If you are feeling a bit spontaneous and want to save a little more, Icelandair is currently offering \$100 from Iceland vacation packages. With just a five-hour flight from the northeastern cities of departure, Iceland is the perfect holiday destination. The deal includes customized itineraries that include flights, hotels and tours. You must book by February 28 and travel is valid from February to April. Additional restrictions and shutdown dates may apply. Is it your turn where would you like to take a last minute trip? Leave your comment below! We manually select everything we recommend and select items through testing and reviews. Some products are sent to us for free without incentives to offer a favorable review. We offer our objective views and do not accept compensation for consideration of products. All items are in stock and the prices are accurate at the time of publication. If you buy something through our links, we can earn a commission. Flights \$US1, GlobalTravel.com a \$299 GlobalTravel.com hotel\$299 Windstar Cruises Cruise \$4,299 With its thunderous waterfalls, steaming geysers, snow-capped volcanoes and black sandy beaches, Iceland is a natural wonder - and it's less remote than you think. Just a five-hour flight from the east coast of the United States, Iceland makes a European holiday accessible and unforgettable. Here you can take a boat ride through a lagoon full of sparkling icebergs, help local farmers herd sheep down from the highlands or sit in a relaxing hot pool under the northern lights in the midst of winter. Sounds attractive? Click on our slideshow for more one-of-a-kind travel ideas; then check our guides where to stay and how to get around. Sail through the ice lagoon if you look at the map of Iceland, you will notice a large white drop in the southeast corner of the island. Vatnajökull's ice cap is huge; over 3,100 square miles, this glacial space covers more than 8 percent of the island. Cloudy weather in Iceland means it is often difficult to get more than a glimpse of the upper which basically covers the national park. The best way to explore this is by heading to one of its 30 glaciers that flow down the mountains. One of the most of them is Jokulsarlon, located at the Ring Road between Vic and Hofn. Here you can take a boat ride through a lagoon laden with icebergs until you reach the glacial face. If you're lucky, you'll see a piece fall off your face - or witness an even more stunning view to watch a new iceberg emerge from the depths with a deafening crack. Tips from a traveler who was There Iceland by the lynnCarol Sun was by the time we arrived at Jokulsarlon Lake, known for its icebergs. Absolutely great place, it is next to the Ring Road, easily accessible and looks like a scene straight from an Arctic journey. Read on! Bake bread in the land of Iceland's famous geothermal resources, which are visible across the country in explosive geysers and bubbling hot springs, are used for everything from electricity generation to water heating (yes, so the hot shower here always smells like rotten eggs - it's sulfur). But did you know that you can also use geothermal energy to bake bread? In the Fontana thermal baths in Laugarvatna, you can walk to the geothermal bakery, where rye loaves are slowly baked for 24 hours just a few inches below the surface of the sand near the lake. Once the bread is dug out of the ground, visitors get a chance to try a fresh, warm slice or two topped with butter. Get down on Lee Farm you are looking to help herd sheep, ride a friendly Icelandic horse or just sleep in a quiet rural setting, visiting your local farm can make an unforgettable addition to your itinerary. Iceland has dozens of farms that open to visitors; Come September and you could take part in a retreat when sheep and horses return to the farm from their summer pastures in the highlands. Nupshestar, near Selfoss, offers a three-day retreat experience in which guests flock sheep on horseback. On the west coast, Bjarteyjarsundur invites visitors to learn about lamb, sheep shearing and other aspects of farm life, with overnight accommodation in two cottages. Efsti-Dalur II welcomes travelers in clean wooden farm huts with horses and cows; there is a restaurant and an ice cream shop with groceries, having gone directly from the farm. See FarmHolidays.is for more ideas. Meet Yule Lads What do you get when you combine the history of the Vikings with a landscape so extreme, only mythical creatures can live there? In eastern Iceland, tales of trolls, elves and fairies still speak to this day (and the people at Egilsstadir still give Lake Lagarfljot a wide berth, due to the big monster worm that supposedly lives there). Much more benign are Yule Lads, the folkloric figures who cause evil around Christmas. Bearing fancy names