More images navigate your way through your Android offline with Spyglass. Spyglass is a free android app that allows you to use offline GPS for outdoor navigation combined with offline maps, and handy tools. The app will help you navigate outdoors and without roads using the tools available through the app. It gives you a variety of tools such as binoculars, HUD, high-tech compass, gyrocopter, GPS, path point tracker, speedometer, altimeter, Polaris star search, search range, sextant, and more. In addition, it saves the user location and goes to it later, it shows it to you via map using AR or augmented reality technologies with detailed information like distance, size and angle. Download Spyglass and never get lost again. Please check out Tom's Guide for more interesting apps and the latest tips on Android. And you can go visit Tom's Guide Forums for any concerns about your Android. Download Spyglass is an advanced compass and GPS navigation app for iPhone, iPad, iOS and Android. Spyglass come in handy as a car, bike, boat, plane, vehicle or walking compass and GPS navigation for riding, looping, sailing, flying or hiking from the road, in the field or forest, in the sea and in the air. Spyglass is a powerful set of tools needed for every outdoorsman. Augmented reality navigator and free-to-road compass. Packed with plenty of useful tools: high-tech viewfinder (HUD), milspec compass, gyrocompas, maps, tactical GPS, tracefinder, speedometer, altimeter, gyroscope, sniper range, coordinates converter, sextant, inclinometer, angular calculator and zoom camera. Save, find, track and share your position, multiple path points, bearings, sun, moon and stars, all in real time. ... More like a complete GPS kit app, Spyglass supports dozens of different coordinate systems (civilian, military, MGRS, UTM, OSGB) and is ideal for outdoor game treasure hunting like Geocaching, for hiking, cycling and driving. EVERY HARDWARE SENSOR IN USE Turn the device into an advanced milspec gadget that uses every sensor - GPS, digital compass, gyroscope, accelerometer, camera and more. 3D AUGMENTED REALITY Don't get lost with augmented reality navigation. Tag, find and track several locations, bearings, sun and moon and stars, in real time. MILSPEC COMPASS Find directions with a milspec compass running in 3D space at any orientation. See directions tips for many purposes at once, updated in real time on the azimuth circle. Impose a compass on a live camera or map image to instantly see which side you're facing. GYROCOMPASS achieves incredible precision with gyrocompass, as in air or sea navigation. Forget the compass interference. Get a live compass on devices without a compass sensor. TACTICAL GPS Find and track your location, coordinates in geo and military formats, altitude, current and top speed and course. Use imperial, metric, metric, and military units. FINDER Store all the places you need later, a parking space for your car, a hotel, a hidden treasure cache in the woods that's camping next to the lake - or anything else. Location of fags and bearings with a few taps. Select points from the cards. Enter locations, bearings and stars manually or use the built-in catalog of the brightest stars. Insert on imported coordinates or links to maps. Find any target later with built-in navigation tools. Exports by copying coordinates or links. Share places with email. TRACKER Track the position of any location, bearing or star along with the Sun and Moon in real time. See objects across the Earth. See where the augmented reality objects are. Get the distances of objects, azimuths and heights. STARS Track the positions of the Sun, Moon and Stars with an arc of second accuracy, dozens of terms taken into account. See the stars with a realistic schedule. Navigating the Sun, the Moon, the stars. MAPS Monitor the position of your and your targets on maps that rotate automatically according to the current azimuth. See street, satellite or hybrid maps. OPTICAL RANGEFINDER Measures the distances to objects in real time using the rangefinder grille, as in the known sniper sights. SEXTANT, ANGULAR CALCULATOR and INCLINOMETER visually measure the heights of buildings, mountains and other objects. Calculate distances from size or vice versa. Visually measure angles and distances. CAMERA Take photos superimposed with all the data to document your special moments - achieving high speeds, climbing high mountains, hunting, sailing or just visiting big places. - Compare Spyglass vs. Commander Compass - User Guide - Video - IMPORTANT NOTE ON ANDROID RELEASE Spyglass vs. Commander Compass: Compare Features Commander Compass Go Commander Compass Spyglass Highlights Setting Color Topics Offline Maps Augmented Reality Reality Accurate Calibration Optical Rangefinder Sextant Update Tips: If You're About Upgrading. The camera mode in Spyglass can be turned off to save battery life, so you only need one app. The Commander Compass app is still supported in the store to support existing users and provide free updates. Copy all your point of path between apps by emailing directly on your device or use iTunes file sharing. A new guide for users! After months of work, a new user manual is finally available. Send your feedback to let us know what you think and how we can improve it further. Translations are coming. NOTE: The user's guide may take a few minutes to download - patient until it loads. Downloade PUB8 MB Download PDF9 MB Get eBooks app: PDF and ePUB reader for iOS formats and languages New step-by-step Video! Get to know the new videos explaining how to use the basic features and built-in tools of Spyglass and Commander Compass apps we shot this summer - more videos coming soon. IMPORTANT NOTE ABOUT O RELEASE One of the best cross-country GPS navigation tools is now available on Android. Most features are implemented, however, some features available on other platforms need to be made. Multi-purpose tracking, star catalog and coordinate converter later arrive as a free update.
