Hey my friend, his Frankie is here again and today I want to tell you another trick to help you archive the chat on WhatsApp. If you're among most of those who use WhatsApp, you tend to keep your talk lists neat and tidy, so the most commonly used chat rooms are readily available. Or, you can just be secretive and don't want anyone to see the topics you're dealing with. Knowing how to delete a conversation is easy, but archiving a conversation is another task. The chat archive allows you to hide the conversation and access it again later. Removing is said to permanently remove the chat, although there are ways that you can get it back (which are more painstaking than archives). For those who are not familiar with the process, below you will find how to archive conversations, unarchive them, restore them, and just view them. Start! As you archive chats with Android Like any Android instruction, the steps can vary slightly depending on the make and model of your phone or device. Archive the chat from the chat screen, click and hold the conversation you're going to archive. Select the Archive icon from the top bar. This approach archives the conversation and it is no longer visible with the rest of the chats. Unarchiving Chat Scroll at the very bottom of the chat screen. Click Archive Chats. Click and hold the saved conversation you want to unarchive. Choose the Unarchive icon from the top bar. Archive all chats Click Menu from the chat screen and access Settings. Click Chats, then Chat History and then Archive All Chats. Note: Archive chats will appear when you receive another message in this thread. This option does not get rid of the conversation itself and does not store Browse archive chats Open WhatsApp Select Chats at the top of the screen. If the chat opens directly, just hover over the Back button in the top left corner. Move to the bottom of the chat box. You can see the option for archival conversations here. If not possible, no conversation has been archived so far. Click Archive Conversations, this will open a list of all available options. Choose the one you want to see, and it will open that conversation and allow you to scroll through its contents. Archiving chats on the iPhone The next process works for all Apple iOS devices 13 or later. Archive from the chat screen, slide your finger through the conversation that you want to archive, starting from the right and swiping left. Click on the Archive option. You can also archive all the chats at once through WhatsApp settings by clicking chats, and finally selecting the Archive of All Chats. Browse archival chats from the Chats tab, scroll left at the top, and then eat down. Select Archive Chats Unarchiving Conversations will automatically appear when a new message comes through on the stream. You can manually complete this task by searching for a list by the name of a contact or message. From the Archived Chats screen, swipe the chat from right to left. Click Unarchive Alternative for unarchiving of chat rooms, click on bar search. Here, enter the contact or content from the chat that you want to delete. When you find an unwanted conversation, spend this option from right to left. Click Unarchive Remember: clicking it doesn't delete chat and doesn't back up time until iCloud. View archive chat Open WhatsApp messenger. Click on Chats at the bottom of the screen. Swipe in the middle of the screen and you'll see Archived Chats in a blue lettering at the top of the screen. If all your streams are already archived, you won't need to swipe down to access the information. Click Archive Chats. This will display the list of chats you have chosen for the archive. If nothing appears, you don't have the chats you've added to that point. Choose a conversation. Once it's open, you can view the whole conversation. You can also swipe left in the chat and send it back to the active mailbox. There are actually two ways that you can bring an archival WhatsApp stream back to your active list. First, to view the archival chat you want to recover, and swipe left (or long click on some platform) and from the menu to choose Unarchive. This choice restores the conversation again in the active list. You can do it differently by simply sending that contact or grouping a new message. After sending, the entire conversation (including the archive part) will be restored in active threads. Conclusion If you have doubts or questions, I'm here to help. Leave a comment below.
