Download Ski Region Simulator 2012 Latest Version for MAC Ski Region Simulator is a skiing simulator, developed by Reggel Technology. It is a game with online mode and only one goal: to go down a mountain on snow, to be a skier. It's easy to learn, but it won't be easy to master, and will require training to improve. The first time you play you will be asked to choose your character. After you choose the character, you will start to play in the snow. You will have to ski to reach the end of the level. When you finish skiing, you will be sent to the next level. When you finish that, the next level, and so on. This game is an offline game, so you will only be able to play the game if you are on the same computer on which it was downloaded. In the case of a Mac, you will need to have an Internet connection. The game takes place in an area of Norway, which has two regions, Nordland and Troms, in its mountain areas. There are 10 regions to play and ski, 1 region for each level. The total of levels is 400. To play the game, you will need an Internet connection, and you will be able to download the game in between levels, if you wish to do so. Download Ski Region Simulator 2012 for Mac If you have problems with downloading, or if the download did not go correctly, please visit the page of the developer of the game and download directly from there.
