Extra 2: These have been the main news WhatsApp of recent months WhatsApp is one of the most used applications on the planet, and always stay informed, the company responsible for its development does not stop the moment to introduce new changes and news through updates. These were the most important WhatsApp updates of recent months: stickers After a long wait, WhatsApp officially introduced stickers. Like many other messaging and social media apps, WhatsApp stickers allow users to send images to different topics classified into packages as if they were large emojis. In addition, those users who want to create their own stickers for WhatsApp can also do it easily. The video in the floating windows Another of the great novelties that came in WhatsApp is the ability to play video in a small floating window. This is a feature that other messaging apps, such as Telegram, have been on for some time, but which WhatsApp has not yet adopted. However, the latest versions of the app already allow you to click on the video link to play it in Picture mode in Picture mode and continue to use the app at the same time. Support for Android Pie notifications After the arrival of Android 9 Pie, several apps have been updated to support a new type of notifications of this version of Android, allowing you to directly display images and media on them as well as a button to respond to Fortunately for WhatsApp users, an update to support this Android feature soon arrived, and in fact was one of the first messaging apps to include this novelty. Detecting suspicious links In their goal of combating malware and threats spreading among millions of WhatsApp conversations around the world, the creators of the most popular messaging app have presented a useful novelty that is responsible for detecting those links that may be suspicious, and warning users to prevent them from accessing them. Group WhatsApp video calls are nothing new. Instead, group calls, which arrived on WhatsApp in July 2018, allow users to hold video conferencing or voice calls with up to four contacts. Telegram feeds, although WhatsApp for Android still has a long way to go to look like Telegram, in 2018 we have witnessed the arrival of a novelty that has brought the app a little closer to its open source alternative and whose logo is a paper plane: channels. In fact, these WhatsApp channels are groups where only administrators can send messages that can be useful for disseminating information to a group of people. WhatsApp security: How to protect chat rooms One of the main problems of WhatsApp users is security. The app includes certain security and privacy settings that provide better control over what we want to show and what other users don't. For example, we may decide to hide our recent connection time, our status, our profile picture, etc. We recommend our WhatsApp security guide to keep your data fully protected. WhatsApp Plus and other alternatives to WhatsApp you can download: are they worth it? Almost from the birth of WhatsApp there were alternatives to the original application, which can be downloaded, and which sometimes includes features that we do not find in the WhatsApp app. One of the most famous was WhatsApp Plus, the history of which we studied more thoroughly in due course. However, WhatsApp has decided to block users who have used such alternative apps, so there is no point in trying to download WhatsApp Plus online. But you can still download alternative WhatsApp apps. One of the most famous is YoWhatsApp, which among other things allows you to install and change the theme of the application, change the last time connections manually or block calls. Download YoWhatsApp 2020 you should take into account, however, that when using such applications we run the risk that WhatsApp can achieve to block our account, temporarily or permanently. Another aspect that can be kept in mind is that, being unofficial versions of the application, they can compromise our device with malware or other malicious software in case you download them from an unofficial source.