such as Spoon Licker and Pot Scraper, 13 trolls like good-natured and leave gifts for good girls and boys in their shoe shoes nights leading up to Christmas (naughty children get rotten potatoes instead). The scary lava formations of Dimmuborgir, on the shores of Lake Mivatn, are considered the traditional home of yule lads. Every December the guys show up at local festivals and events, and even hold an annual soaking bash at Myvatn Natural Baths. If winter weather isn't your thing, cute decorations illustrating Yule Lad's antics are sold all year round. Tips from the traveler who was there is our trip to Iceland by Robert Taylor After that we went for a series of rock formations caused by the volcano. They looked like people. There is a myth surrounding these formations. It seems that the trolls (which many Icelanders believe) were with the party and they were having such a good time that they forgot that it was almost dawn and then they were struck by the light of the rising sun and turned to stone. It was a charming place. Read on! Join the locals for a swim or dunk Want to meet Icelanders in their favorite holiday destinations? Don your bathing suit. Almost every city or city in Iceland has at least one swimming pool, and because they are heated by geothermal energy, pools - even outdoor ones - are used all year round. The most famous (and expensive) is the Blue Lagoon near Keflavica International Airport, with its milky blue waters and otherworldly setting among the volcanic rocks. This is absolutely necessary to do, but it was visited almost exclusively by tourists. If you are looking for a more local experience, consider Laugardalslaug in Reykjavik, which has a variety of indoor and outdoor pools, a water slide, hot pots, a steam bath and even masseurs. (It's one of the many public pools in town.) In the countryside, pools and hot pots often offer beautiful views along with a soothing dunk. The Hellulaug Hotel, next to the Flokalandur Hotel, is a natural rocky pool overlooking the bay in the Westfjords. The fishing village of Drangsnæs, also in the Westfjords, is home to three small hot tubs right on the shoreline - a sweet spot to hang out and watch the northern lights. PlanIceland.com/swimming-in-iceland is a good resource for finding a pool or hot pot anywhere in Iceland. Tips from a traveller who was there Iceland in late winter and the twilight of summer Julie Hall There was a village that didn't have its own 'spa' nearby and it was the highlight of the thousands of miles drive. One of our most memorable stops was Jupavik, a tiny town with seven structures and an oversized cement carcass of old herring. ... The nearest thermal dunk was a 30-minute drive further north. It is a neat municipal outdoor pool on the edge of the world, overlooking the Danish Strait. This spa is kind of maintained but not staffed; Just a few hundred kronor in a box. Read on! Snack on the shark, as you might expect from Iceland's native cuisine was limited to being grown, grown or caught in such a northern environment. This means that a lot of lamb is served in various guises; greenhouse vegetables such as tomatoes and cucumbers (greenhouses in the country are powered by geothermal energy); and, of course, seafood. Perhaps the most famous local fish dish is hakari, a fermented rotten shark. Served with a shot of Brennivin, a strong spirit flavored like licorice, the dish is served in small cubes and not for the faint of heart. At our table, only one was able to pass the smell of ammonia and chewy taste and actually swallow it. Fortunately, these days the hakari is more of a tourist dare than an Icelandic delicacy. Shark is available in numerous menus across the country. We tried ours at Narfeyrarstofa, a home bistro in Stykkisholmur on the Snaefellsnes Peninsula. In Reykjavik, you can try it at the Islenski Barinn, an Icelandic bar that also serves whales and puffins. Take Page Out of Iceland's Book Iceland the most significant contribution to world literature are its 13th and 14th century sagas, which tell the story of the adventures of the country's first Viking settlers between about 870 and 1000 AD. Modern Icelanders continue the story of tradition; The country's adult literacy rate is sky-high 99 per cent, and the BBC reported last year that one in 10 Icelanders would publish a book in their lifetime. If you want to delve into Iceland's rich literary history, you can take the Dark Deeds walking tour, which begins at the Reykjavik City Library and winds through the city, stopping at appropriate locations to read Icelandic ghost stories and modern crime fiction. Tours organized by the library are held on Thursdays during the summer months. Also fun is the Bedtime Stories experience at the Icelandair Hotel Reykjavik Natura. Guests gather in a small room on