Works and looks good. Note: The speakers in the pictures are not included. Product Information For Clear, Clear Sound, Sony STR-K840P 5.1-Channel 100-Watt Receiver Dynamo, which can power audio output to multiple rooms in your home. Whether you're creating, expanding, or just improving your current home theater setup, this surround sound system brings a lot to the table. Like many Sony home theater receivers, this model can be controlled by a universal remote control and almost any standard speaker speaker to a loud volume. Featuring both stereo and 5.1-channel surround sound, it merges comfortably with new and old equipment without requiring a sophisticated manual. This makes it an ideal replacement for the old receiver model, which has ceased to function, leaving the door open for new elements to easily integrate into the future. A great addition to any home theater system, Sony's STR-K840P packs Wallop with its 100-watt power output booster and 8-ohm resistance. It can easily get the whole room crashing when paired with a capable set of speakers. Good for more than just explosions, though, you can balance the audio theatrical system with grace through controlled bass, mid and triple frequency levels and the use of DTS, Dolby Digital, and Dolby Pro Logic II decoders. The device also has AN/FM tuner bands, so you can tune in to your favorite radio broadcasts at home. For those with only a plan to play high-precision audio, rest assured that your needs are met with a full bandwidth of 10 to 50,000 Hz, providing a complete audio view from tweeters to subwoofer. On a more technical note, the entry impedance of this Sony receiver is 50 ohms. This means that it pulls the tension without the dips that some receivers struggle with, allowing it to maintain a sensitivity input of 250 mV. There are also several standard types of connectors included in this Sony STR-K840P receiver covering everything you need. It has a 5.1 channel line for easy surround sound, input and output of SPDIF to cover optical digital audio, composite video/audio outputs, 3.5-millimeter headphone jack, and subwoofer lines to make sure there's plenty of bass. This Sony STR-K840P is very customizable to your ear. There are a number of pre-programmed DSP presets to help make it quick and easy to set up for better sound. The equalizer controls can always be modified to produce excellent tones no matter how the acoustics are laid out in the room. However, for immediate installation, presets are more than capable of providing a great experience. Once the system is up and running, the built-in digital display helps make reading information about the Sony STR-K840P wind receiver while being able to use any universal remote control makes bringing a receiver into any 3D sound system a simple thing as well.
