Microsoft Word app on Android has a lot of great features. Even so, its user interface is somewhat strange compared to what we see on the desktop version. This way, you may find it difficult to use the most basic features when you first switch to a mobile app. For example, the PDF file save feature. It's a simple process, but that's when you know where to find it. If you're struggling with this app and don't know how to save PDF files, you've reached the right address. In this article we'll tell you how to save your file as a PDF Microsoft is Word for Android, and has introduced several other handy features that make the job easier. Saving the file as a PDF on the Microsoft Word app for AndroidAs we talked about above, keeping it as a PDF on Word for Android is an extremely simple process, in case you know where to find it. Typically, users will find this option in Save as a feature, but with Word for Android you won't find it there. Follow the instructions below to save time saving files like PDF. Step 1: Click the menu button of three points in the top right corner of the app and then select the print option.Step 2: If your phone is not currently connected to any printer, you will immediately see Save as a PDF option in the top left corner. Instead, simply click the arrow button to the right of the current printer name and then select Save as a PDF from the drop out menu. Step 3: Next, click save the circle with the PDF in the center on the right. Step 4: On the next screen, name the file, select the folder you want to save, and click Save. The document is now stored in the PDF format in the folder of your choice. Now, please join us to learn a few other useful tips from word for Android app. Set a mobile view by default, when you open a document on Word for Android, it will appear in Print layout mode. In this mode, it will be difficult for you to view and change the content of the document. While you can quickly switch to a mobile look by clicking on the appropriate icon in the top toolbar, Microsoft has settings that allow you to install the default Mobile View option. Here's how: Step 1: Open your app settings by clicking the three-volume form button and selecting option options. Step 2: Move to the general section and turn on the Start Word switch in Mobile View.From now, every time you open a document, it will appear in the mobile view. To go into print mode, click the Mobile View button with the toolbar at the top. See the smart word Inspection feature lets you see the meaning of the word in documents over the Internet quickly. Here's how to use it on the Android app. Step 1: Tap and hold the word you want to look to pick it. Step 2: Choose the Smart lookup option from the emerging menu. This feature returns results from the Bing search engine. The results page will be divided into two sections - Explore and determine. While the definition shows the meaning of the word you're looking up, explore display examples related to the context of keyword use. The results section on the Web lists the same search results as when searching for keywords in your browser. Using text commands One of the most convenient ways to find any settings on Word is to use text commands. All you have to do is enter the keyword, and Word will display the settings associated with that keyword. Here's how to use text commands:Step 1: Push the arrow button up in the top right corner of the toolbar at the bottom of the screen. Step 2: Now select the light bulb icon next to the Undo button.Step 3: Enter a search query in the dialog field, for example, make my font blue. As soon as you start typing a query, Word displays the appropriate settings. In this case, it displays all the font settings, including text size, text color, type type... Using this feature, you'll never have trouble finding settings on the app again. If you choose the wrong pdf reader on your Android smartphone and don't know how to overwork it, the article will show you how to reset the default PDF file opener.
