Product offerings vary by location, but Chase Bank customers can access CDs on different terms. Single-life CDs are also available. The minimum deposit is only \$1,000. For CDs with terms of less than 24 months, the early withdrawal penalty is 1 per cent of the amount withdrawn, but no more than the amount of interest earned. For CDs with longer durations, the penalty is 2 percent of the amount withdrawn. The current construction boom underway in Berlin has stirred controversy inside and outside the city, as an international list of architects set up signature structures throughout the city. From Norman Foster's reinvigorated Reichstag to Daniel Libeskind's surprisingly brutal Jewish Museum, Berlin has not seen much of a renaissance in its built environment since the decades leading up to World War II. Now comes the entrance of Frank Gehry: the DG Bank building, worth \$200 million, which is next to the Brandenburg Gate. Due to a set of constraints imposed by the city governing development around the portal that once separated East and West Berlin, Gehry had to work in a stricter format than it is. People are surprised that I can make such a detailed rectilinear structure, he says of the building's white-white limestone packaging. In this very rational exterior, however, lies a huge atrium filled with one of Gehry's most exuberant forms to date: a wavy metal horse head that contains a two-level conference center. The new Berlin main branch of the Frankfurt-based DG Bank is as symbolic for the institution that commissioned it as the Brandenburg Gate for Berliners, says Detlef Marquardt, executive vice-president of DG Bank. Berlin is becoming one of the most important centres of culture, business and innovation in Europe, and this building demonstrates the bank's willingness to embrace these new realities. What's different about the building is that it looks so unlikely, Gehry adds. You would never know from the outside that there is this huge sculptural form on the inside. The interior of the atrium is clad in warm-toned wood and crowned with a glass tile canopy set in a stainless steel grate — a triumvirate of materials as sculptural as they are structural. People know that they need good art and music, but they don't necessarily know they need good buildings, says Gehry. It takes an enlightened customer to build something like this. And these are quite rare. JPMorgan Chase Bank is one of the big four banks in the United States. Wells Fargo, Citigroup and Bank of America.
