it ideal for people to go. A dead cat fluffy windshield costs half the cost alone, but there are plenty of other properties too. The purple panda lavalier's all-directed capacitor mic kit is of incredible value. It takes your GoPro away from the amateur sounding sound. And its broad compatibility means that you can same microphone with many other smart devices. It's a plug-in-n-play too, so set it up and use quickly and easily. No app downloads, charging batteries or hustle configurations The appeal-based Purple Panda's lavalier microphone boasts a clear stereo audio headquarters and thus has a broad appeal. It's perfect for goPro adventurers, but that's not all. Vloggers, amateur directors, interviewers, podcasters, and many others can benefit too. It even comes with a free Film Directing for beginners ebook. Other highlights include a strong alligator clip, a versatile stereo socket, and a slinky wind guard. Not so GoodThe microphones are the default TRRS cable that connects directly to most smartphones. For GoPro action cameras, however, you must use TRRS to the TRS adapter (included). Why does it matter? Well, it makes the use of GoPro on helmets and other mounts more clunky and untidy. There are also more points for potential failure when using adapters. Always check the compatibility of the models before you buy. View on AmazonTech SpecsBrand: Purple PandaPolar Pattern: OmnidirectionalCable Length: 58.8 (1.49 meters)Connector: Universal 3.5mm Stereo jackPower Supply: Plug-inAdapter: Mini USB/TRSPackage Dimensions: 5.5 x 1.5 x 4 Product Weight: 2.56 ounces. Guarantee: 60 daysThe Pros Wide Compatibility Durable, lightweight design modest, easy to hide Plug-n-play headquarters Stereo Long Extension Extra Accessories Free e-book for filmmakers Cons Needs TRRS for TRS adapter to work with GoPros (included) View on AmazonEditor Rating: 4.3/5Full Product compatibility: GoPro HERO3, HERO3 and HERO4 (no adapters)Best feature 1: No cable converters needed for GoProBest feature 2: Dual X/Y stereo capacitor capsulePlus points: Plug-n-play, ultra-lightweight, Effective windjammer, available pointMinus: Does not work with all GoPros, windjammer issuesSaramonic in G-Mic HighlightsSaramonic in G-Mic is versatile, go anywhere a product that can handle most recording situations. Sound quality is a massive improvement in built-in microphones. The best thing is that it connects directly to GoPro action cameras, so no adapters like with other models. The kit

includes a slinky dead cat windjammer to reduce wind noise. It is effective up to 40dB and with very small high-frequency losses. Small mic Big ResultsThe microphone sensitivity and clarity are impressive, given its price tag. This is thanks to the dual X/Y stereo capacitor capsule. It may be tiny, but it's great at results. This puppy weighs just 0.3 ounces and is less than 1 tall, so it's totally unobtrusive. It is also simple, portable and powerful for its size. The Not So GoodThis microphone does not work with GoPro HERO 5 Black or HERO 7. The sales page shows compatibility with only HERO 3s and 4. Many people still buy it for models happen by reviews. ALWAYS check the number of microphone compatibility before you buy. Fluffy windjammer does a great job, but it's bigger than it seems, and its fur can drift into the frame. It's also fragile, so treat it with caution. View AmazonTech AmazonTech SaramonicPolar Pattern: Electret Capacitor: No (USB)Connector: GoPro USBPower Supply: Plug-inSignal to Noise Ratio: 80dB SPLPackage Dimensions: 4 x 1 x 1 Product Weight: 0.42 ounces. It's also a fragile view of AmazonEditor's rating: compatibility with the 4.6/5Full product: GoPro action cameras, DSLR cameras, various video cameras, DJI Osmo stabilizer, iPhone and Android smartphones. Best Feature 1: Wide CompatibilityBest Feature 2: Cardioid Polar PatternPlus Points: Mini Shotgun Design, Shock Mountain, Super Anti-Intervention. Choice Cables, CaseMinus Points: Needs a Cage with Cold Shoes to install GoProsComica CVM-VM10II Mic HighlightsThe Comica CVM-VM10II is a mini shotgun-style video microphone with a wide range of video. It boasts a 100% aluminum cardioid directional pro-level capacitor and super anti-interference technology. Add the included windshield and wind clutch, and it's a capable microphone with ultra-clear sound. And its professional silica shock gel prevents any surgical cocktails or unwanted noise. This non-evove microphone doesn't need batteries to work. Also, you should not turn it on for the record once it is installed. The product has several different audio cables and a clip for smartphones. The Comica CVM-VM10II Mini Shotgun microphone also comes with a smart protective Czech for carrying. Not so GoodYou should buy a cage with cold shoes to use a GoPro camera with this product. View on AmazonTech SpecsBrand: ComicaPolar Template: CardioidCable: 2 x audioMax. SPL: 100dBPower Supply: Plug-inSignal to Noise Ratio: ≥58dBDynamic Range: 100dBPackage Dimensions: 7.5 x 3.9 x 2.4Product Weight: 1.2 oz. Guarantee: 12 monthsThe Wide Compatibility Low Consumption (not Battery) Accurate, lightweight cardioid polar pattern Mini Shotgun Design Shock Mountain Super Anti-Interference Feature Choice Cables Smart Holding Case includes windshield and wind clutch Cons Need a cage with cold shoes to install GoProViews on AmazonEditor Rating: 4.2/5Full smartphones, PCs, DSLR cameras, video cameras, iPhone X 8 8 Plus, and iPad tablets, etc. Best Feature 1: GoPro Adapter includedBest feature 2: Lightweight and compact wireless designPlus points: Wide compatibility, clear entry, standard camera shoes, hard-carry caseMinus points: Needs a PRO 3.5mm microphone adapter for GoPros 5 and above, the