Alexander Paramonov:
Appeal to World Leaders on Overcoming the Global Financial Crisis!

(Prepared by Vincent Gillespie. 6/26/2025.)

(0:07) Hello. Today, human civilization, as never before, (0:18) stands at a stage in its evolution on the brink of destruction. Today, we (0:27) are facing a global systemic crisis. This crisis affects politics, (0:34) ideology, finance, and ecology. (0:44) Even, as we see and understand, religious denominations have also been affected by this global crisis. (0:52) In light of this, we, as M1 [the Sovereign International Treasury Monetary One], must act in these difficult times for the world.

We must act (1:02) clearly, precisely, and impartially. I want to address the presidents of the world's countries, (1:15) kings, and tsars. I want to address those leaders who are endowed with power.

I want to declare (1:28) the following. It is now becoming clear to the entire world that the time has come (1:39) when a person must make a clear decision. The decision made by a person endowed with power (1:49) determines the lives of people, animals, nature—essentially, life itself.

Therefore, it is precisely these people – (1:59) regardless of the system they operate under, the secret societies they may be aligned with, (2:05) Masonic lodges, or other organizations that lobby and hold power in (2:19) the territories of countries – who must now make decisions. Your decisions (2:28) determine not only the lives of the people and populations under your authority (for now), (2:39) but also your own fate—the fate of your soul, (2:46) your essence, the fate of your family, your lineage. Will it flourish in glory, or will it be cursed (2:55) forever? That is for the people to decide.

Therefore, my appeal is as follows. Muster (3:06) the courage to make the right decision in these challenging times. The world is structured in such a way (3:18) that the energy of communication, development, and any global movement is driven by finance. Without (3:26) finance, the world has forgotten how to function. Thus, finance, I would say, is the foundation (3:35) of the situation. The financial crisis is the one that triggers all others.

I appeal (3:43) to the presidents of countries, the heads of governments, their legislative (3:51) assemblies, and those who influence these individuals. I say to you, we are creators. Our mission is (4:03) creation.

Based on this ideology, this great philosophy, we invite you to participate, (4:12) come together, and jointly organize a way out of this crisis, to lead humanity out of (4:21) this trap of death, chaos, and destruction caused by a fragmented civilization. We (4:30) propose that all presidents and those in power collaborate with the International (4:40) Global Treasury M1. We are organized solely to address these issues, to provide (4:50) assistance, to save humanity, to

preserve culture, and to transform not only the global financial (4:59) system but the entire human world, rebuilding it in a way that (5:08) fosters life, development, and prosperity for all humanity, nature, and our Mother Earth.

The distinguishing feature of Homo sapiens compared to the animal world is reason, and this (5:28) reason is capable of adequately perceiving the surrounding world, environment, circumstances, threats, (5:38) and positive aspects of the world. This reason must now, more than ever, be focused on escaping (5:50) the trap into which ignorance has plunged us. Ignorance is the darkness that has overtaken our (6:01) world, and the way out of this darkness is enlightened reason.

We have established a special international (6:11) anti-crisis department to address the global financial crisis. Currently, an official notification is being sent (6:19) to all country leaders, central banks, and international organizations about this department. Our contacts are open, and we await your positive response to (6:38) begin working on the platform that will lead the world out of this crisis.

Fragmented (6:47) actions by various secret societies, organizations, or interest groups will not lead to (6:59) a resolution of this crisis. To overcome this crisis, one must have the right. The right in (7:06) finance lies with M1.

M1 was not created to usurp this right. M1 was created (7:15) to distribute this right appropriately among countries, international organizations, (7:28) and necessary, constructive programs and projects that lead humanity toward creation. It is on the basis of this right that we, with joy and a deep sense of brotherhood, (7:51) are ready to share this right with those reasonable leaders who currently hold power (8:04) in various countries.

I want to remind all leaders, all those in power, (8:12) that the greatest value on Earth is the people. The people are our shared lineage, our heavenly lineage. We must (8:23) forget all quarrels and disputes.

We must now engage reason. Reason never fosters enmity. Reason (8:32) always follows the path of creation. The reasonable will prevail and lead to a bright life. Only reason (8:42) will lead all of humanity forward. Let us remember what reason is.

Let us come together and solve all problems. (8:52) Thank you.
