PDF_Fishing_Guide.pdf>), downloaded July 2014. [^2]: **:** Authoritative Institute of Marine Affairs & Coastal Management (AIMACM), GARBA, . [^3]: Effective and Efficient Fishery Resource Management Plan (EERM Plan), Malaysian Ministry of Natural Resources and Environment (NReD), . [^4]: The contents of this paper have been published in the International Journal of Sustainability (2014; 6: 4999-5011; DOI: 10.3390/is6040949). [^5]: ^*^ *N* is the number of practical industrial fishers. [^6]: ^^^ The number of tuna fish landings under the control of each local government. [^7]: ^‡^ Commercial red-spotted grouper landings in Penang, Pulau Tioman and Melaka. [^8]: ^§^ Landings from boat-based and land-based fishing stations. [^9]: ^**^ The total fishing days in 2013 were 30,704,031 days, of which 15,440,437 days were reported and 15,364,604 days were not reported. [^10]: ^††^ RSPG, red-spotted grouper; GTM, black-spotted grouper; ST, yellowfin tuna; BV, bighead tuna. [^11]: ^**^ The total number of days of trawling was 10,414,918 days, of which 3,852,140 days were for the target species, and 6,461,778 days were for non-target species. [^12]: ^††^ Actual fishing days (49,210 days) were higher than the total trawling days (40,266 days), because the vessels were engaged in multi-species trawling. [^13]: ^****^ The RSPG, GTM and BV were not included as fishing days in the table because the catching efficiency is 1. [^14]: ^† 520fdb1ae7
