toad (source: toad): utility to manage keys in a sqlite database. In component universe, is optional. Version 1.0.1-1.2 (xenial), package size 21 kB, installed size 104 kB are you running xenial? so i guess it's not packaged why, oracle's site doesn't list that much info looks like the package is from 2016 well it's for oracle 11.5 the version of oracle i'm using has 10.2.0.4 ok, see this might be the issue !info
toad xenial apt-cache policy toad | grep Candidate ohh i just noticed a keygen ha, i figured out how to install that, since the version of oracle i'm using is just for desktop toad: type apt-cache policy toad | grep Candidate what does that show? Candidate: 1.0.1-1.2 is what i get ok, type apt-cache policy toad apt-cache policy toad looks good is it installed? i guess so idk how to test it everything worked
fine with 11.5 what does oracle 520fdb1ae7
