Stock symbol list

Abbreviation used to uniquely identify shares or cryptocurrencies traded on the stock exchange This article needs additional quotes for verification. Please help improve this article by adding quotes to trusted sources. Non-exturse materials may be challenged and disposed of. Find sources: Ticker symbol – news · newspapers · books · scholar · JSTOR (January 2013) (Learn and when to remove this template message) Stock telegraph ticker machine by Thomas Edison A ticker symbol or stock symbol is an abbreviation used to uniquely identify the stock-traded shares of a particular stock in a particular stock market. A stock symbol can consist of letters, numbers, or a combination of both. The Ticker symbol refers to symbols that have been printed on the ticker tape of a tape ticker. Interpretation of the Stock Symbols symbol are unique identifiers assigned to each security value traded on a specific market. A stock symbol can consist of letters, numbers, or a combination of both and is a way to uniquely identify that stock. The symbols were kept as short as possible to reduce the number of characters that had to be printed on the ticker tape, and to make it easier to recognize by traders and investors. The allocation of symbols and the formatting convention is specific to each stock exchange. In the U.S., for example, stock tickers are usually between 1 and 4 letters and represent the company name if possible. For example, the U.S. stock company Apple Inc. stock traded on the NASDAQ exchange has the Symbol AAPL, while the Ford stock engine company that is traded on the New York Stock Exchange has a single letter ticker F. In Europe, most exchanges use three-letter codes; for example, the Dutch consumer goods company Unilever traded on the Euronext exchange in Amsterdam has the symbol UNA. In Asia, numbers are often used as stock tickers to avoid problems for international investors when using non-Latin scripts. For example, HSBC's shares traded on the Hong Kong Stock Exchange have the ticker symbol 0005. Symbols sometimes change to reflect mergers. Before the 1999 merger with Mobil Oil, Exxon used xON's phonetic spelling as a ticker symbol. The company symbol after the merger was XOM. Symbols are sometimes reused. In the U.S., single-letter symbols are mainly sought as symbols of vanity. For example, since March 2008 Visa Inc. has used the V symbol that was previously used by Vivendi, which has been delisted and waived the symbol. [1] In order to fully qualify a stock, both the ticker and the stock exchange or country of listing must be known. On many both must be specified to identify unique security. This is often done by adding the location or exchange code to the ticker. Example Vodafone Group plc stock ticker symbol Location Reuters Instrument Code Bloomberg ticker London Stock Exchange VOD. L VOD LN LN Vod. A VOD UQ Stock Exchange in Singapore VOD.SI VOD SP Other identifiers Although stock tickers identify a security, they are generally dependent on exchange limited to stocks and may change. These limitations have led to the development of other codes in financial markets to identify securities for settlement purposes. The most common of these is the International Securities Identification Number (ISIN). [2] An ISIN uniquely identifies a security and its structure is defined in ISO 6166. Securities for which ISIN is issued include bonds, commercial paper, shares and warrants. The ISIN code is a 12-character alpha-numeric code that does not contain information that characterizes financial instruments, but serves to uniformly identify a guarantee in trading and settlement. ISIN identifies the guarantee, not the exchange (if any) it is trading; therefore, it is not a replacement for the ticker symbol. For example, Daimler AG is traded on twenty-two different stock exchanges worldwide and has prices in five different currencies; has the same ISIN on each (DE000710000), although not the same ticker symbol. ISIN cannot specify a specific transaction in this case, and another identifier, usually the three- or four-letter exchange code (such as the Market Identification Code) will have to be specified in addition to ISIN. Symbol for stock indices While usually a securities ticker identifies a value that can be traded, stock indices are also sometimes assigned a symbol, even