

**Brame Technologies**  
 Making Small Mighty

Brame means “intense passion” and here at Brame-Tech we fuse passion and technology. Brame-Tech is a provider of rugged and military grade products and Small Form Factor (SFF) systems to the avionic, military and heavy industrial markets. Brame-Tech has consolidated and integrated several best-of-breed manufactures of embedded computing boards and systems to create standards based solutions in small and rugged formats. Brame-Tech’s SFF products utilize standards based on VITA 46/65 (3U VPX), VITA-74 (VNX), PICMG’s COM Express, and PCI-SIG’s MiniPCIe and more. Products and solutions include multiple CPUs manufactured by Intel® (Xeon, i7, i5, Atom), NXP/Freescale (Power Architecture® and ARM®), AMD (G and R Series), SATA and nVME storage, Ethernet switching, video graphics (with OpenGL and OpenCL), GPGPU, discrete and analog I/O, and avionic interfaces (MIL-STD-1553, ARINC 429 and AS-5643 MIL-1394B) operating under MS-Windows, Linux, VxWorks, Integrity and Deos.

FALCON – Rugged Standards - based Hybrid COTS Computer

OSPREY – Rugged 3U VPX/ OpenVPX COTS Computer

RAPTOR - VNX COTS Computer

Lanius – ultra-SFF computer
