Executive Interview Questions executives are key players in your company's business development efforts. Depending on the company and the sector, they may be responsible for finding and closing transactions, managing customer contacts or both. Experience in sales or customer service is preferable to senior roles. If you hire an entry-level position, look for enthusiastic, outgoing, curious and smart candidates. The best of them will demonstrate their capabilities by asking the right questions and showing sufficient interest in your services or products. You can ask the following questions to assess the basic features of excellent account managers. It is also a good idea to ask them to make a brief presentation or sales pitch within minutes. You are looking for excellent communication and negotiation skills, business acumen and a confident manner. The candidate you end up hiring should complement all of this with great initiative, perseverance and problem-solving ability. Operational and Situational Questions What do you find most satisfying about this job? How do you deal with rejection? Are you comfortable with a cold call? What methods do you use to open up sales opportunities? What should be effective for demonstration/presentation? How to build a successful business relationship? How familiar are you with CRM? Do you use social media to define perspectives? If a potential customer continued to present you with excuses not to buy, what would you do? Imagine that you have to solve problems for multiple customers at the same time. How to prioritize? Behavioral Issues Recall a time when you encounter a disgruntled and aggressive customer. How did you handle it? Describe the time when you solved a customer problem What was the most difficult deal you had to close? Tell me about the time when you successfully negotiated a contract with a client Describe the time when you managed to reach the goal, when the odds were against you What was your most difficult sales cycle in past positions? Was there a time when you lost the opportunity to engage in perspective? What happened and what did you learn? The two main qualifications for this position are (a) one or two years of practical accounting experience and b) accounting certification or verification that they are in the process of obtaining certification. Once Once Screening for those that are necessary, you want to ask situational and process-based interview questions that only experienced accountants can answer. These interview questions will help you find out whether their experience lines up with what you need as a company, and whether your candidate can be trained to succeed in that role. See which organizations they have experience with, such as multinational organizations and individual entrepreneurs. The questions about their experience with receivables and payables will also tell you which company they worked for and whether they worked mainly with customers or suppliers. You want to know how focused they are on details, how specialized their roles are and how seriously they take their contribution to common business goals. Accounting is usually repetitive and routine work, so you want to hire a motivated, analytical person who strives to improve current systems and processes. Operational and Situational Issues What Do You Know About Our Business Model? How to ensure accuracy in your work? How did you cope with the tight deadlines? How do you stay motivated by doing repetitive tasks? Describe the accounting process you have developed or improved. Describe the time when you helped your company cut costs. How would you create an internal control system to handle accounts?? Share your experiences with receivables and payables. What accounting programs have you used? Describe your familiarity with accounting standards such as FASB and GAAP. Gaap.