if they generally cannot be traded. Symbols for indices are usually distinguished by adding a symbol in front of the name, would be a caret (^)[3] or a point. For example, Reuters lists the Nasdaq Composite index under the symbol . IXIC. [4] Symbols by country Australia In Australia, the Australian Securities Exchange uses the following conventions: 3 basic symbol characters with the first and third characters being alphanumeric and the second alphabetical. ETFs, ETMFs can be 3 or 4 characters long. Traded exchange warrants and exchange-traded options are 6 characters. EToS can have numbers in the sixth character. THE fourth, fifth and sixth letter extension codes D[A-Z] Deferred settlement security, temporary code typically used during a consolidation/reverse division. Used for both shares and company options. H[A-Z] Bonds/Debts F[A-Z][A-Z] Warrants traded by exchange G or G[A-Z] Convertible debt H or H[A-Z] Unsecured note I[A-Z][A-Z] Staggered Mandate LV Non-Vote or Limited Vote O or O[A-G] Option of Company P[A-Z] Preference/Interest bearing security R or R[A-Z] Company rights W[A-Z][A-Z] Warrants Exchange-trade U[A-Z][A-Z] Exchange-traded V[A-Z][A-Z] Warrants Exchange-traded Canada In Canada, the Toronto TSX Stock Exchange and TSXV use the following special codes after the ticker symbol: TSX behind the dot extensions and other special extensions A-B – share class NO, NS, NT – notes S – special American terms DB – debenture P – Capital Pool Company U, V – US funds E – PR capital dividends – preferred UN – units H – NEX market R – subscription receipts W – when issued IR – CHITs in RT rates – WT rights – warrants UK, before 1996, stock codes were known as EPC , named after the London Stock Exchange Price Information Computer (e.g. : MKS for Marks and Spencer). Following the introduction of the sequence trading platform in 1996, IICs have been renamed Tradeable Instrument Display Mnemonics (TIDM), but they are still widely referred to as IPIC. Stocks can also be identified using their SEDOL (Stock Exchange Daily Official List) or ISIN (International Securities Identification Number) number. United States In the United States, modern letter-only symbols have been developed by Standard & Poor's (S&P) to bring a national standard for investment. Previously, a single company could have many different ticker symbols as they varied between dozens of individual value markets. The term ticker refers to the noise produced by ticker machines once widely used by stock exchanges. The S&P system was subsequently standardised by the securities industry and modified as the years passed. Stock symbols for preferred stock have not been standardized. [6] Some companies use a well-known product as their ticker symbol. Belgian brewer InBev, the Budweiser beer brewer, uses BUD as a three-letter ticker for American Depository Receipts, symbolizing its top product in the United States. Its rival, the Molson Coors Brewing Company, uses a similar beer symbol, TAP. Southwest Airlines also pays tribute to its headquarters at Love Field in Dallas with its symbol LUV. Cedar Fair Entertainment Company, which operates large amusement parks in the United States, uses FUN as a symbol. Harley-Davidson uses HOG, which is slang for one of his motorcycles. Yamana Gold uses AUUY, because on the periodic table of elements, Au is the symbol of gold. Sotheby's (the famous auction house) uses the BID symbol. While most symbols come from the company name, sometimes it happens the other way around. Tricon Global, owner of KFC, Pizza Hut and Taco Bell, adopted the YUM symbol to represent its corporate mission when the company was saying pepsiCo in 1997. In 2002, the company changed its name to match its symbol, adopting the name Yum! Brands. [8] Symbols sometimes change to reflect mergers. Before the 1999 merger with Mobil Oil, Exxon used xON's phonetic spelling as a symbol The company symbol after the merger was XOM. After Hewlett-Packard merged with Compaq, the new firm took over the HPQ symbol. (Previous symbols were HWP and CPQ.) AT&T's AT&T's the symbol is simply T; consequently, the company is simply called Wall Street Phone (the T symbol is so well known that, when the company was acquired by SBC, it took the name AT&T, capitalizing on its history and keeping the desired symbol with a single letter). Some examples