Thursday night to hear a local actor read selections of Icelandic literature that can be anything from stories about elves and spirits to the work of writer Halldor Laxness, who won Iceland's only Nobel Prize in Literature in 1955. Speaking of Laxness, his house-turned-museum, Gjúfrasteinn, makes for another intriguing literary experience. It's about a 20-minute drive from Reykjavik. Visit CityofLiterature.is for more information on Reykjavik's literary landscape. Look at Europe's most powerful waterfall, the Sossonantno-heavy Icelandic language, which is called one of the most difficult to study. Although it is true, one word has been coined so many times as we have crossed the Ring Road that we couldn't help but recognize it: foss, which means waterfall. For such a small island, Iceland goes big with its waterfalls: tourists flock to some of the best, including Godafoss, Skogafoss, Gullfoss and Seljalandsfoss. But it is a remote Dettifoss, perched down by bumpy gravel in northern Iceland that wins the title is impressive. At 147 feet tall and spanning nearly 330 feet, the thunder falls into the canyon below with a force that is supposedly the most powerful in Europe. Rock Out at the Iceland Music Festival has a relatively large music scene for such a small country. Acts committed decades ago, such as Sugarcubes and Bjork, paved the way for modern names such as Sigur Ros and Of Monsters and Men. Who's going to be the next big thing? Find out at one of the country's many music festivals. Best known is Iceland Airwaves, which began in 1999 in a hanger plane and has since become a five-day celebration of new music from bands around the world (including many homegrown favorites and up and comers). It takes place every autumn in places around Reykjavik. Another alternative for music lovers is Aldrei for, for example, the sudur (I never went south), which takes place for a few days around Easter on the WestFjord Peninsula. Focused mainly on lesser-known Icelandic acts, this small but growing festival is free and well attended by locals. The secret solstice is a relatively new festival in Reykjavik that takes place around the summer solstice in June, when the sky is bright 24 hours a day. It has acts from all over the world. Check out IcelandMusic.is full list of festivals and events. Travel to the center of the Earth You can not visit Iceland without picking up a healthy respect for the country's volcanoes. Eyjafallajökull disrupted the air travel for several weeks in 2010 with a massive cloud of ash, and Bardarbunga burned for much of the fall of 2014. Parts of the country's landscape have been rendered lunar, both from constant lava flows, and beaches all have black sand. Flightseeing is one way to see volcanoes in action. But a much less expensive choice is to go underground to explore lava pipes, caves left by long-sleeping volcanoes. Guided tours provide you with the equipment you need, including hard hats and flashlights; Bring your own gloves and dress warm as it gets cold below. In his 1864 novel Journey to the Center of the Earth, the author of the book Jules Verne used a lava tube on the Icelandic peninsula of Snafellsnes as a gateway to tunneling his characters to Italy. Follow in their footsteps in Vatnshellir, an 8,000-year-old lava tube that is now run by Iceland's Parks Service. A steep circular staircase brings you almost 115 feet underground, where you will see rare and delicate lava stalagmites and stalactites, as well as evidence of a one-off river of fire. The best time to travel to Iceland is Iceland is really a year-round destination, with something to offer visitors over Season: From endless days and mild weather during the summer to the Northern Lights and winter sports in the coldest months. Summer is the most popular tourist season in Iceland - that's when crowds descend. But budget travelers and winter sports enthusiasts should consider off-season trips to the country, as accommodation prices and flights to Iceland are usually cheaper in winter. Iceland on a budget It may be difficult to tour Iceland on a budget, but overall, the best strategy for finding big deals is to travel beyond the summer high season. To save on housing, look for guest houses and farms that offer affordable accommodation as well as a unique way to experience local culture. (You can find a list of farm premises in Iceland by FarmHolidays.is). Icelandair regularly offers affordable holiday packages that bundle hotel and airfare, at a reasonable price. - written by Sarah Schlichter and Chris Gray Faust Faust detailed iceland map pdf. detailed road map of iceland. detailed map of golden circle iceland. detailed map of ring road iceland. detailed map of south iceland. detailed driving map of iceland. large detailed map of iceland. free detailed map of iceland
