Map.es offers you the opportunity to check the status of your alien file through your website, via mobile phone via SMS service and NIE foreign business advice. Alien tariffs. You can fill, download and print Alien fees through www.mpt.es and www.mpt.gob.es. In the Republic of Mexico there are a large number of security forces and everyone with their respective delegations to manage their pay medications, so you need to know how to download CUSAEM payroll receipts and that each agent can track their payments. CUSAEM are an auxiliary security force of the State of Mexico, which was born in 2006, governed by the internal rules of the State Security Agency. Although after 4 years of formation, they were no longer considered by the rules, being in the air by all ordinances in the future. For 2015, another ruling was noted by the State Commission on Civil Security (GESC), which does not currently exist, which has generalized that the auxiliary security forces performing special operations functions, public safety, among other tasks, should be under the jurisdiction of the CES, but this order does not include CUSAEM. How do I download CUSAEM payroll receipts? Although CUSAEM found the company in the midst of a lot of forgetfulness on the part of the authorities, employees in this security corps should enter the following web address to know their statements. In which you had to be pre-registered in the system and then entered into the profile of each employee by selecting With a Google or Outlook account. On this page you can know and print the payouts online. CUSAEM and its legal status In 2019, various security agencies have called for the dissolution of CUSAEM to distribute its members to other defense agencies because of several complaints. Because of the abuse of force and power by the police, in addition to the lack of rights and benefits that workers must enjoy, which form the security corps. These workers have not been canceled from vacations, aguinaldos, savings banks, pay approvals, not to mention guaranteed training or increased work ladders. During the 2019 call-up, many CUSAEM members demanded that they split into auxiliary police, banking police and industrial police in the state of Mexico. However, many of the claims requested have not yet been settled because no firm decision has been taken legally, and it is in itself a public or private security authority. CUSAEM is now unfortunately a support group that is not part of the organization that regulates and manages it, violations were caused in relation to wages, among other social benefits. That is why President Lopez Obrador must implement either by integrating them into the Minister of State Security or by establishing an agency to regulate auxiliary and complementary security groups in order to ensure fair pay. Even for staff to be educated with the most whimpering training plans on the handling of firearms and information protection. Having achieved all the improvements, CUSAEM does not need to disintegrate, but actually determine what services it will provide, whether it will be public or private. Then, if private, audit the contracting companies in accordance with the salary rules provided by the law. But achieving this does not depend on the officials who make up CUSAEM, it is up to the government to determine the legal status of this long-established body.
