Why does he do that audiobook free

Reading a good book is great, but listening to one recorded while driving, flying or just resting at home is a great way to incorporate good books into your life. Fortunately, while there are big players in the audiobook market, there are plenty of options to choose from. This week we want to know what you think are the best. Of course, there are one or two big names that everyone thinks of when they think about where they can buy or stream audiobooks (and we will let you nominate them yourself), but there are plenty of other options that offer free books or a more specific choice of titles. Advertise with your favorite in the discussions below! Let's listen to your voice in the discussions below! To vote, follow these guidelines:Follow this format for your voice, including bold printing. If you don't, it won't count: BEST AUDIOBOOK VOTE LOGO RECORDING: [BEST AUDIOBOOK SERVICE]Why: Explain why this service is the one you think is best for audiobooks! It may have the widest choice or a great companion app that makes listening easier. Maybe there are tons of free books. What makes it the one you would recommend to others and why? Make your case! Try to keep it on one paragraph, maybe two. Don't duplicate the nominations! Instead, if someone has nominated your choice, the star (recommend) give it a boost, and respond with your story instead. Please do not leave non-input, direct comments on this post. He's just going to push them down. Save your stories for other people's submissions! If you're not sure what we mean, check out our writers' nominations below. We will give you an advantage, and everyone should be in the appropriate format, so you can just follow our lead. Hive Five is our weekly series in which you vote on your favorite apps and tools for any job. Do you have a suggestion for a topic? Email us at tips+hivelfive@lifehacker.com!G/O Media can get a commissionIt's Johan Larsson. Photo: Shutterstock If you are looking for a convenient way to incorporate more books into your hectic life, try to pick up an audiobook. You can listen to it on your way to work, while resting on holiday or while trying to think about things to pass the time during quarantine at home. One of the best ways to maximize your listening experience is to sign up for a service that gives you access to a ton of books at once – and we've covered you with the best audiobook subscription services, paid and free, for your bibliophile needs. In this guide, we'll cover our four favorite audiobook platforms and recapitulate a few other services the internet is talking about – because access to more books is always better. Get your headphones on and get ready to hear a good book. Audio (paid)Screenshot: Emily LongG/O Media may get commissionEven although you may have doubts about Amazon, Audible's parent company, no doubt this audiobook service is one of the best nearby. It has many titles – in fact hundreds of thousands – that you can buy, rent, stream and listen to offline using its official app for Android, iOS, Windows Phone and Amazon devices (of course). You can also play audiobooks through the Sonos speaker via the Audible or Sonos app. Audible offers a free trial match that gives you 30 days of membership and a free book. After that, the service costs \$15/month for one credit (good for one audiobook), but you can keep all the books you bought if you ever cancel. Your progress via audiobook is stored wherever you listen to it: on the web, in the app, or in the car, for example. And that's good; you don't want a service that makes it difficult to pick up where you are. You don't have to be an audible member to buy their audiobooks, but if you are, you get a 30 percent discount on any purchase. These books are available to you to listen to anytime, even offline, and the service integrates with your Amazon account so that your discount will also appear when you browse books on Amazon.Depending on how much you read, Audible's selection and credit system make it a great value, as a Reddit user in/mirrorshield84 describes: I pay 2 sound credits a month at \$22.95. So, although it is more expensive, it is cheaper per book. Unless I'm really out of things to read on Libby, I'm trying to let my loans pile up to 2 for 1 credit sales. (No, you won't get a special bonus discount for buying a physical copy of a book and then buying an audiobook, but you often save a little if you buy a Kindle version of the book first and add to the soundtrack – go to the character.) OverDrive/Libby (free)Screenshot: Emily LongOver 45,000 library supports OverDrive, a service that makes it easy to check audiobooks and e-books — for free — from your smartphone or tablet. All you need is your library card and the library in your community that supports the service. (The odds are great you'll find at least one.) Libby offers a similar setup, but it fits better if you plan to visit only public libraries, while