## Cool math games bloons tower defense 4

With its touch control, the iPad is a natural fit for strategy games. Here we round out the best of them. Whether you're a fan of turn-based or real-time strategy, turret defense or rogue-like simulations, you'll find something to love in any of these great iPad games. XCOM: Enemy Within may be the first computer or console game to get a full-featured port on the iPad. This is a great news strategy for fans who know XCOM as one of the most beloved strategy games in a decade. Complex turn-based tactics offer unprecedented depth of strategy, while the backdrop of an alien invasion offers a haunting sci-fi experience. Enemy Within is an extended version of the original game, Enemy Unknown. It contains everything from the original, as well as new themes and gameplay elements. One of the most famous (and addictive) strategy games of all time, Civilization allows you to build a successful empire that braves time, history and nature. The sixth installment, Civilization VI, is the first to arrive on iOS and contains a virtually identical port to the PC version. Players familiar with previous editions of the game know what to expect: sprawling, empire-building, turn-based monstrosity, which is hard to turn away. First timers, however, can find the complexity difficult to navigate. Civilization VI comes with a hefty price tag, which is understandable, given the similarity of the PC version. But you can demo the game up to 60 times for free. Inspired by Star Trek, FTL: Faster Than Light is a rogue-like game, which means that there is a certain procedurally generated randomness in each new game. With so many different ways to play the game, you will find yourself exhausting hours of command in your starship. If you've ever wanted to know what it's like to command a redshirt, knowing full well what redshirt means, this is a game for you. First released in 2004, Rome: Total War beautifully blends a turn-based and real-time strategy of tactical control in both battles and military campaigns. Rome: Total War is one of many classics to enjoy the rebirth of iOS, losing none of the magic that made it such a great strategy game to begin with. Bouquets include classic Roman: Total War, Barbarian Invasion and Alexander variants. Each can also be purchased separately. Civilization Revolution is an attempt to bring the Civ franchise back to its roots, simplifying an otherwise massive game into something both random and hardcore strategy gamers can enjoy. Civilization Revolution has the same epic feel as PC games, with hours of content, but a simpler package. The sequel, Civilization Revolution 2, expands this idea of new technologies to discover and use entities. There's also a new way to play: scenarios that drop you right smack in the middle of simulated historical events. There is no doubt that THE VI is an ideal, super-sized version, but it also has a super sized price tag. If you are not familiar with civilization games, Civilization Revolution 2 is a great way to get your feet wet before jumping into the more complex Civilization VI. Plants vs. Zombies was a refreshing take on the tower defense strategy game and the sequel stays true to its roots. This is ideal for gamers who enjoy the addictive quality of strategy games without the need to spend hours in one session. Levels become more intense as you go along, and you will be able to play through various topics, such as the Wild West and Ancient Egypt. This is one of those rare occasions when you have never played the original Plants vs. Zombies, the sequel is the best place to start. The free game model, which in other games can swarm ads and in-app purchases, is tolerable here. The original is great, but you still have a ton of fun if you decide to play out the sequel first. Hard to pronounce but easy to get addicted to, Rymdon is perhaps the most unique game on this list. The goal is to build a space station that can counter alien attacks while studying strange monoliths. Some people may be turned off by minimalist visuals, but these visuals still create a captivating atmosphere. In many ways, rymdkapsel resembles the old Dungeon Keeper games, where you build a dungeon with different rooms and prepare your minions for the invaders. It's unfortunate that the Dungekapsel Keeper remake went too hard for in-app purchases, but for gamers who like that combination of real-time strategy and tower defense, Rymdon has a load of fun. Designed by fans of space-faring sci-fi, Star Command puts you in command of a spacecraft tasked with protecting planet Earth. You have strategic control operations and ship resources and can use redshirts to protect the ship. In addition to redshirts, there are yellow shirts that serve engineers and blue shirts who are science officers. Retro graphics and light-hearted take on the genre add to the fun experience. As you maintain the ship, you can face off with enemies who radiate onto your ship. The only downside of the game is the linear storyline, which makes playing out for the second time a little repetitive. Perhaps the best tower defense game on the iPad, TowerMadness tasks you on a critical mission to protect sheep from alien invasion. Your arsenal includes a tower that electrocutes aliens to make them run more slowly, amplifying the tower, which improves the surrounding towers and artillery tower that bombs enemies. TowerMadness features free form tower defense gameplay and a great tutorial that will quickly get you into the game without completely boring longtime tower defense nuts. For those who love a little role-playing in your strategy games, Battleheart puts you a lone knight who is able to recruit more mercenaries as the game progresses. Intuitive swipe control allows you to control the action on the screen, which makes for a unique hybrid RPG and real-time strategy experience. Modern Conflict is an intuitive one-touch control plan that allows you to send battalions of tanks and helicopters against enemy bases without working up a sweat. This is a nice solution to some of the navigation problems that face other real-time strategy games. We just wish the game had fewer paywalls and advertising. Great Little War Game has some familiar real-time strategy elements, but a turn-based framework. You're going around collecting gold and building troops like you would in a real-time game, but there's a need for a complex strategy and planning that is more familiar with turn-based games. Cartoon graphics add fun and if you succeed you can unlock new levels of strategy. Each scenario has its own goals, but most of the time you can blast enemies into smithereens. While not the best strategy game for the iPad, there's something to be said for sitting down with the classic game Risk. It's a great game for those who remember sitting at a table, moving army pieces around the board, and hoping your strategy of taking over Australia will take you up to Asia and the rest of the world. The graphics are great and the game really evokes its classic origins. 