About WOODEN BATTLES Wooden Conflict is a fort building battle sim. You build a wooden fort, place units and then watch the battle unfold. To win the game, you will have to either destroy all the enemy units, or capture their flag. Units can be disconnected as offensive or defensive. When units are designed to attack, they will move towards the enemy flag, attracting any enemy soldiers they encounter along the way. Units designed for defense will stay where you place them, waiting for enemies to come to them. If there are no more offensive units left on the map, the game enters a tie-break procedure, where all defensive units automatically switch to offensive mode, and all forts/blocks disappear to clear the way for the soldiers. Armies on both sides will go to meet each other and participate in an epic showdown. The last army standing wins. HOW TO DOWNLOAD AND INSTALL WOODEN FIGHTS 1.