Overdrive is better for every other type of library, such as school libraries. Both services are completely free as long as you have a library card for whichever library (or library) you want to use. Yes, your selection may vary depending on the library, but the Overdrive website shows you great other locations where you'll be able to find a book you might want to read (or listen to). You can read ebooks and listen to audiobooks offline in Overdrive or Libby apps, and you can pick up where you stayed no matter how you listen to your content. Your position, tags, and notes are synced between devices. You can't check an unlimited number of audiobooks at once, but it's easy restore the books and free up space for more. Plus, Libby syncs with Sonos, so you can listen to your borrowed books on speaker (or speakers) throughout your house. Scribd (paid)Screenshot: Emily LongScribd has always been a big deal when it comes to printed material - a great place to review raw documents of all kinds, from court filings to research papers, as well as a ton of magazines and books. Scribd also has thousands of audiobooks for you to study and stream, making the service's low monthly fee (\$9, with an initial 30-day free trial) even more cheap. You can explore so much! Scribd's apps for iOS, Android, and Amazon devices make it easy to find, stream, and download audiobooks for offline listening. And the sleep timer Scribd stuff in your apps automatically turns off the audiobook after a certain amount of time (so you don't stay awake after reading before bed, er, listening to all things). In BookRiot, which covers all the things they read, Dana Lee writes: Scribd is great value and in conjunction with library apps like Libby and Hoopla, I usually check here first for titles before using credit or buying a la carte on other apps. While Scribd's audiobook offerings aren't as comprehensive as Audible's, for a lower monthly fee you get a wider range of services - ideal for those who also like to read their favorite monthly magazines after listening to a book or two on trips. Hoopla (free)Screenshot: Emily LongWe has written about Hoopla before, so you should already be familiar with the service. If not, here's a quick explanation: Similar to OverDrive, Hoopla allows you to check out different types of media from different libraries; The content list includes audiobooks, e-books and music, as well as TV shows and movies. Validate your library membership by getting access to your library's digital offerings on the back of your card (digital or physical) where you can get access to your library's digital offerings. You can view your content on Hoopla's website or through its iOS, Android and Amazon apps. Like Overdrive, you're allowed to check a certain amount of content at once in different categories of media, but it's easy to check things again once you're done listening/reading/watching (or after your loan period expires, just like the right library!) Hoopla is completely free, which is a great selling point, and its online ebook reader has all the settings you probably care about: font sizes, background colors, text margins and line height, etc. Its content is limited to what your library has to offer, which will give you all the incentive to jump in the car and make membership lead to several of your local libraries the next time you have a free weekend. Honorable mentionsThere are dozens of places access to audiobooks, and your best bet is probably to combine a free and paid subscription to maximize your choice - especially if you don't want to wait to check out popular bestsellers from your local library or dive deep into a particular genre (like romance or science fiction). Here are a few more platforms to consider:Libro.fm (paid)If you want to support your local independent bookstore (especially in this economy pandemic), Libro.fm gives you access to more than 150,000 titles for \$15 a month, the percentage of which goes to the bookstore of your choice. Audiobooks.com (paid)If you just can't bring yourself to use an Audible, Audiobooks.com has more than 150,000 audiobooks plus tons (and tons) of podcasts for \$15 a month. You can start with a 30-day free trial, which gets you three free books. Spotify (paid)We also want to exclaim Spotify as a decent service for audiobooks. We suspect you'll care more about his musical offerings than anything else, but, as you swing, download a title or two (like the famous harry potter version and the Philosopher's Stone) to balance all that noise. Plus, with Spotify, you can easily switch between playlists, podcasts, and audiobooks in one app. This story was originally published in March 2015, updated in June 2018 with additional reporting by David Murphy, and updated again on 17 May 2020 by Emily Long to include the following: replaced screenshots, added and updated information about featured services, replaced user reviews, and added resource links to other Lifehacker content.