1 25 Anomaly: Warzone Earth Play NowEarth is under attack yet another wave of aliens and bad guys being caught in all major cities. In their wake, there are powerful turrets that destroy something that crosses its path. You have to build a group to search these cities, deploy troops and strategically dismantle these towers, in turn eradicate alien invasion and take back the world. Use special abilities and different items to achieve this, and you can get home for free in no time. 2 25 Babel Rising Play NowEarth is under attack yet another wave of aliens and bad guys are captured in all the major cities. In their wake, there are powerful turrets that destroy something that crosses its path. Select different towers and build an army to bring your evil plans to life. Choose 13 heroes to make your bid and completely crush over 60 enemy types as you work to take down uppity kings who are not in business scuffling with you in the first place. There are 25 stages of battle on your way through, each more exciting than the last. Who said evil doesn't pay? 14 25 Lock's Quest Play NowThe Clockwork horde is coming, and in lock, you have to keep these invaders in your modest village. Over 75 days of warfare, you have to keep the evil Lord Agony from entering your kingdom when you put traps, secure your land, and use a variety of useful allies, artifacts and buildings to ensure the bad guys can't escape the looting place, called home. Plus, it's really fun to watch what you can appreciate when there bretons enemies on screen (no slowdown!) 15 25 Metal Gear Survive Play NowAdding not technically the core entry of the Metal Gear series, this survival game cleverly contains a tower of defense elements as players explore a world covered in a mysterious toxic cloud of Dust that Area. Players must collect resources, craft materials and other objects to kickstart portal generators around the world for fast travel. Then, zombie-like creatures called the Wanderers need to complete a quick finish as you work to quash your numbers in electrifying gardens, create turrets, and otherwise put items to keep your camp safe. It's not easy, but it's exciting, especially the fun nods to the Metal Gear series here and there. 16 25 Minion Masters Play NowMinion Masters combines the best from several worlds, including hero brawl and card games, crafting a unique tower defense game. Take part in raucous 1v1 adventures, collect minions to make their own bid as they operate on their own, and work to destroy your enemy Master. Both teams fight hard until the other side is destroyed, so make sure you take the opportunity to upgrade and expand if you can, so you can always come out on top. 17 25 orc must die! 2 Play NowIt's title: Orki must die, so make sure they do. Create a camp in your cave area and then start defending your sprawling fortress against orc invaders. They come, waving guns and generally behaving like a nuisance. Cut them off in myriad spells, traps, guards and various other weapons as you fight to survive and the sheer number of ords scurrying around you are trying to make a dent. They don't do it because they have to die, and it's your job for that to happen. 18 25 PixelJunk Monsters Play NowHelp Tikiman Forest Defender as it tries to help its young offspring escape from the clutches of evil monsters making their way through their realm. It's your job to put gun towers at strategic points all over there to beef up your arsenal and keep these Tiki babies safe. You have to destroy a few dozen monsters to ensure no damage comes to them, so be prepared to really bring pain across 47 unique environments. 19 25 Plants vs Zombies Play NowTry to sit at home and live your best life, but a wave of zombies has other plans for you. Work to stop these shambling losers from getting into their yard, adding pea shooting plants and cherry bombs to blow them up before they can succeed. This quirky and cartoony adventure is more funny than scary despite the undead, but it's still a fun way to go through time because a zombie is and deserves to be defeated. 20 25 Revenge of the titans play nowIf the bizarre alien race touched the sky, humanity tried to push them back with some hired weapons. But these annoying invaders came back, and this time they brought more than their own spaceships—they're attacking land that runs with earth units to destroy earth, the moon and beyond. Push them back with the best defense units on Earth, putting towers, droids, mines and a strategic deployment of high-powered troops to take back the land once. for all. You battle your way to over 50 campaign levels and five different planets as you research new tech to keep humanity from being repelled completely. 21 of the 25 Rock of Ages Play NowRock of Ages may be one of the strangest (and weirdest-looking) tower defense games you've ever played, but it's worth experiencing. Two castles stand against each other, one belongs to you and the other belongs to your enemy. Objective? Destroy your castle with a huge boulder smile carved from your face. Build your defenses to keep your castle safe while peppering the enemy to hold as many projectiles as possible. Then you see who's actually crushed and who comes out on top. 22 25 Sanctum 2 Play NowSanctum 2 is actually a sequel to one of the first hybrid turret defense and first-person shooter titles. You can choose from four different character classes as you work to protect the cores that produce oxygen for aliens who find their existence threatening. To achieve this, putting together a load of field towers, abilities and skills and watching fireworks fly. You have to be crafty in the way you work to beat aliens, but it's all worth it in the end when the intriguing story unravels. 23 of 25 Sol Survivor Play NowSol Survivor makes you responsible for a colony where you have to hold your innocent colonists to harm. As enemies advance, you must summon orbital lasers, waves of artillery and other weapons that can join together with your turrets and other defenses to protect your people. You have to use different strategies if you want to make a difference, because this game is all about learning mistakes and having to gradually make enemies harder. 24 25 TowerMadness 2 Play NowTowerMadness has an exciting mobile title with over 70 different maps to explore as you eke out various campaigns, all focused around keeping your enemies advancing over and destroying your towers. They range from rocket launchers, plasma weapons, anestheses and even railway weapons. As 16 different alien creatures advance, you will continue slaying them, and you can even do so with friends to go! 25 25 Toy Soldiers Play NowToy Soldiers is a delightful little game that finds players competing for command over WWI toy soldiers across the trenches and battlefields of Europe. Using small tanks, soldiers, flamethrowers, and various other plastic figures in your arsenal, the idea is to get out on top as you battle your way through ornate WWI-themed scenes of realistic fights to death. Who says playing with military figures is for kids? Children?