of US stock symbols include: A – Agilent Technologies AAPL – Apple BRK. A - Berkshire Hathaway (Class A shares) C - Citigroup GOOG - Alphabet Inc HOG - Harley-Davidson HPQ - Hewlett-Packard INTC - Intel KO - Coca-Cola Company LUV - Southwest Airlines (after their main hub at Love Field) MMM - Minnesota Mining and Manufacturing (3M) MSFT - Microsoft T - AT &T TGT - Target Corporation TXN - Texas Instruments WMT - Walmart Wasly, a look at an American stock symbol and its attached codes would allow an investor to determine where a stock is traded; however, in July 2007, the SEC approved an amendment to the rules allowing companies moving from the New York Stock Exchange to Nasdaq to retain their three letter symbols; DirecTV was one of the first companies to make this move. When it was first implemented, the rule change was not applied to companies with one or two letter symbols,[9] but then any stock was able to move from the NYSE to Nasdaq without changing its symbol. CA, Inc., which trades under the ca symbol, moved from the NYSE to Nasdaq in April 2008 and retained its two-letter symbol. [10] NYSE behind the point or Nasdaq fifth letter codes and other special codes A – Class A K – Nonvoting (common) U – Units B – Class B L – Miscellaneous V – Pending issuance and distribution C – NextShares M – Class 4 – Preferred shares W – Warrants D – New issue or reverse division N – third class – Preferred shares X – Mutual Fund E – Delinquent SEC Deposits O – Second Class – Preferred Shares Y – American Depository Receipt (ADR) F – Foreign P – Preferred Shares first class Z – Miscellaneous situations G – first convertible bonds Q – In bankruptcy Special codes H – second convertible bond R – Rights PK – A pink sheet, indicating over-the-counter I – third convertible bond S – Actions of beneficial interest SC – Nasdaq Small Cap J – Cotty Voting – special T – With warrants or rights NM – Nasdaq National Market Single-letter ticker symbols A: Agilent Technologies (previously used by Anaconda Co. , American Medical Buildings Inc., Attwoods PLC, and Astra AB[11]) B: Barnes Group (previously used by Bankers Utilities Corp. and Baldwin Lima Hamilton Corp.) C: Citigroup (previously used by Chrysler[11]) D: Dominion Energy (previously used by Douglas Aircraft Inc. and Dart Industries Inc.) E: Eni S.p.A. (previously used by Erie Lackawanna Railway Co. and Transco Energy Co.) F: Ford Motor Company G: (previously used by Greyhound Dial Corp. and Gillette[11]) H: Hyatt Hyatt used by Hupp Corp., Hardee's Food Systems Inc., Harcourt General Inc., Helm Resources Inc., and Realogy[11]) J: Jacobs Engineering Group (previously used by J Net Enterprises Inc.[11] and Standard Oil Co. from New Jersey) K: Kellogg's L: Loews Corporation[12] (previously used by AT&T Corp.) U: Unity Software (formerly used by US Airways) V: Visa Inc. (previously used by Vivendi, New York New Haven & Hartford Railroad, Irving Bank Corp., Vivra Inc., and Viking General Corp.) W: Wayfair (formerly used by Westvaco[11]) X: U.S. Steel (previously used by USX Corp.) Y: Callegany Corporation Z: Zillow (previously used by Woolworth Corp.) Unassigned letters: I: previously used by Intelsat, IteI Corp., and First Interstate Bancorp[13] N: previously used by Inco[11] and NetSuite P: previously used by Pandora and Phillips Petroleum Company. [13] Q: previously used by Quintiles Transnational Holdings Inc. and Qwest[11] S: previously used by Sprint Corporation and Searls[11] Other countries in countries where Arabic writing is used, and in East Asia, Latin-written versions of company names may be confusing for an impractical Western reader; stock symbols provide a simple means of clear communication at work. Many Asian countries use numeric or alphanumeric symbols instead of characters to facilitate international trade. Industrial and Commercial Bank of China – 01398 [Hong Kong] HSBC – 00005 [Hong Kong] DBS Bank – D05 [Singapore] Jardine C&C – C07 [Singapore] TonenGeneral Sekiyu KK – 5012 [Japan] Toshiba Corp – 6502 [Japan] China CITIC Bank Corp Ltd – 601998 [Shanghai – China] Hubei Golden Ring Co Ltd – 000615 [Shenzhen – China] ASUSTeK – 2357 [Taiwan] Chunghwa Telecom Co Ltd – 2412 [Taiwan] Saudi Electricity Company – 5110 [Saudi Arabia] See also see also CUSIP Market Identification Code SEDOL Wertpapiernummer References ^ Mantell, Ruth (3 August 2006).