exaggerated RangeProduct Name HighlightsThe BOYA WM2G is an omnidirectional lava wireless microphone that is compact and lightweight. It includes a special The difference in sound quality between this and the Built-in GoPros microphone is day and night. This microphone is also compatible many other mobile devices (see compatibility above). The kit comes with a smart semi-hard body for carrying. BOYA's WM2G Lavalier microphone uses a standard shoe camera. There's also a lapel clip in the box for comfortable, hands-free work. And operating range up to 48 feet (15 m). Not so good It's great that the microphone kit includes a GoPro adapter because most products don't. However, anything over the GoPro 4 needs a PRO 3.5mm Mic Adapter (not included). The official accessory will probably cost twice as much as this wireless mic kit. It's bulky too. The specified operating range is too optimistic, at least for quality sound anyway. I'd say 30 feet closer to the mark. View on AmazonTech SpecsBrand: BOYAPolar Pattern: OmnidirectionalConnector: 3.5mm Mini-JackPower Supply: 1.5V DC (AA Battery)Signal to Noise Ratio: 76dB or More Battery Life: Transmitter: Approximately 3 Hours. Battery life: Receiver: approximately 3 hours. Package sizes: 6.5 x 4.7 x 2.3We of the product: 10.4 ounces. Guarantee: The one-year BOYAThe Pros GoPro adapter included a lightweight and compact design Made from durable PU plastic foam treads Wide Compatibility Pure Recording Sound Engineer Semi-Solid Portable CaseThe Cons Needs PRO 3.5mm Mic Adapter for GoPros 5 and above Exaggerated View Range on AmazonEditor's Rating: 4.4/5Full Product Compatibility: GoProPro 4. Best Feature 1: Omnidirectional mic capsuleBest feature 2: Resistant to unwanted noisePlus points: Discount, easy to install and use, durable design, waterproof, proofMinus point element: Only works with HERO 4Sennheiser MKE 2 Highlights When Sennheiser MKE 2 items first came out, it costs over \$200. Now you can choose one for \$70 or less. It's still the same exceptional product. This is cheaper due to falling demand caused by new products and technologies. It's well worth considering for those who own a GoPro HERO4 action camera. Let's look at some of its outstanding features. The first thing to notice is how easy this microphone is to install and use. It connects directly to HERO 4 with zero compromises with its airtight protection. This brings us to the next point. This microphone is as tough as they come. You can take it and use it in the wind, rain, or even underwater up to 3.2 feet (1 m) for 30 minutes. Wherever you use it, pro-class sound is always consistent. Noise-resistant innovative noise is the enemy of outdoor recording. It is a sound that arises from a strong impact on the surface. Steps are a prime example. Well, the Sennheiser MKE 2 fighting structure is a buzz too. It uses an elastic suspension covered with a replacement waterproof windshield. like this, how the microphone captures consistent, high-quality sound in any situation. Not so good, unfortunately, this excellent GoPro-approved microphone doesn't have a wide wide wide It only works with goPro HERO4 Black and HERO4 Silver Action Camera. View on AmazonTech SpecsBrand: SennheiserPolar Template: OmnidirectionalCable: N/AConnector: GoPro Audio ConnectionPower Supply: Plug-inDimensions: 5 x 3 x 2.4 (includes wind plug)Product Weight: 1.5 ounces. Pros Heavily Discounted Easy to Install and Use Crystal Clear, Dynamic Sound GoPro Approved External Microphone All-Directional Microphone Capsules Resistant to Junk Noise Rugged Design Works Underwater Element Proof Combat Structure Carry NoiseThe Cons Only Works With HERO 4 Black and Silver Action CamerasView on AmazonEditor Rating: 4.3/5Full Product Compatibility: GoPro HERO4 (Check Full With Sales) Point and Shoot Camera, Entry-level DSLRs (not Best Feature 1: Direction of Audio (Supercardioid)Best Feature 2: Rycote Lyre Shock MountPlus Points: Wide Compatibility, Reliable Design, Lightweight, Foam WindshieldMinus Points: Needs an adapter for GoPro, This is a compact, lightweight microphone on camera that delivers a clear, directional sound. . and thus reduces the ambient noise. You want a super-cardioid pickup truck for GoPro footage. or you don't. Think carefully before you buy. The microphone has a sturdy ABS design, making it ideal for outdoor use. Integrated Rycote Lyre shock montage is another heartening feature. It works by insulating the microphone from vibrations and beats. You'll also get a wind foam sleeve, but a dead cat wind clutch is bound to be more efficient (not included). Not So GoodGoPro action cameras are not listed as compatible devices in the manufacturer's offerings. However, many buyers of this microphone bought and used it with GoPro HERO3 and 4. You should get an extra adapter, however. This product is a definite improvement over the built-in microphones, but its sound is good rather than superb. For this reason, my verdict is that it is a tad overpriced, but you may disagree. View on AmazonTech SpecsBrand: RodePolar Pattern: SupercardioidCable: 3.5mm TRS PatchPower Supply: Plug-inMaximum SPL: 120dBSPLOutput: 3.5mm Mini JacketPacia Dimensions: 9.5 x 5 x 2.8 Weight Product: 2.57 ounces Guarantee: 1 yearThe Pros Directional Audio (Supercardioid) Rycote Lyre Shock Mountain Integrated Cold Boot Mountain No Batteries Needed Wide Compatibility Rugged ABS Building Compact and Light Foam windshieldThe Cons needs an adapter for GoPro Good Sound, but not exceptional overpriced inflated gopro cameras comparison table. gopro cameras comparison chart. all gopro cameras comparison. gopro comparison to other cameras. comparison between gopro cameras. gopro hero cameras comparison
