Today at 1:23 a.m. on Friday at 8:36 am Monday at 11:33am you must log in or register to post here. Workflow Platform TACTIC is an open source remote collaboration platform used to customize and deploy Workflow enterprise solutions. These solutions make it easier to develop and deliver digital assets through a well-defined set of processes. This is achieved by integrating the main engine of the workflow with the components of digital asset management and content management to provide a complete platform for individual corporate solutions Workflow Features TACTIC has a number of key components: Engine workflow and manager: Contribution We always encourage people to contribute to the project. This can be in any form, ranging from asking a question, asking a feature to fix bugs or adding new features. We always welcome feedback as this is the driving force that gives us direction about where to go. If you make any changes to the code, please use your own fork and send a request to pull. Installation You can download the latest distributions from any of the formats from the download community or you can access earlier versions For detailed installation instructions, the documentation of the management system of THE TACTIC useful start to work easily. You can quickly start with the official VM distribution, which has a database and webserver all settings for you. For more information, please contact the Fast Start Guide: Detailed documentation can be found on the community website. There, the documentation is divided into different sections that focus on various aspects of TACTIC: Fast Start: A Brief Overview of How to Get and Running System Administration: a detailed description of the installation and connection to the database and other external services. Set up: A description of how to set up a TACTIC project for end users. Developer: documenting for to set up the TACTIC and access the API. The TACTIC API has a very deep and mature API that allows you to customize almost any part of the system. Python example from the tactic\_client\_lib server TacticServerStub - TacticServerStub.get () pictures - server.query (vfx/shot, (vfx/shot, 'SE001') for shot in frames: print (shot) , shot.get (status) ) Javascript Example let the server and TACTIC.get (); server.update (shot\_key, status, full) Full documentation can be found on the work developer documentation resources for more information, visit the community website for TACTIC. Or take part in the TACTIC forum if you have any questions. There is also a collection of YouTube videos that you can browser through. Visual Effects (VFX) TACTIC has a built-in VFX module that is used as a template for countless productions around the world. Over the years, its popularity has grown significantly, and more and more people are getting acquainted with the functions of TACTIC. Because TACTIC is open source, it can customize and connect seamlessly to any content production studio. It's easy to start production by creating a project with TACTIC nad by selecting the VFX template. Create your own template and reuse your own template for all future productions.
